**LINCOLN; MAN AND AMERICAN.**

Compromise and time-serving; were strangers to his vocabulary. Nothing could be unfair than to think of Lincoln, as is sometimes done, as if he had been a man of political cunning, lacking intellectual stability and moral courage. He was open minded, but he was sturdily self-reliant; he was intellectually receptive, but always self-contained, even as he was a man of the people but never common. Shurz tells that in the first Springfield Legislature in which he sat, he recorded his protest against a pro-slavery resolution though followed by only one other man. So did he love truth and scorn a lie that when he was warned in advance against the consequences of his Springfield address, he silenced his timid friends with the unforgettable word "It is true and I will deliver it as written."—Stephen S. Wise, in Pacific Monthly.

**RAW FURS WANTED**

From a perusal of the advertising matter distributed by land sharks one might be led to believe that Alberta, Canada, is a country of salubrious climate. In their brochures the sharks call it "Sunny Southern Alberta," and it would seem but natural to associate the name with orange blossoms, magnolias and alligators. But many a man has discovered the difference—men who have been lured there by glowing advertisements and who would be very glad to return to the United States did they possess the wherewithal to do so. Not only have they found the climate disagreeable but the crops have in many instances been so light that a bare existence constituted the fruits of their labors. It isn't wise to emigrate to a country you know nothing about merely upon the strength of advertisements sent out by agents. There are of course many reliable land men, but there are others who are unscrupulous and they cannot be determined from a distance. The only way is to look over the land before purchasing.—Princeton Union.

**SHOULD BUILD INTO CITY**

**Soo Likely to Run Another Line Into Morrison County**

That the Soo road is to build an extension to its system giving it a direct line from International Falls to the Twin cities, is a rumor about that seems to have considerable foundation.

The road recently purchased the Inasoo Logging road running fifty miles north of Deer River and twenty-five miles south of the same place. It is stated that according to the plans now under contemplation the line would be extended southward into Brainerd and continuing connect with the company's Brocton-Duluth extension near Pierz about twelve miles east of this city.

Another cutoff in Stearns county would make this proposed line from International Falls to the Twin cities considerably shorter than the M. & L. Northern Pacific line connecting these two points.

That the building of the new road is not only feasible but practical as well and will bring big returns to the company is not disputed as it would open up some very valuable territory, iron ore lands, rich agricultural country, etc.

An effort should be made by the citizens of Little Falls to have the extension strike here. It would prove of vast good to the future of this city and on the other hand would bring big returns to the company.

**PARCELS POST A NATIONAL NEED.**

The demand for an extended Parcel Post has become insistent; it will no longer be denied, says an editorial in the Post-Office Department has revealed the folly of permitting the express companies to rob the post-office of a source of large income by conveying small parcels. The recent strike in New York and vicinity during which the business of our greatest city and partly paralyzed by the refusal of the express companies to meet the moderate demands of their employers, emphasized the necessity of rescuing this important public function from the hands of a private monopoly that is not responsible to the people. The complaints which the Interstate Commerce Commission at Washington has received from shippers throughout the country, constitute a demand for immediate relief from the extortions of these companies. The people are determined that we shall have a cheap, immediate and general Parcel Post—a real Parcel Post.
