

The Only Liniment That Has Held The Farmers' Faith For Two Generations.

Why?

BECAUSE IT HAS CURED EVERY HURT OF MAN OR BEAST THAT CAN BE CURED BY A GOOD, HONEST, PENETRATING LINIMENT.

MEXICAN MUSTANG LINIMENT.

It is the pioneer of liniments. It has stood the test of time. The more people use it the more faith they have in it. It is just as good to relieve your pains to-day as it was to relieve the aches and pains of your grandfathers over sixty years ago.

FRIDAY, APRIL 17

QUALIFIED PROSPERITY.

Boston Post: Secretary Root told us in his speech at the Home Market club dinner that the country enjoys today "unexampled prosperity." President Roosevelt at Milwaukee used the same phrase. Each of these distinguished gentlemen told us that we should probably continue indefinitely to enjoy this prosperity if we let the tariff alone and did not bother the trusts too much.

But at no time within 15 years has there been such widespread and desperate discontent among our working people. There are strikes and lockouts all over the land. During the trouble in the anthracite region more than 10,000 men were out of work for six months. Since the settlement of that difficulty more than 150,000 others in various trades and occupations have gone out on strikes. In the first week in April more than 60 unions in all parts of the country, from Massachusetts to Colorado, called off their members from work. Demands are now pending which, if not granted by employers, will send double the number out before the first of May.

Does this look like prosperity? No land is prosperous in which labor is not contented, in which wage earners do not receive their just share of the profits of production. Mr. Rockefeller gets a check of \$8,000,000 as his share of the profits of the Standard Oil trust for the first quarter of 1903. Mr. Schwab and his associates of the steel trust take in \$10,000,000 as their profits for the single month of March. The monopolies are prosperous, but the workingmen are striking for living wages everywhere.

New Way to Polish a Stove.

No Waste—Odor—Or Dirt. By sprinkling Sifter Stove Polish on the stove and then rubbing with a damp rag and gently brushing with a dry cloth, a brilliant, jet black lustre is obtained. Sifter Stove Polish comes in a large box with a perforated top, through which the polish is sifted just like peppering a hot steak. Sifter Stove Polish is made of pure powdered graphite, which is not affected by fire, produces the most brilliant polish, and when applied, won't rub off. It is colorless. It never dries up. It does not require soaking in water before using. A 10 cent box of Sifter Stove Polish will polish more stoves than three times its cost in any other polish. Get Sifter Stove Polish of any dealer at 5 cents a box, a 50 cent box contains more than twice as much. Insist on the yellow label with the hand.

WEST DARLING.

April 13.—The Randall correspondent still bothers about Darling, but we don't blame Randall, so long as the Darling people are content to sleep and let others run things. The Darling correspondent has been sick and hasn't had time to answer all Randall's nonsense. Perhaps if Randall keeps on as he has started the "silly" people here, as Randall calls us, will separate from the village. People get tired of noise and wind. It makes no difference what the west and north do—we in the south don't want to belong to the village and be a tail to it. When Darling has grown to a village, as it will, the people in the middle of the town will prefer to go there, and then Randall will sing another song, and it won't be about a silly town. Opportunities in the South.

No portion of the United States has made greater progress in the last year or two than the south. Northern and foreign capital is rapidly invading that section, finding profitable investments in the various industries and factories that are being rapidly developed and built. The great influx of settlers is creating an increased demand for lands of all kinds and prices are gradually advancing, as they will for years to come. Work is plentiful and poverty practically unknown. Alabama is supplying coal and iron to all the world. More money can be made and with less labor in raising small fruits and berries and in truck patching on the Gulf Coast than in any other state in the Union. Strawberries from Alabama reach northern markets before those from the states in the southeast. Cattle can be raised with great profit, there being millions of acres of cheap range lands. If you are interested in south and its resources and desire information on any subject, address
