All ingredients in the package. At all grocers. 2 pkgs. for 25c.

ELECTRIC ROAD AGAIN

Little Falls W. P. Co. Still Considering the Building of a Line

The following letter was received during the editor's absence from home, and while we have not the time at present to take the matter up as requested, we publish the letter, says the Mille Lacs Pioneer, thinking it may be of general interest as tending to show that the Little Falls people have not yet given up their project of an electric line to Mille Lacs:—

Little Falls, Minn.
June 29th, 1905.

Editor Mille Lacs Pioneer,

Dear Sir:—We are interested in your article, which was copied by the Little Falls Herald, in which you take up the matter of Electric Railway transportation to Mille Lacs Lake.

There was a party here who had in hand the matter of building a line from here to Mille Lacs Lake, and he did a large amount of preliminary work on it, but unfortunately, when he had just got a good start he was stricken with paralysis and has not been able to go ahead with his negotiations.

We have been endeavoring to interest some Eastern people in this project, and if the organization you mention has been able to gather the information you speak of in your article, it will be of some assistance to us in our negotiations.

If you have not yet gathered this information, regarding the resources and possibilities, would it be possible to get it within a reasonable length of time?

We would also like to know about how much could be expected from Mille Lacs county, or your part of the county, in the way of bonus.

Eastern people as a rule, cannot understand why, if there is such a rich country close to steam road, it has not already been tapped by one of these roads. Of course we understand that one of the two roads gets the business anyway, and if there was an electric road run into the territory that the steam roads would still get the business.

All the information you can furnish us that you think would be of interest in the putting forward of the building of an electric road from here to the lake will be very welcome.

Yours truly,
T. C. Gordon,
Sec. Little Falls Water Power Co.

BELIEVES IT THE REAL THING.

EXAMINES BRAINERD IRON COUNTRY AND CONCLUDES THAT IT IS ALL RIGHT.

D. E. Freeman, who returned yesterday from Brainerd, is sure that discoveries of iron ore in paying quantities have been made near that city.

The location of iron have been made on the new Cuyuna range by the use of the dip-needle and the needle has shown a dip of from 30 to 70 degrees, with a drop of 89 degrees on the land where the most extensive operations are being conducted.

Pickands & Mather, iron men of Cleveland, O., are putting down a shaft on Section 8 in town 45, range 29, that certainly looks like business. The shaft is being made 8 x 12 feet in size and is designed for the use of a double shaft.

Drills are being put in the land all over this section and the Cleveland men can ascertain what is in the ground with a shaft much smaller than the one being lowered. It means that they intend to work the mine if it means anything. The farmers are selling their land outright to iron men and speculators at from \$25 to \$30 an acre and Leo E. Lum of Duluth is said to have an option on the Swartz driving park, adjoining the city limits. There is every reason to believe that the range will be productive of results and will rival other iron finds in Minnesota in wealth and permanence.

Mr. Freeman owns no land in the country where iron has been found and his visit to the range was simply one to satisfy a curiosity. He and other St. Cloud people are heavily interested in the Grand Rapids iron country, many miles farther north.—St. Cloud Journal-Press.
