Four Out Of Five People Who Wear Glasses

Are far sighted. Indeed, this condition seems to be almost universal among children before school age.

During childhood, when the eyeball is soft, nature readily overcomes this defect, unless it is excessive. But with added years, the eyeball hardens, and the muscles find it harder and harder to overcome the defect.

And then the trouble begins.

But you can end them all by letting us fit you with a correction.

No extra charge for consultation.
