CITY COUNCIL MEET

Bridge Will Probably Be Re-planked With Tamarac Planks

A special meeting of the city council was held Wednesday evening at the city hall, with Aldermen Kiewel, Dewey, Elvig, Brown, Lane and Carlson present.

The transfer of the liquor license of John Krousey to John Piekarski was allowed, and the bond furnished by the latter approved.

The report of the arbitration board in the A. K. Hall barn matter, composed of G. H. Enke, A. D. Harrison and Carl Bolander, was received, in which the board reported that they found the building in question to have been burned but 40 per cent. A protest to the allowing Mr. Hall to repair the building, signed by several of the property owners in the vicinity of the barn, was read, but was laid on the table until the regular meeting on September 5, action on this matter having been deferred to that time.

The matter of replanking the Broadway bridge again came up for consideration. Alderman Carlson reported his trip to the twin cities to find out what would be the best and cheapest manner of fixing up the flooring. F. W. Cappelan, who was the contracting engineer, who made the plans and specifications of the bridge when it was constructed, made an estimate of the cost of replanking the same as originally at \$4,888 with the track and \$4,654 without the track, and for creosote blocks over a creosote planking \$7,762 without the track and \$8,452 with the track. This engineer stated that in this manner the flooring would last fifteen years, while he advised Mr. Carlson that the city should not use a concrete floor as it would be too heavy for the frame work of the bridge to support. A Mr. Turner, another Twin city bridge engineer said that creosote blocks over creosote planking would be the thing for a flooring for the bridge, but before making an estimate of the costs of putting in same would want to examine the bridge or the plans and specifications of same.

As there is but \$8,500 in the revenue fund, with no further apportionment until November, it was thought best to replank the bridge floor with tamarac and a committee, composed by Aldermen Dewey and Brown, was appointed to get figures from the Pine Tree mill company for 3 inch tamarac sufficient to cover the bridge, and report at the regular meeting.

An estimate was received from City Engineer A. J. Fenn for the construction of an abutment 100 feet long, five feet high, three feet wide at the bottom and tapering to two feet at the top, of rock and cement to be placed on the east bank of the river commencing at the falls, his figures showing a total cost of \$159. The city clerk was instructed to advertise for bids for such a wall, contractor to furnish all material and help.

The city fathers appointed the following to act as judges of the coming primary elections:

- First ward—Peter Vernig, J. J. Gross and Walter Muske.
- Second ward—A. A. Fueger, J. C. Raymond and Victor Schallern.
- Third ward—E. Tranberg, J. C. Burrell and Jacob Posch.

PLAYED GREAT BALL

Record of Gold Dusts for Season an Enviably One

With the Melrose game last Sunday the Gold Dusts terminated what has been for them a most successful season, which started May 1, winning fifteen games and tying one of twenty games played. The other practice games were played before the opening of the season, the first a choose-up-sides game and the other with a pick-up team from the West side. In these two games the players were tried out in as many as three, different positions and no particular effort was made to keep a correct account of them.

Omar Benn, the efficient twirler, around whom an exceptionally strong team was built, left Tuesday afternoon for Viola, Wis., where he will put in a month for his home team.

THE BUSINESS COLLEGE

Opens Next Monday--Prospects of a Successful Year

The fall and winter term of the Little Falls Business college commences next Monday morning, and will be under most auspicious circumstances. The school has been thoroughly overhauled and a number of changes made, such as the moving of the partition between the large assembly room and the shorthand and typewriting rooms so as to make the former room about ten feet deeper, and the subdividing of the south part of the floor into a typewriting room in the eastern part of it and a large shorthand room in the western part of it, with a plate-glass partition, thus giving the instructor a good view of the two rooms. The finishing touches are at present being given to the school, and everything will be in shipshape to sail into the fall and winter work next Monday.

Miss Harriet Gebhardt arrived last night to take charge of the shorthand and typewriting department of the college.

Principal R. E. Millard is very much pleased over the improvements that have been made, and is highly elated over the prospects of the school

during the coming term. He states that he expects that the enrollment during the first week will be in the neighborhood of thirty-five, which is good considering that most of the students do not enroll until the harvesting and threshing is completed.

The night session of the college will start a month later.

Through no fault of the management of the Milo theatre, but due entirely to the misleading advertisement through which a contract was made to show a reproduction of the big Jeffries Johnson fight of July 4, a large number of people who went to see these pictures Wednesday evening were much disappointed, but not more so than Manager C. A. Burr of the theatre. As soon as he saw what it was like Mr. Burr caused a play-card to be posted in front of the ticket window that the pictures were simply a reproduction of the big fight as posed by Clev. Hawkins and Chas. Cutler, and announced same to the audience during the performance, offering to refund money to all not satisfied with it.

ARE SALTING PICKLES

Cucumbers Are Commencing to be Brought in in Good Quantities

About the busiest place in this city at the present time, is the pickling station which is now at the height of its cucumber salting season. The school boys, who under Supt. H. E. White, have raised their cucumber plots, have commenced picking in earnest to realize the fruits of their labors. They are taking large quantities of the pickle-makers to the station, which together with that brought in by the farmers in this vicinity, keeps the help at the station on the jump to receive and give proper credit to the numerous cucumber growers. The school boys have twenty acres grown to this vegetable just south of Athletic park, and the weather during the past few days, during which time the heavy smoke from the western fires has obscured the sun from view and likewise put a damper on the sun's heat, has been ideal for cucumber picking.

Over three dozen barrels have been salted of this season's crop of cucumbers at the station, and several times this amount is expected to be put up here before the close of the season.
