

### MADE SEASICK BY ELEVATOR.

Operators Frequently Unable to Perform Their Duties.

"What's the matter with the new elevator man? I don't see him at his work to-day," remarked a passenger in one of the big office building elevators. "Oh!" answered the operator, "he got a bad attack of elevator sickness and had to lay off. That usually happens to new men. The sudden darting up and down, continued for a whole day, brings on an attack to a person not accustomed to it, resembling seasickness. There is a feeling of nausea, accompanied by vertigo, and I tell you, a man is in a pretty miserable condition when it comes on him. The upward motion, you see, has a tendency to send the blood to the lower part of the body, and that makes a novice sick at the stomach. The descent forces the blood to the head and brings on giddiness. Yes, it's pretty near as bad as seasickness at first, but a person soon weathers the attack and becomes an immune. The new man will be all right after another day. Sixteenth? Yes, sir."—Philadelphia Record.

### MEAN FLING AT WOMAN.

Pathway of the Modern Portia Not One of Roses.

The advantages of the modern Portia are counterbalanced by an equally large number of difficulties that confront the woman lawyer. Mayor Low's secretary, James B. Reynolds, is still telling his friends a little fling he had recently at Miss Rosalie Loew, the attorney for the Legal Aid Society. Miss Loew was conducting a hearing before the mayor and called one morning to tell Mr. Reynolds she could not attend the afternoon session.

"I've got to go over to Ludlow street and get a man out of jail," she said by way of explanation.

"Oh," exclaimed Mr. Reynolds, in grave surprise. "Are they really getting as scarce as that?"—New York Times.

### Atmosphere of Happiness.

Happiness is, we maintain, a good end. The only question is, how much sacrifice is it worth? Well, certainly not the sacrifice of sincerity and certainly not the sacrifice of others, but surely the sacrifice of the habit of mental laziness, which is only self sacrifice. If by a little trouble we can create for ourselves a sweet atmosphere in which to live, we are surely doing nothing of which we need be ashamed. After all, no one breathes his own atmosphere alone; others breathe it with him. If happiness is a despicable object, let us face the fact sincerely and give up all the many things which we now do openly and exclusively to obtain it. If it is not, why should we not pull ourselves together, give our attention to the game and play up?—London Spectator.

### A Man with a Mission.

It is not given to all men to inaugurate a successful movement. The Rev. Francis Edward Clark is blessed in the satisfaction of having enrolled nearly 4,000,000 members in the Society of Christian Endeavor, which he started twenty-one years ago. And the enrollment goes on. "The roll call of nations" shows that more than a score of countries are represented in the 60,000 branches of the society. Mr. Clark has been the soul of the society since the beginning. He is a Canadian, and was born Francis Edward Symmes. His father dying when he was 2 years old and his mother when he was 8, he was adopted by his uncle, the Rev. E. W. Clark. He is a strikingly handsome man of 51, with the enthusiasm of three steel presidents.

### A Successful Physician.

One of the most versatile of Englishmen is Sir Harry Thompson, the distinguished physician and surgeon. He has been an exhibitor of paintings in the Royal Academy and French salon. He is an authority on lithotomy; he is an astronomer, and has a private observatory; he has written many works on surgical subjects and on other topics so diverse as "Food and Feeding" and "Motor Cars." He has been professor of pathology and surgery in the Royal College of Surgeons, is president of the Cremation society and holds the appointment of surgeon extraordinary to the king of the Belgians.

### Lord Salisbury's Clothes.

The Marquis of Salisbury, by the way, is the worst dressed man in the Upper House, and a funny story apropos of this fact was recently related. Lady Gwendoline Cecil persuaded him to go to a very good tailor not a hundred miles from Hanover Square, but when the new suit was done it was as baggy and ill-fitting as ever. In despair her ladyship went herself to the tailor and asked why he, too, had failed. "But, your ladyship," said the tailor deprecatingly, "what can we do with a gentleman who insists on being fitted sitting down?"—Household Words.

### Attribute Change to Volcano.

During the recent volcanic eruption at Martinique a strange phenomenon was noticed at certain mineral springs near Prague. The water first turned brown and then red, retaining this latter color for a full hour. Scientists are unable to account for this sudden change in the water, but those who reside near the springs are certain that it was caused by the volcano and do not fail to point out that a similar phenomenon was observed in 1756 on the day when there was a terrible earthquake in Lisbon.

