

BOARD OF EDUCATION

PROCEEDINGS OF BOARD OF INDEPENDENT SCHOOL DISTRICT OF LITTLE FALLS, MINN.

August 23, 1922.
Special meeting of the Board of Education held at the High School building, 7:30 p. m.

Members present were: Nels J. Peterson, Mrs. R. L. Cochrane, S. C. Vassaly, A. F. Koslosky, L. E. Richard.

Bids for driving the school busses being opened were as follows:
Carl Van Herke, \$100 per month.
Will E. Clark, No. 1, \$99.50 per month.
W. A. Dawson, No. 1, \$130.00 per month.
Geo. Henderson, No. 1, \$120.00; No. 2, \$114.00 per month.
H. Boule, \$95.00 per month.
G. C. Baker, \$110.00 per month.
Wilfred Marotte, No. 2, \$124.00 per month.
Wm. Wenzel, No. 1, \$110.00 per month.
C. T. Jaspersen, \$125.00 per month.
Nathan Kelly, \$105.00 per month.
E. G. Anderson, No. 1, \$125.00 per month.
H. Seltenheim, \$90.00 per month.
W. A. McCarthy, No. 1, \$109.50, for \$114.50.

Henry Colombe, No. 2, \$125.00.

On motion duly seconded and carried it was decided to lay the bids over till Friday, September 1st, at 7:30 p. m., at the High School building.

On motion duly seconded and carried the following teachers were elected for ensuing year:

Miss Ripah Ladd, home economics, at \$165.00 per month.
Miss Helen D. Weaver, English and History, at \$150.00 per month.
Miss Valerie R. Kennedy, Natural Science, at \$150.00 per month.
Miss Delia J. Roberts, 4th grade, at \$130.00 per month.
Miss Ruth L. Johnson, 4th grade, at \$115.00 per month.
Miss Cora A. Wedge, Opportunity Department, at \$170.00 per month.
Miss Eulalia Proulx, French and English, at \$125.00 per month.

The following committees were appointed by the president for the ensuing year as follows:

Fuel—Koslosky, Shaw and Vassaly.
Building and Grounds—Richard, Koslosky and Mrs. Cochrane.
Auditing—Shaw, Koslosky, Mrs. Cochrane.

Board adjourned.

NELS PETERSON, President.
L. E. RICHARD, Secretary.

FORMER LOCAL MAN DEAD

Edward J. Newman of Brainerd, formerly of this city and well known here, died at his home Friday night from diabetes. He was 49 years old. Mr. Newman was the son of Mrs. Margaret Newman of this city and he was raised here. He moved to Brainerd a few years ago and for the last twelve years was employed in the Arnold store there. He leaves a wife and one daughter, also his mother, five brothers and six sisters. The brothers are George and Gregory, William of Cushing, and Charles of Minneapolis, and Ben and Walter of Little Falls. The sisters are Mrs. Oscar Olson, Mrs. Douglas Clute of Little Falls; Mrs. Bert Terry, Silverton, Ore.; Mrs. Frank Nelson of Duluth; Mrs. Edw. Brass of Minneapolis and Mrs. G. E. Arnold of New York City. All members of the family except Wm. Newman, Mrs. Terry and Mrs. Arnold attended the funeral, which was held at Brainerd Monday.

James Delahunt is laid up with a fractured ankle. He was injured while hoisting a pump rod with a plank, the plank slipping and striking his foot.

The Coenen soft drink parlor on Broadway east has been remodeled and redecorated. Mr. Coenen has put in additional facilities for serving lunches.

Frank Griffith of this city has received word that his son-in-law, A. R. Kohler of Lambert, Miss., was seriously injured recently. Mr. Kohler was struck by a large loading derrick. Local people will remember Mr. Kohler as he was manager for the Giant Grip Horseshoe Company here for several years.

The Little Falls juvenile band, which played at the Benton county fair at Sauk Rapids Sunday, made a big hit with the fair visitors and the fair management was highly pleased with it. A large number of Morrison county people attended the fair, nearly a hundred from Little Falls going down. The fair was good.

