## Now is The Time To Get Your Overland

**T**ODAY motoring is popular the year around.

The old fallacy of not getting your new car before spring is a thing of the past.

In fact motoring right now is far more beneficial and much better sport.

So get that notion out of your head—make up your mind to get a car now—and listen to why it should be an Overland.

Price considered, the Overland has greater value than any other car in the world.

That's a big statement but, nevertheless, a fact.

To begin with, the Overland has the high tension magnets—the most dependable and uniform system of ignition. Many cars have only the cheaper battery ignition.

It has larger tires than many cars of our price. They are 34 inch x 4 inch all around.

Then there is the simple driving arrangement. All electric control buttons are located on the steering column. On many cars the control buttons are located on the dash which is unhandy and often mighty inconvenient.

In bad weather the Overland can be made just about as comfortable, cozy and snug as a closed car. The side curtains fit perfectly and give complete protection from draughts, rain or snow.

The list of Overland advantages is long—too long to give here.

We will gladly explain and demonstrate everything.

Remember—now is the time for motoring.
