

AMERICANS ARE TAKEN BY 'REDS'

Report Says Engineers and Red Cross Workers Are in Clutches of Soviet.

WASHINGTON IN DOUBT

Poland Mobilizes Entire Forces and Japanese Augment Fighting Strength in Russia—"Reds" Enter India and Persia.

Ghita, East Siberia.—(Via Harbin, Manchuria).—Colonel Blunt and seven other American engineers, Miss Ford, Captain Charette, and several other members of the American Red Cross and an entire Polish army, composed of former prisoners, have been captured by the Bolsheviks at Kluhchinskaya, according to a garbled telegram received from Joseph H. Ray, former American consul at Irkutsk.

"Reds" Enter India and Persia. London.—A wireless message from Warsaw, undated, gives a Bolshevik rumor that "Red" cavalry have entered Persia and India.

Polish Troops Mobilize. Copenhagen.—The Polish cabinet has signed a mobilization order, says a Warsaw report published by the Politiken. The measure was taken, according to advice, because of the Bolshevik advance.

Washington in Dark.

Washington.—War department officials were unable to identify the Colonel Blunt, mentioned in a dispatch from Ghita, East Siberia, as having been captured with other American engineers and Red Cross workers by the Bolsheviks. There is no Colonel Blunt on active duty at the present time, it was said, and the only other officer by that name, Maj. Wilfred M. Blunt, is now in command of a battalion of the Fourth cavalry at Mexicali, Calif.

Army officers were of the opinion that inasmuch as the dispatch was received at Harbin in a garbled condition, the names of all those captured might have been garbled.

Moscow "Red" Garrison Revolts. Helsinki.—Reports from Dorpat say a revolt has broken out in the "Red" garrison at Moscow. Another report says the people's commissaries at Moscow have moved to Tver, owing to the spread of the plague.

Japanese Not to Withdraw. Tokio.—The dispatch of Japanese reinforcements to Siberia was necessary to assist the Czechs and guard extensive rail lines, Premier Hara declared in replying to interpellations in the lower house of the Diet. It was also necessary as a means of assuring the safety of the Japanese garrison.

There was no reason to withdraw the Japanese troops, the premier added, simply because the Americans were being withdrawn, the position of Japan and China in the Far East being far different from that of the United States or Great Britain. Also, he pointed out, the future moves of the Bolsheviks in Siberia could not be forecast.

15 KILLED IN TRAIN WRECK

Canadian Pacific Express, in Two Sections, Collide. North Bay, Ont.—Fifteen persons are dead and a large number injured as the result of a collision between the two sections of the Canadian Pacific express for Vancouver, which occurred about 11 miles east of here. The rear sleeper of the first section, which was stalled, was telescoped by the locomotive of the second section and eight passengers were killed outright, seven dying later from their injuries.

EIGHT FAMILIES BURNED OUT

Thief River Times Office Also Destroyed by Fire. Thief River Falls.—Fire destroyed the two-story building of the Thief River Falls Building company with a loss estimated at \$180,000. On the first floor of the building were the Times Printing company and the Thief River Falls Music company, both of which suffered total loss. The second floor was occupied by eight families who lost all except a little furniture.

TRY TO BOMB POLICE STATION

Irish Raiders and Constabulary in Two Hours' Battle. Limerick.—The police barracks at Murroe, occupied by eight constables, was attacked after midnight by about 40 armed men. The two parties exchanged shots for two hours. The raiders vainly tried to bomb the buildings, but finally fled on the approach of the military. So far as known nobody was injured.

Recover Priceless Jewels.

Paris.—The Bourbon-Orleans family has regained possession of a priceless pearl necklace which has descended from King Charles V, but which for some time has been in possession of Viscountess de Termans. Some time ago Prince Alfonso of Orleans, who recently renounced his Spanish citizenship, brought action against the viscountess alleging she had illegally appropriated the jewels, but in her reply the defendant claimed the necklace had been given to her by the prince.

NAVY PAY RAISE VOTED

House Passes Bill Providing Increase of One-Third

Shortage of Personnel in Fleets Brings About Hurdled Action On New Measure.

Washington.—Increase of approximately one-third in the base pay of all enlisted men in the Navy and the coast guard, except recruits, is provided for in a bill passed by the House and sent to the Senate. The vote was 311 to 10. The increase, retroactive to last January 1, would continue until July 1, 1921.

No increase for officers was provided by the bill, Representative Kelley, Republican, Michigan, who had charge of the measure, explaining that it was desired to hurry pay relief for enlisted men, who are leaving the Navy "at an alarming rate," he added that officers might be provided for later. The increase for men was estimated at \$10,000,000.