Rev. A. Lamothe returned the latter part of last week from a two months visit with relatives in Canada and the eastern part of this country. Rev. Bergeron, who filled the pulpit at St. Francis Xavier church during the absence of Rev. Lamothe, was assigned to the Breckenridge parish by Bishop Busch and he went to that city Saturday.

A party of young people from this city and their guests were at Brezzy Point over Sunday for an outing. In the party were Dr. and Mrs. C. H. Longley, Miss Frances Simonet and Messrs. Louis McNary, F. E. Gannon, J. S. Lewis and Albert Enke of this city and the Misses Muriel Perkins of Billings, Mont., Alice Swanson of Minneapolis and Agnes Anderson of Mankato.

CALVES FATTEN BEST

ON FARMS WHERE BOLT-Winning, shipping, dehorning, castrating, and suddenly changing young calves from grass to dry feed is vchard on them and checks gains completely for three to six weeks," said W. H. Peters, chief of the animal husbandry division, University Farm, before an audience of livestock men attracted to the farm by the Cattle Feeders' Day.

"This problem plus the problem of securing good calves at a reasonable price," he added, "would seem to warrant the statement that baby beef production is best adapted to the method whereby the calves are grown on the same farm on which they are to be fattened. They can be castrated when young, and, if they are dehorned at all they can be dehorned with caustic also when young, then started on grain in the fall before they are weaned and can be fattened with less risk and a good deal less feed than when they are purchased on the open market in the fall.

"However, when the calves brought to University Farm got settled down and started to feeding well they made gains almost as fast as the older cattle and required only two thirds as much feed to make 100 pounds gain as is usually required by two or three year old cattle.

"The calves appeared to be growing rather than fattening until they had been on feed about 130 days and weighed from 700 to 800 pounds. From then on they seemed to fatten rapidly and at the close of 190 days showed a good deal to finish. We believe that the average feeder of baby beef should figure on about a 200-day feeding period in order to make certain of a satisfactory finish on the calves."

FALL PIGS HOLD OWN

VERY FEW fall pigs are raised in Minnesota and a general impression prevails in some localities that growing them is unprofitable. It is true that unless given good care, warm houses, and a wide variety of feeds, fall pigs may become unthrifty and lose money. But feeds are cheaper in winter than in summer and finished hogs higher than when the spring crop is sold.

Facts concerning the rate of gain, amount of feed to make 100 pounds of pork, and the costs of grains have been obtained from an experiment conducted the last two years at University Farm. Both fall and spring farrowed pigs were fed experimentally on the same rations in dry lots. The feed costs and selling prices were calculated for the five-year pre-war period 1910-1914. The average weight of the pigs at the beginning of the feeding periods was 55 pounds and at the end 200 pounds. These were the conclusions reached:

- (1) Spring farrowed pigs made 10c more gain on slightly less feed than fall pigs.
- (2) The daily gain per pig was practically the same during winter or summer.
- (3) The cost of gains was lower for fall pigs because of the cheaper feed prices during the winter.
- (4) Fall pigs sell at a higher market price than spring pigs.

The trials were in charge of E. F. Ferrin and M. A. McCarty of the division of animal husbandry, University of Minnesota.

111 CIGARETTES

They are GOOD!
10¢

Mrs. P. L. Newman, Sr., underwent surgical treatment at St. Gabriel's hospital Saturday.

Raleigh Pope and F. J. Gorham of Morrison were in Little Falls visiting friends Saturday, enroute to Warroad to look after some land interests. Mr. Pope resided in Little Falls about thirty years ago and was employed with the Herald at that time.

W. M. Knuth, who has been with the extension division of the state university this summer, was here the first of the week visiting his parents. He left Tuesday for Berkeley, Calif., to take a similar position with the University of California.

Miss Susan Hough, who was home demonstration agent in this county until a few months ago, has returned from New York, where she attended the summer session at Columbia university, and she has accepted a position as home demonstration agent in the southern part of Minnesota with headquarters at Mankato.