### WOMAN A CRACK RIFLE SHOT.

Young Canadian Carries Off Prizes at Shooters' Meet.

Over in Canada, in a picturesque little town called Dun'as, lives a young woman, Miss Bibby by name, who is one of the crack rifle shots of the Dominion. She is a slender little creature, but she is nerveless and strong-armed, and has been addicted to shooting ever since she was a little girl; and, by the way, that's not so long ago, either. Miss Bibby uses the regulation Lee-Enfield rifle of the British army and the Canadian militia, and she has been admitted to membership in the Ontario Rifle association, an organization of the cream of the rifle shooting militiamen and rifle clubs, and she holds her own with the best of them. She is not a Canadian type, for there are very few of the women of the Dominion who take to rifle shooting as an accomplishment, but she has achieved some fame for herself and her town. Recently, at the annual matches of the Ontario Rifle association, held in Toronto, she won considerable prize money and defeated some of the crack shots of the province.

### CALVE AND THE DRESSMAKERS.

She Once Sang For an Admiring Audience of Workgirls.

A characteristic story is told of Mme. Calve. Shortly before her last American tour she paid a visit to her dressmaker in Paris. While she was discussing her costumes with the head of the establishment, which is a very large one, a couturiere hesitatingly entered the room and approached her. She came on behalf of herself and her fellow workers to beg a great favor. Would Mme. Calve sing them a song? It was much to ask, but though they worked for her, hardly any of them had ever had a chance of hearing her beautiful voice.

At once the great singer consented. She went into the workroom, and, having satisfied herself that no unauthorized persons were present, she delighted her audience of workgirls with two exquisite songs. On leaving she was accorded an ovation which for heartiness probably rivaled any which she had received during the course of her brilliant career.

### King Dagobert's Throne.

Much has been written about the antiquity of the throne on which King Edward of England was crowned, but, as French journalists are now taking pains to point out, it is not nearly as old as the throne of King Dagobert, which is still religiously preserved at the National Library in Paris. According to the best authorities, this throne dates back to the seventh century, and consequently it is many years older than the throne of Edward the Confessor. Moreover, there is a popular tradition that it was fashioned by a saint who possessed much skill in carving and engraving. However this may be, the French are very proud of the ancient relic.

### Some Causes of Cancer.

Recent investigations point to the conclusion that one of the causes of cancer is improper food and drink, says Leslie's Weekly. That cancer of the lips and mouth are caused by excessive smoking is now a fact established by the case of Gen. Grant and others, and it has been intimated that cancer microbes have been found in certain vile smelling foreign cheeses, for which some fashionable people profess to have a great liking. So far as the malady is traceable to causes like these the remedy to be applied is simple and easy, viz., to smoke moderately, if at all, and to let all moldy and decayed articles of food alone, no matter if gourmets pretend to like them.

### Queensland Jewel Mines.

The sapphires are blue, yellow and green, of numerous tints and shades, the green and yellow being the most beautiful. The yellow stones are rare, and the blue are of so dark a shade as to appear almost black, and cannot compare with the brilliantly tinted stones of Siam, Burmah, or Ceylon. Green stones are found in abundance, and their frequently great beauty has created a growing demand for them. Among other stones found is the hyacinth, which, when cut, forms a richly-colored gem of a deep-blood-red color, and the Oriental cat's eye. The sapphire deposits are also diamentiferous.

### Got a Lover Easily.

An amusing story is told of the crowning of the rose queen of a country district near Paris. The selected queen, as one of the formalities of awarding her dower, was asked by the mayor for the name of her fiance. "I have none," she replied. Notified that a sweetheart was indispensable, the young lady added timidly: "I thought the municipality provided everything necessary." Straightway a young swain presented himself as an aspirant, and being as promptly accepted all things became regular and in order.

### The Old Man Knew.

A boy outran his allowance and other resources so much that he was in imminent need of aid. So he sat down and wrote to his father thus: "Dear Pa.—I wrote the misfortune to be upset in a boat while out on the river and lost the beautiful watch you gave me. I would like some money to employ a diver to recover it.—Your affectionate son, Thomas." The old gentleman was no fool. He replied: "It is not worth while diving for it. It might as well be in soak in one place as in another."

