THE STEARNS & FOSTER MATTRESS

Facts you should know about a mattress before you buy one

Mattresses look very much alike, but there is the greatest difference between them. The softness, elasticity and durability of cotton-felt mattresses depend on the length and quality of the fibres of the cotton used and the way they are laid. Many mattresses sold as the best cotton-felts, are made from short-fibre cotton that has no life at all. It is the quality of the cotton, the long, strong fibres, and the special "web-process" of laying them, that give Stearns & Foster Mattresses their perfect comfort and wonderful life—the reason why there are more sold than any other made. They never lump; never need remaking. They are made in four grades—a mattress to suit every purse. Come in. Let us show them to you; let us unlace this

opening at the end of the mattress,—show you exactly what is inside. We'll be glad to do it, whether you are ready to buy or not. This mattress is just another example of the excellence of our stock throughout. New goods are arriving daily. SIMONET FURNITURE AND CARPET COMPANY
