Here is the Utmost in Roofing Quality

You can't get better than best. There is a standard of material and manufacture in the prepared roofing business that insures longest possible wear and least repairs. This standard represents the absolute limit—the top notch of roofing quality, and Vulcanite is the roofing that sets this standard.

You can pay higher prices than we ask for Vulcanite. But no matter what you pay, you can't improve on Vulcanite quality. And less money than we ask can't bring money's worth. A smaller price won't let the maker give you a roof made good enough to make good.

Investigate today. Learn about Vulcanite Roofing. Find out how easy it is to lay. Anyone who can drive a nail can lay a Vulcanite roof. Ask users about Vulcanite. They call it, "The Lifetime Roof." Ask them why. You'll keep money in your pocket that would otherwise be needlessly spent if you'll investigate roofing.

We have published a book of tests, heretofore trade secrets. It is called "Ten Years Wear In Ten Minute Tests." Ask our dealer for a copy. He'll gladly supply you.

Don't wait until you need roofing. Investigate now, and when your buildings need covering, you'll know what is best to use.

Prof. R. B. Millard,
Little Falls Business College,
Little Falls, Minnesota.

Dear Mr. Millard:
It is certainly a great pleasure for me to be able to recommend your school to anyone desirous of taking a business course. I have never regretted the time that I spent at the Little Falls Business College and think no young man could do better than take a course in either bookkeeping or shorthand. I took the full course and feel that I have been well repaid for doing so—both financially and educationally.

I wish to thank you for the personal attention shown me while attending your school, as well as since going out to my position and trust that I may be able to reciprocate for same.

Wishing you success in the good work and with kind regards, I beg to remain,

Yours very truly,
G. Lindgren.

Many a Man Owes His Success to the Building

of a home because it has served as an anchor and kept him in a straight line and away, possibly, from the many "get rich quick" schemes which are so plentiful today and which so often mean riches only for the smooth tongued promoters thereof. By investing IN YOUR HOME TOWN you are dealing with values and people with whom you are acquainted—people who are interested in your welfare because your success means the success of others about you, and the more successful citizens a town can boast of the better place it will be. All the lumber we have in our yards was purchased with the view of giving our customers honest values, and when you decide to build we want to tell you more about our methods.
