The True Blues defeated the Red Stars Saturday; score 21 to 16

The Joseph Wolf team defeated the LaCrosse team at Stillwater Sunday, 1 to 0.

The Gold Dusts lost to the St. Cloud Red Men Sunday at the ball park, 2 to 1. The locals should have won. Ferrell pitched in good form, but the support wasn't feeling well and the errors let the men from St. Cloud in for two scores in the fourth inning. The solitary score made by the locals was made by Holt in the third inning. Dewing was umpire. Ferrell struck out 11 men, Schroeder 2. Ferrell gave no hits, Schroeder 2.

The Fats defeated the Leans Friday afternoon, 11 to 9. It was a good game, whether the crowd expected it or not. Some of the players were old time amateurs, and showed that they had not lost their cunning. But five innings were played. The superior batting of the Fats won the day. Of course they could put more weight behind the ball. The Leans are not entirely satisfied, and another game will be played Sunday, for the benefit of the hospital. Game will be called at 3 o'clock.

New Teachers.

At the school board meeting Friday evening A. M. Smith of Pennsylvania was elected to teach science and to be trainer in athletics, at \$70 per month. Mr. Smith takes the place of A. C. Norris. Miss Anna Kent of Duluth was elected to teach third grade at the Lincoln. Miss Mable Pike of Pipestone to teach fourth and fifth grades at the Columbia, Miss Cora Gates of Caledonia to teach third grade at the Central.

Mr. Smith did not accept, having already taken another position. Superintendent Frazier went to Minneapolis Tuesday and secured Harry S. Ware, who has been teaching in a college at Chillicothe, Mo. Miss Gates also resigned on account of her mother's illness, and Mr. Frazier secured Miss Rose Murphy of Mankato.

INDIGNITY TO SUICIDE BODY. Harsh Method Suggested by Southern Minister to Check the Mania for Self Destruction.

Indignities to the bodies of suicides as a means of checking self-destruction was suggested by Rev. W. F. Lloyd, a leading Methodist minister of Louisville, Ky., in a sermon the other Sunday. "There are many people," said he, "who would dread the infamy of such indignity much more than they fear to violate God's law, and they accordingly would be deterred. Again, I ask, should not those who attempt suicide and fail be restrained of their liberty? In some way we must bring about a revolution of sentiment, and instead of commiserating the suicide he should be condemned and execrated in the strongest terms."

German Honor for Ohio Girl. Jane B. Sherrer, an American girl, a native of Franklin, O., has been granted the degree of doctor of philosophy by the Berlin university. She received the degree of A. B. from the University of Michigan in 1893. Previous to that time she taught school at Oxford, O., and Jackson, Ill. At the present time there are only four women doctors of philosophy of Berlin university and three of these are Americans.

Water Mains will be Laid

At a special meeting of the city council last Friday evening a resolution was passed directing the extension of water mains, and changing somewhat the route previously agreed on. The new route will be from Second street at Sixth avenue east to Third street, and thence north on Third street across the railroad track to Seventh avenue northeast, to Seventh street east. There will be six new hydrants placed and a large extent of territory will have protection. There was some discussion over a hydrant which some of the council thought useless, and Mr. Lester agreed for the water company to place the hydrant wherever the council asked, except on the new line.

THE SECRET OF LIFE.

Carnegie Offers Scientists Big Fund to Discover Secret.

Apparatus of the Most Delicate Kind to Be Provided in the Effort to Learn Origin of Living Things.

Andrew Carnegie will use part of his great wealth to try to wrest from nature her secret of secrets—the origin, cause and principle of life.

Out of the \$10,000,000 given by Mr. Carnegie to found the Carnegie institution at Washington "to encourage investigation, research and discovery," a large sum has been set aside for the construction, equipment and endowment of the finest biological laboratories in the world.

Several Chicago scientists who have made international reputations will find private laboratories and quarters provided for them, embracing every facility for working at the problem of artificial reproduction of protoplasm.

The marine biological laboratory at Wood's Hole, Mass., has been chosen as the foundation for the new institution. The group of scientists, who for several years have labored to establish an independent laboratory for original investigation at Wood's Hole, have in that time produced world startling results.

It was there that Dr. Jacques Loeb, of the University of Chicago, first found that unfertilized sea urchin eggs could be developed by chemical process. It was at Woods Hole, also, that Dr. Albert P. Matthews, also of the University of Chicago, performed the experiments that convinced him that the phenomena of life were electrical.

Scientists from nearly every university in America have begun to turn to Wood's Hole as the most promising of biological centers. They sought in vain for endowment, but the trustees of the Carnegie institution have come to their assistance.

The laboratories, which are to be built on the rocks facing the Elizabeth islands, are to contain everything that the scientists can wish to aid them. The most delicate of electrical apparatus will be supplied. The department of physiological chemistry will be especially well provided for. Each of the investigators will have a private laboratory for his work, and each will be able to draw on the endowment fund to carry on his work.

Scholarships will be provided to enable promising students to carry on their work there. Dr. Whitman, head of the biological department of the University of Chicago, will remain at the head of the Wood's Hole school.
