Charles H. Racey was a pleasant visitor to this place last Saturday. We are always glad to see him. His cheerful optimism is very refreshing. We get so blue over our freezes, rains, mosquitos, bad prices, and other worries, that we feel like putting on crape, and

when somebody comes along who don't let things worry him too much, and seems to think there is a little good in the round, old world, and that our share is waiting for us, we cheer up and rejoice that there is sunshine, blue skies, and pleasant breezes, and find that we have much to be thankful for.

One of our housekeepers tried a fine scheme the other day. She decided to use a flour barrel to kill her chickens in. "It would save all the muss, keep the cats from bothering," etc. So she put the chickens in the barrel, and grabbed their heads one by one, held them on the edge of the barrel and whacked them off. It worked beautifully. Then she scalded the chickens and let them cool a bit, and proceeded to pick them. Alas, there was quite a little flour in the barrel, and the chickens were covered with it; the boiling water had made starch of it. Such a mess, the feathers were just glued together, slippery and sticky, and now if you say "chickens" to her, she'll sho(o)e you off the place. (All this happened to yours truly.)