"The Navy is short 40,000 to 45,000 men on its normal strength," said Mr. Kelley, "a majority of the ships are tied up by lack of personnel. Practically all of the Pacific fleet are held at Mare Island and Bremerton."

Parliamentary tactics of Republican leaders in calling up the bill under a rule preventing amendment were denounced by Democrats.

ALLIES DESIRE ROOT'S AID

Would Name Him As Member of League Commission.

Washington.—The second meeting of the council of the League of Nations, in reality the first actual business meeting, will be held in London, probably February 10, according to dispatches. At this meeting the council plans to begin consideration of one of the most important subjects with which it has been charged under the Peace treaty, constitution of the permanent court of international justice.

Elihu Root, former Secretary of State, has been selected as the American "member" of the commission to organize the court, but it is not yet certain that the council will feel free to offer him the actual appointment, in this subject of America's ratification. This subject now is under negotiation, with the viewpoint expressed by other nations that they desire to name Mr. Root if the choice would not appear untimely.

20,000 Families Homeless.

Budapest.—Twenty thousand families are homeless in the vicinity of Budapest, living temporarily in barns and railway cars. They are refugees from the section of Transylvania under Rumanian occupation.

Transport Reaches Port Safely.

Halifax, N. S.—The disabled army transport Powhatan has been towed into Halifax harbor. Captain Randall, her commander, reported that three men were slightly ill. Otherwise, all was well on board.

WNU-CANARY-3

British Shelter Denekin. Paris.—General Denekin and his staff have taken refuge on board a British vessel at Constantinople, according to a Zurich dispatch to the Echo de Paris.

Jenkins To Return To U. S.

Mexico City.—William O. Jenkins, American consular agent at Puebla, is arranging to sell his Mexican holdings and leave for the United States, according to Julio Mitchell, the state prosecutor at Puebla, who was interviewed in this city yesterday while transacting official business here. Senator Mitchell declared he was in possession of additional interesting facts with relation to the case of Mr. Jenkins, which could not yet be made public.

Extension Div. Letter

Prizes Reserved for Junior Dairy Judging.—The Minnesota Livestock Breeds Association again offers \$15 for prizes for boys' and girls' dairy and livestock judging contests for 1920 provided county associations offer a like amount. Local contests are to be held at county fairs and the prizes suggested are: First, \$7; second, \$5; third, \$3; fourth, \$2; and six \$2 prizes. Any boy or girl under 18 may enter. The club must be organized before August 1. The two highest winners in the county contest—participants in such contest—can take part in the state contest between the counties. Their expenses to and from the capital city will be paid by the association. The three highest winners in the state contest will receive as a reward a free trip to the National Dairy Show or the International Livestock Show in Chicago where they will participate in a national contest.

Slogans Adopted for Short Courses.—Short courses in agriculture and home economics will be held at Frost and Kannon, Minn., Feb. 2 and 3, at Oakdale and Albert Lea Feb. 5, 6 and 7. A joint session will be held at the last named place on the afternoon of Friday, February 6, with the Southern Minnesota Horticultural Society, "Run Your Farm Home," and "Plan Your Home." "Save Steps" are slogans adopted for these courses. "The more leisure the mother has the more hours are often too long." Short courses are scheduled for Winthrop and Dawson, February 9 to 14; Cornell and Hector, February 16 to 21.

\$30,000 Appropriation Proposed for Clocquet.—A bill before congress appropriates \$30,000 for a forest experiment station at Clocquet, Minn., to be conducted in cooperation with the University of Minnesota. E. G. Cheney, chief of the division of forestry of the Minnesota College of Forestry, says that if the appropriation extended in the desired amount, contemplated, Clocquet will become the investigation station of the government for all the lake states. Cheney urges Minnesotans to write members of congress in behalf of the bill.

ICE ON THE FARM NO LONGER A LUXURY.

Ice for use on the farm, especially the dairy farm, is no longer regarded as a luxury. Many thousands of dollars are lost every year, says the United States Department of Agriculture, because of the improper cooling of milk and cream. One-half of a ton of ice to the cow is held to be sufficient to cool cream and hold it at a low temperature for delivery two or three times a week. Around two tons to the cow should be stored when milk is to be cooled. A higher quality of products and the fewer deliveries necessitated are important items in the saving made.

Experiments made at the South Dakota experiment station show that ice can be stored to good advantage in pits in the ground. From one pit 36 per cent of the original amount of ice stored was recovered and used. "A shrinkage of 64 per cent appears large," says the South Dakota bulletin, "but the convenience and benefits of having ice daily more than repay for the loss."

