As Light Goes Through Glass Just as light rays penetrate through glass, so current passes freely through Threading Rubber Insulation. Nearly 200,000 tiny threads in each insulator mark the path for the current flow. The hard rubber stands guard against the formation of short circuits between battery plates. There's another reason why the Willard Battery is worth as much more than its slightly higher cost. It's the only battery with the "Bone Dry" characteristic that gives absolute assurance of getting a battery as good as the day it left the factory. THE ELECTRIC SHOP LITTLE FALLS, MINN. Value is the Test Nowadays! FOR CLOTHES, AS FOR ANYTHING ELSE, YOU Pay More Nowadays. And when you pay MORE you cannot afford to get LESS for the Money. This is the big thing nowadays—value. Kuppenheimer Clothes HAVEN'T MOVED AN INCH FROM THEIR OLD Quality, More Distinctiveness, More Wear. And if We ization with correspondingly large Powers of Purchase and Production, or to the fixed Superiority of Kuppenheimer design and tailoring, matters little. The point is that for anywhere from \$20 to \$35 YOU GET MORE VALUE IN THESE CLOTHES; More Quality, More Distinctiveness, More Wear. And if We had Nothing More than this Greater Value to offer, a trip to our store would be worth your while. But we HAVE More to Offer. The Burton Company "The Kuppenheimer House in Little Falls"