### Elastic Paper.

Ex-State Senator Arkell of New York has invented a kind of paper which will stretch to a certain extent without tearing. There is a considerable demand for such a paper—for instance, for lining sugar barrels, etc. A great drawback about ordinary papers is that they will not give a particle, and therefore tear easily. The Japanese crepe paper probably suggested the new elastic paper.

### The Dum-Dum Bullet.

The Dum-Dum bullet derives its name from Dum-Dum, India, where it was first made. Its top is of brass and hollow. When it strikes its victim it becomes umbrella-shaped, and tears its way through the flesh, making a dangerous wound. Blood poisoning sets in within thirty minutes after the bullet strikes, at least so says a medical paper.

### Schools in Church Buildings.

President Burlingham of the New York board of education has accepted the offer of several churches of rooms in these edifices for the use of city schools, the buildings belonging to the municipality being overcrowded and thousands of new pupils seeking admission.

### Expected Discovery.

All sorts of wonderfully well preserved things are being unearthed in the palace of Nebuchadnezzar in Babylon. It may be possible that they will yet bring to light some of the baled hay he kept at hand to eat when the grass crop was short.

### Chinaman Enters Politics.

Mon War, a well-to-do Chinaman of Honolulu, has been nominated for the Hawaiian legislature by the home rule party and is making a vigorous canvass of his district.

### The French Army.

The Gazette of the French Ministry of War shows that from Nov. 1, 1902, to Oct. 31, 1903, the French army will consist of all able-bodied men born between Jan. 1, 1857, and Dec. 31, 1881.

### The Best Building Stone.

Fossil coral, found in Fiji, is the best building stone in the world. It is soft when first cut, but hardens to the consistency of fire-brick after a few months' weathering.

### HARSH LAWS IN FRANCE.

Manufacturer and Workmen Not on Footing of Equality.

Under a French law still in force the communication by a factory workman, clerk or manager of a trade secret to a foreigner, or to a Frenchman resident abroad, is punishable with a term of imprisonment ranging from two to five years and with a fine ranging from 5,000 to 20,000 francs. The culprit is, moreover, deprived of his civil rights and kept under police surveillance for a period of from five to ten years after his release from prison. A similar communication made to a Frenchman resident in France is less heavily punished, the term of imprisonment varying in this case from three months to two years and the fine from fifteen to 200 francs. In the case of a state arms or ammunition factory the maximum penalty must be imposed. It appears, further, that in France the proprietor of a factory has a right, without reserve, to the discoveries and inventions made within his field of work by any of his employees.

### ALL THE WORLD AKIN.

Very Easy Matter to Prove a Common Relationship.

If we accept the old adage that "figures won't lie," as a true one, here is a plausible way of proving that all the people in the world are akin to each other.

A man has two ancestors in the first generation, his father and his mother. In the second generation his ancestors are four, because he had two grandfathers and two grandmothers. Each of these four had two parents, therefore, in the third generation, there are eight great-grandparents.

Going on with this calculation, we find that in the fourth generation there are sixteen ancestors; in the fifth generation, thirty-two; in the sixth, sixty-four; in the seventh, 128. In the tenth generation there are 1,024 ancestors; in the twentieth, 1,048,576; in the thirtieth, 1,073,824.

And as the entire population of the globe is only about 1,500,000,000, you see, how it is possible to prove a common relationship.

### Docility of Tolstoy.

Tolstoy is a truly great man, as men go, and it does not lessen the esteem in which he is universally regarded to learn from Mme. Bentzon that he is no longer adverse to the counsels of his wife, but "eats and drinks exactly what she gives him, with the docility of a child." This completely disposes of the theory that Tolstoy is the arbiter of his own fortunes, and establishes the fact that when it comes down to a matter of household discipline he is as powerless and inoffensive as the rest of us. It is a beautiful thing not merely to eat and drink whatever may be provided in the lady's good judgment, but to be docile as well. Docility is an excellent trait in husbands and other lower animals.—Rostwell Field in Chicago Evening Post.

