There are at least three reasons why a man that smokes cigarettes is a less desirable employe than the man who does not smoke them. First, because it takes considerable time to make and smoke the things. Much valuable time is lost to the employer in this way. In the second place a man who smokes cigarettes endangers property. Many a mysterious fire could be explained if cigarettes could only talk. And then in the third place cigarettes render the smoker both inefficient and undependable. The day is already upon us when the man who smokes cigarettes is finding it hard to secure and hold a job. And it will get harder.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surface of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
