Impoverished Soil

Impoverished soil, like impoverished blood, needs a proper fertilizer. A chemist by analyzing the soil can tell you what fertilizer to use for different products.

If your blood is impoverished your doctor will tell you what you need to fertilize it and give it the rich, red corpuscles that are lacking in it. It may be you need a tonic, but more likely you need a concentrated fat food, and fat is the element lacking in your system.

There is no fat food that is so easily digested and assimilated as

Scott's Emulsion of Cod Liver Oil

It will nourish and strengthen the body when milk and cream fail to do it. Scott's Emulsion is always the same; always palatable and always beneficial where the body is wasting from any cause, either in children or adults.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy. SCOTT & BOWNE CHEMISTS 409 Pearl St., New York 50c. and \$1.00. All Druggists.