### New Cigarette Paper.

Rofa, raffia, or raffia fiber, one of the vegetable products peculiar to Madagascar, is now being used for cigarette paper, and samples have been placed in the Commercial Museum at Tananarivo. Mr. William H. Hunt, United States Consul at Tananarivo, says in regard to them: "The paper presents the qualities of decided suppleness and strength, and, as the fiber from the start is tasteless, inodorously an exceedingly clean, it certainly recommends itself to the most fastidious." The Consul also points out that this fiber can be used for other purposes, and that therefore it will be well worth while for manufacturers to experiment with it.

### Made a Lot of Trouble.

The late Senator McMillan of Michigan used to tell with great glee about a green Irishman employed on his country place near Detroit. This man had a severe attack of malarial fever, and the senator told him he would send him some medicine which he did—a box of five-grain capsules of quinine. Upon the occasion of his next visit to the farm the senator called on Pat and asked if he received the medicine all right. "Yes, sir," said Pat, "and it cured me, too, but it was a lot of trouble to dig the medicine out of those little shells."

### Preacher and Atheist to Argue.

Thaddeus E. Peck of Stratford, Conn., has entered into a most original agreement with Rev. Mr. Raymond of the First Methodist church there. The congregation wanted more land adjoining the church for improvements, and Mr. Peck offered the necessary space, valued at \$500, on condition that the church pay him \$30 and listen to him ten hours in a public talk. Now, Mr. Peck is an atheist and proposes to discuss religion and morality from his own point of view, but the preacher has agreed to his terms and the meeting is to be held.

### Wanted Him to Work Hard.

Thomas A. Edison, the famous inventor, says Success has a keen sense of humor, and never fails to use it when an occasion presents itself. For instance, just before he went on a recent trip to Florida, he called his manager to his room and said: "I always notice that you look very well when you work hard." The manager looked up, wondering what Mr. Edison would say next. "Now, I am going away to Fort Meyer. I hope you will enjoy good health while I am gone."

Two Asses. As Paddy was going along the street one day he came across a chip potato van drawn by an ass. He stood and looked at it for some time, when a passer by asked him what he was staring at. "Oh," says Paddy, "the gorra, an' Ol've seen munny a lassy ass in Oireland, but Ol've never seen w that needs a stamo engine to push it."—Tit Bits.

### MORTGAGE SALE

Default having been made in the payment of the sum of one hundred forty dollars, which is claimed to be due at the date of this notice, upon a certain mortgage executed by Mary Gross and Phillip H. Gross her husband to Don R. Davidson, bearing date the 19th day of April, A. D. 1900 with power of sale therein contained, duly recorded in the office of the Register of Deeds in and for the county of Morrison, State of Minnesota, on the 24th day of April, A. D. 1900 at 6 o'clock p. m., in volume 6 of Mortgages on page 125; which said mortgage, together with the debt secured by it, was by the said Mary Gross and Phillip H. Gross her husband assigned by deed to H. A. Rider to R. C. Partington and Edward Webber by an instrument in writing dated the 21st day of May, A. D. 1902 and duly recorded in the office of the Register of Deeds of said Morrison county on the 21st day of May, A. D. 1902 at ten o'clock a. m. in book 7 of assignments of mortgages on page 274; and no action or proceeding, at law or otherwise, having been instituted to recover the debt secured by said mortgage or any part thereof. Now therefore, Notice is hereby given, that by virtue of the power of sale contained in said mortgage and pursuant to the statute in such case made and provided therefor, the premises described in and conveyed by said mortgage to wit: Lots numbered seven and eight of and 8 Block forty-fourth of the original town of the Village (now City) of Little Falls, Minnesota, according to the plat thereof made by M. Putnam and on file of record in the office of the Register of Deeds in and for the said county, with all the accretions and appurtenances, which sale will be made by the Sheriff of said Morrison county, at the north front door of the Court House in the City of Little Falls in said county and state on the 24th day of December, A. D. 1902 at ten o'clock a. m. of that day, at public vendue, to the highest bidder for cash to pay said debt and interest and seventy-five dollars attorneys fees as stipulated in and by said mortgage in case of foreclosure, and the disbursements allowed by law subject to redemption at any time within one year from the day of this sale, as provided by law.

R. C. PARTINGTON  
EDWARD WEBBER  
Assignees of Mortgage

E. P. ADAMS,  
Attorney of Assignees of Mortgage  
Dated October 21st 1902.
