WHEAT PRICE WEAKENS

Over Bought Condition Brings Lull in Advance.

Grain Deliverable Under Future Contracts Rule Factor in Drop—Manitoba Wheat Maturing Ahead of Rust Damage.

U. S. Bureau of Markets, Washington, D. C., for week ended July 18, 1921. GRAIN: Black rust reports, unfavorable crop reports, drought in Europe had increased outside buying were factors which resulted in price gains during the week, though markets dropped on the 18th due to evening-up sales and a lull in outside speculation. The rule of the Chicago Board of Trade, making grain in cars deliverable under future contracts caused independent weakness in July wheat at Chicago on the 18th. An over-bought condition on the 18th resulted in falling prices. Manitoba reports that wheat would probably mature ahead of rust damage. Country offerings small. Visible supply of wheat now 12,849,000 bus.; corn 20,373,000 bus. In Chicago cash market No. 1 red winter wheat closed at \$1.26; No. 2 hard \$1.27; No. 3 yellow corn 62c; No. 3 mixed corn 52c; No. 3 white oats 38c. For the week Chicago July wheat up 7 1/2c closing at \$1.26; July corn 2 1/2c at 64c. Minneapolis July wheat up 9 1/2c at \$1.31; Chicago September wheat up 9c at \$1.27; September corn 2 1/2c at 61c. Minneapolis September wheat up 9 1/2c at \$1.33; Kansas City September wheat up 8 1/2c at \$1.17.

HAY: Light stocks and receipts cause \$2 advance in eastern hay markets. Receipts of new timothy increased in central western markets but prices were practically unchanged. Southern markets very quiet with very little hay moving through. Some new alfalfa and timothy was bought for deferred shipments. Quoted July 18: No. 1 timothy Chicago \$25, new \$21, St. Louis \$26, new \$20. No. 1 alfalfa St. Louis \$25. No. 1 prairie Minneapolis \$16.

FEED: Demand dull in most sections. Reports of destroyed or temporarily injured pasturage responsible for recent price advances rather than improved inquiry. Visible supply oil meals light and apparently in strong hands. Country dealers buying lightly and sales generally below normal with stocks in excess of requirements.

DAIRY PRODUCTS: Butter markets more firm during most of week but were only steady at the close. Price advances, which have occurred daily recently have been checked and Chicago was the only market showing higher prices on July 18th. Hot weather and a falling off in the visible supply of butter have given confidence to the market. 92 score prices today: New York 41 1/2c; Chicago 40 1/2c; Philadelphia 40 1/2c; Boston 42c. Cheese markets were very firm under an active export demand. Wisconsin primary market prices average on July 18: Twins 14c; Daisies 14 1/2c; Double Daisies 16 1/2c; Longhorns and Young Americas 18 1/2c.

LIVESTOCK AND MEATS: Chicago livestock prices for hogs and cattle advanced during the week but those of sheep and lambs declined as much as \$1. The advance of 55-70c on hogs would indicate that the upward seasonal trend has started. Steers are 10-50c higher. The price range on butcher cows and heifers widened, a 25c advance being scored on the best grades. Lower grades feeder steers declined 75c while lower grades of veal calves advanced an equal amount. Fat lambs declined \$1 while other classes of sheep were about steady. July 18th, Chicago prices: Hogs, top, \$10.85; bulk of sales, \$9.25-10.75; medium and good beef steers \$7.25-9; butcher cows and heifers \$3.75-8.75; feeder steers \$5-7.50; light and medium weight veal calves \$9-11; fat lambs \$8-10.70; feeding lambs \$6-7; yearlings \$6-8.25; fat ewes \$3-5.35.

Dressed beef at eastern wholesale markets declined 50-75c on the lower grades, compared with a week ago. Veal showed no change. Lamb declined \$1 while mutton advanced from \$1.4. Light pork loins advanced \$2 while heavy loins were irregular, advancing \$1 on the better grades. July 18th prices, good grade meats: Beef \$14.25-16.50; veal \$16-19; Lamb \$25-29; mutton \$13-19; light pork loins \$21-27; heavy loins \$16-21.

RUST REPORTS DISCOUNTED

St. Paul—Reports that rust is prevalent in the Northwest wheat fields are being discounted by crop experts, until more detailed information is obtainable, it was stated. It is known that there is some rust, but the arrival of cool weather is believed to have prevented it from spreading to such an extent that it will do wide damage. Reports of rust came from the Red River Valley section. Crops already have suffered from the long heat wave and extensive rust would be a severe blow to the Northwest, it was admitted.

CROP REPORT

In less than one month's time the farmers of Morrison county have seen their crop yields cut in half. Rarely did crops look more promising up to the third week in June. There had been hot weather and plenty of rain but at this time the moisture ceased, a tropical sun continued to pour incessant heat upon the thirsty crops. A typical Kansas wind burned like a flame and hastened crops to a premature ripening. Rain came—too late and added to the destructiveness of the rust. Wheat and oats were injured at least fifty to sixty per cent, the late barley as much as early barley suffered less. Rye will be somewhat shrunken probably fifteen per cent damage on the average. Hay is much lighter than normal with practically no seed clover in sight. Early potatoes have been cut fully fifty per cent. Late potatoes however have been injured little and plenty of rain will make a good crop. Pastures are generally poor, some corn having been cut as supplemental feed. Corn is by far the best crop and will average twenty five per cent above normal at this writing.

PANDACTS

"Pandacts" is derived from the Greek and means "all-containing." The Pandacts of Justinian is a collection of Roman civil law, made by the Emperor Justinian in the sixth century, containing legal decisions of judgments, to which the emperor gave the force and authority of the law. This compilation of 50 books is the most important of the body of the Roman civil law.

THE HALL AN INDEX

The furnishings in the hall are like the window decorations, they are the first index of the people who live there. The furnishings in the hall should, first of all, be simple, practical, cheerful, hospitable and in perfect taste. As one writer puts it: "By your hall you are known." Therefore, the lighting fixtures, floor coverings, hangings and the furniture itself must be selected with great care.

SHE HAD SIMPLE TASTE

A little girl, left in a room with a glass of tall daffodils, was discovered trying to communicate with the queen of the fairies. She was calling down the bell of one flower and listening at the other, a small dimpled hand, with a crease for the wrist, firmly grasping either green stalk. "Please send a cake and a big doll," she said, "to my house, and a new daddy and a taxi so's I can go and spend my pennies."

The fire truck crew was called out

Tuesday evening to put out a fire in a pile of rubbish on seventh street and Third avenue southeast. The truck was handicapped in getting to the scene of the fire quickly on account of children and even grown people getting out into the streets. In this case, it did not involve much but had the fire been in a residence or other valuable property, the delay thus caused might have meant the destruction of the building.