Good farm ice houses can be built at low cost, say agricultural engineers at University Farm. When sawdust is used for insulation, around 50 per cent of the original crop can be recovered. If natural bodies of water are not available, ice can be obtained by building ice ponds or by freezing water in cans.

NO EXEMPTION ON CHILDREN'S WAGES

In a circular letter addressed to county agents, W. L. Cavert, farm management demonstrator, Minnesota college of agriculture, answers some of the common questions that arise in regard to the income tax as related to farmers. Respecting the matter of wages of children he says: "One cannot claim as a deductible expense, wages paid to children under 21, for the reason that the total income of father, mother, and minor children is taken together in one return as the family unit. Furthermore, if the minor children are the proper of the parent, in the case of children more than 21, one cannot claim wages for farm work for such children, unless wages are actually paid. This ruling should greatly encourage farmers to follow the business-like arrangement of paying children of 21 years of age or over going wages, rather than expect them to get their pay out of the inheritance they may receive from the father's estate."

Income tax returns must be filed by March 15. The full tax may be paid then, or, if desired, in four installments, the first by March 15, the second by June 15, the third by September 15, and the fourth by December 15.

'HOGGING OFF' CORN WINS A NEW CONVERT

Otto Larson of Milan, Chippewa county, Minn., will let his hogs do the most of his husking hereafter. A "hogging-off" corn demonstration conducted on his farm in cooperation with the Farm Bureau has convinced him, says the Montevideo News, that hogs at 13 1/2 cents a pound are money makers. Fifty-two spring pigs were given the run of the demonstration plot, six and a half acres of corn and soy-beans, on September 27 and were kept there 40 days. During that time they made a total gain of 3,744 pounds, each acre producing 56 pounds of pork. At \$13.50 a hundred, Larson's gross return was \$77.76 an acre. Deducting from this \$18 for land rental, seed, plowing, harrowing, wear and tear of machinery and other expenses, his net profit amounted to \$59.76 an acre. The practice of "hogging-off" corn was approved long ago at University Farm as an economical harvest system, and time and labor saved. The planting of soybeans with silage corn has also been found to be in line with a safe and sound farming policy.

Venerated Relic Lost.

The Black Rod was a relic brought to Scotland by the wife of Malcolm Canmore, and long held in extreme veneration by the Scots. It consisted of a cross of gold, including a piece of the true cross, set in an ebony figure of Christ. It was deposited with the regalia in Edinburgh castle, and carried with them to England by Edward I, and used by him to give increased solemnity to the oaths he exacted from the Scottish magnates. All trace of it is now lost.

STOCK CAN'T THRIVE ON FROZEN SILAGE

Frozen silage can be fed in moderate quantities without much real danger of injury to cattle, says W. H. Peters of the animal husbandry division of University Farm. "While frozen silage can be used," says Mr. Peters, "the frost adds to the labor and cost of getting the silage out of the silo. Difficulty is also experienced in breaking up the silage into even feeds. Freezing also detracts from the palatability of the silage. Again, its consumption in good sized quantities will chill the animal and its feeding value is therefore lowered. It also has a tendency to cause a too laxative effect."

"To prevent silage from freezing, the silo should have an air-tight roof and doors which are kept close throughout the winter except when opened to throw out silage at feeding time. Another practice that will help to prevent freezing is to make a canvas mat that will cover the exposed top surface of the silage. This cover will aid in keeping the warm gases from escaping and thus prevent the silage from freezing. Another practice that is especially valuable with thin walled silos is to set poles around the silo, about two feet out from the wall; string woven wire around the poles and fill in between wire and silo wall with straw."

BETTER THE POOR—BETTER THE LESSON

An engine cannot run without fuel. A child cannot grow unless he has the right kind of food. Neither can he learn his lessons easily if only half fed. In one county of Minnesota 69 per cent of the children in the country and small towns were found to be more than five pounds underweight.

These boys and girls were trying to grow without the necessary material to do it. It was found that their food lacked milk and vegetables and in many cases they had to rush away mornings without eating enough breakfast. There are fourteen hours between supper and breakfast and if the child doesn't get his breakfast he goes 20 hours without food. See that he eats it and that he gets cereal, milk and some kind of fruit at this meal whatever else he may have.

See that at the other meals he has milk and vegetables and enough of them. Even a fourth meal after school may be a good thing to keep his active body going and growing.—Adele Koch, extension specialist in home economics, University Farm.