Mrs. A. E. Amundsen of this city, who attended the state convention of the Woman's Auxiliary of the American Legion at Virginia last week as a delegate from the local post, was appointed a member of the finance committee. Mrs. E. W. Kallher, also a delegate from the local post, served on the resolutions committee.

J. P. Leigh of Baudette, who is spending a few weeks with his daughter, Mrs. Hugh McLeod of Bellevue township, was in Little Falls this week to attend the county fair and historical pageant. Mr. Leigh was one of the early settlers of Morrison county, locating in Bellevue township. He was the first settler in Leigh township and was instrumental in organizing that township, which was named after him.

MILLION DOLLAR SHOW

MORE THAN 1,400 head of cattle are expected to be shown in the cattle show at the coming Minnesota State Fair, Twin Cities, Sept. 2 to 9.

Preparations are being made by the fair management to care for the largest number of pure-bred animals ever exhibited at the fair. Premiums and special prizes totaling \$24,773 are offered for the leading breeds of dairy and beef cattle.

Unusually big crowds are expected to attend the dairy cattle show of the fair this year," said W. S. Moscrop, of Lake Elmo, superintendent of the cattle department. "The campaign to interest farmers and breeders in the use of pure-bred bulls to head their herds is gaining headway everywhere. The results obtained the past few years throughout the Northwest prove the value of a pure bred sire. The hands of farmers have proved that a pure-bred bull will convert a scrub herd of dairy cattle into a very profitable high-grade herd in only two or three generations. Half-blood daughters of a herd of common cows and a pure-bred sire will produce 50 per cent more butter-fat than their mothers. The grand-daughters, carrying 75 per cent of improved breeding, will show an increase of about 100 per cent in butterfat production, compared with their grandmothers. Is it any wonder that the movement for pure-bred sires is so enthusiastically supported?"

Livestock valued at close to a million dollars will be exhibited at this year's state fair. Record breaking entries are reported by the superintendents of the sheep, swine, horse and poultry departments.

BOSS GIVES TIPS ON CURING CLOVER HAY

IN GOOD weather it is possible to cure clover hay without putting it in cocks by making generous use of either a side delivery hay rake or a hay tedder," says Andrew Boss, vice director of the Minnesota Agricultural Experiment Station, at University Farm. "In order to prevent the hay burning and the leaves dropping off, it should be turned frequently," he adds. "Just how frequently, will depend on the heat of the sun and the amount of air that is moving. On a windy day with the sun not too strong, once in two or three hours may be enough. On a real hot day the hay should be kept moving as constantly as possible. It should be dried until no juices drip from a wisp of it when twisted as tightly as possible in the hands. In catchy weather it is usually best to get it into cocks."

GRAIN PLUS PASTURE BOOSTS DAIRY PROFITS

Recent reports from Minnesota cow testing associations show that it is profitable to feed dairy cows some grain in addition to pasture during the summer months. Many dairymen contend that the pasture should furnish sufficient feed. Cows producing a pound of fat or less daily are usually able to obtain enough food on pastures, provided the pasture is not overstocked or dried up. Dr. C. H. Eckles, chief of the dairy division of the university, recommends the following schedule for summer feeding, when pastures are abundant:

Jersey or Guernsey producing—
20 lbs. milk daily, 3 lbs. grain.
25 lbs. milk daily, 4 lbs. grain.
30 lbs. milk daily, 5 1-2 lbs. grain.
35 lbs. milk daily, 7 lbs. grain.
40 lbs. milk daily, 8 lbs. grain.
Holstein or Ayrshire producing—
25 lbs. milk daily, 3 lbs. grain.
30 lbs. milk daily, 4 lbs. grain.
35 lbs. milk daily, 5 1-2 lbs. grain.
40 lbs. milk daily, 7 lbs. grain.
50 lbs. milk daily, 8 lbs. grain.

E. A. Hanson, dairy specialist with the agricultural extension division, reports that 300 cows fed grain while on pasture averaged 301.9 pounds of butterfat in a year, the average yearly feed cost being \$49.35. Seven hundred cows fed pasture only averaged only 237.6 pounds of butterfat, the average yearly cost being \$41.87.

