With disasters to travelers and excursions, natural phenomena and the prevalence of the cholera and yellow fever scourges, a great many people have been in a short period brought to an untimely grave.

Who is most frequently spoken of by Republicans in your vicinity as their first choice for Presidential candidate in 1884? I.—Who is most frequently mentioned by Democrats in your neighborhood as their first choice for Presidential candidate in 1884?

The Times recently published answers from 314 of these points, the number ranging from 44 in New York to 1 in Nevada, or an average of 9 from each state.