Conclusions to be drawn from this report:

Gain in annual fat production, lbs. 64.3
Value of fat at 40 cents a pound \$24.71
Increase in yearly feed cost with summer grain 7.28

Net gain \$17.45

Mr. Hanson summarizes the advantages of summer feeding as follows:

- Tends to maintain production during slack pasture season.
- Increases total yearly production.
- Cows fed grain plus pasture will be in higher condition of flesh, giving them an advantage over cows poor in flesh, for fall freshening and winter production.

770 ELKS TRIM BRAINERDITES

The Little Falls Elks baseball team administered the Brainerd Elks team a decisive defeat Saturday afternoon at Brainerd, scoring 9 runs to the opponent's 5. The game was a part of the program of the Brainerd Elks 22nd anniversary celebration.

Several Little Falls Elks besides the players attended the celebration and they report a good time. A social session was held in the evening and a chicken dinner was served.

WHEN AND HOW TO SELECT SEED CORN

Seed Corn Time in Minnesota, Sept. 10 to 20.

"Seed corn should be selected in the field as the plants are maturing," says A. C. Army of the division of farm crops and farm management of the state university, in a new special bulletin entitled, "Corn Raising in Minnesota."

"The best time to pick the seed ears," continued Mr. Army, "is when the leaves of the plant are still green, the husks beginning to turn yellow, and the ears well denting. When the seed ears are selected from the plants as they are maturing, the choice can be made on a sound basis to maintain or increase the yielding power of the variety, and the diseased plants can be recognized and avoided. At the same time, the corn is gathered early enough so it can be cured without danger of injury by freezing."

The bulletin deals with all phases of

corn growing under the general headings of essentials for higher yields, and tance of making the plant the basis of seed corn selection. "Effective selection of seed ears from husked corn is impossible," he says. Seed Corn time in Minnesota, Sept. 10 to 20.

"Whoop-la! Whoop-la! Heep big eat! Gee, what if real Indians got some of these goody Kellogg's Corn Flakes! Betcha they wouldn't let us fellers have any at all! Hurry up, they might come in any minute!"

Change your diet today!
make it
Kellogg's
CORN FLAKES

Every day this summer more and more men, women and children are cutting down on the heavy, indigestible foods and turning to a lighter diet for health's sake. They are getting away from that uncomfortable drowsiness and sluggishness and they find they can think and work and play better and get more enjoyment out of the hot days.

Kellogg's Corn Flakes are ideal for breakfast, for lunch, for any meal or between-times nibbles because they not only nourish, but are so easy to digest! With cold milk, Kellogg's are wonderfully delicious.

Nothing can be better for the children than Kellogg's! And, how the little tots love them—Kellogg's are so crispy and crunchy and refreshing!

Order Kellogg's today—the kind in the RED and GREEN package that bears the signature of W. K. Kellogg, originator of Kellogg's Corn Flakes. None are genuine without it!

The Indispensable Coat!
A Variety of Fine Values!

To weather wintry winds and withstand all storms, the mannish coat has been created for femininity and each season finds it at the top-notch of fashion. Particularly attractive are the models illustrated, developed in Double Face Cloth, with reverse side of plain, checked or plaid in contrasting colors, and Herringbone Tweed with long-standing reputation for endurance and wear. A choice between self collar and Beaverette, Raccoon or Marmot is given, but all possess the mannish patch-pockets and snug belts, the touch irresistible. Sizes 16 to 44.

\$14.75 to \$39.75

Enjoy Best Health by Eating Best Foods

If people would eat correctly and of the right kind of food one-half of the doctors would be sitting around idle.

Eating correctly is your business. Our business is to sell you the right kind of foodstuffs—the pure and wholesome foodstuffs that enrich the blood and put pep into your mind and action.

The dealer who buys only guaranteed articles cannot well sell you an imitation. This fact is worth keeping in mind when you go marketing.

What we have is good.

NORTH AMERICAN GROCERY CO.
