JOHN BROWN'S BODY.

IT LIES MOLDERING IN A GRAVE AT NORTH ELBA, N. Y.

Many Pilgrimages to the Old John Brown Farm in the Picturesque Adirondacks. The Region Has Lately Become a Fashionable Summer Resort.

If the soul of John Brown is still marching on, as the old war song says, the grave in which the same mysteriously inspiring slogan hath it that his body lies moldering is becoming year by year a more interesting place of pilgrimage for students of his history and admirers of his deeds.

A good road leads from Mirror lake to the John Brown farm, which is situated in the midst of the grandest scenery in the Adirondacks.

JOHN BROWN'S GRAVE.

mountain, 4,000 feet in height, and from the farm one can look up its entire southern slope and see where it dips into the famous Wilmington notch.

Looking southward, the visitor has a magnificent view of the grandest of the Adirondack mountains. Mount Marcy, with its domelike crown piercing the atmosphere at an altitude of near 5,000 feet, is the highest mountain east of the Rockies.

The finest views of all, however, are to be had from Whiteface, which also stands apart from the other mountains—seems, in fact, entirely separated from them.

That John Brown must have had an inborn love of natural grandeur is shown by his selection of a burial place in the heart of this magnificent valley.

At any rate, he took a farm of 248 acres in the then unbroken wilderness, made a clearing and erected a little wooden house, which still stands where he built it, though it has been considerably improved in recent years.

The house and farm are now the property of Kate Field, Sinclair Tonsey, the sons of William Lloyd Garrison and several other admirers of John Brown. They bought the farm and put a neat wooden fence about the grave.

Things Piano Pupils Ought to Do.

- Always count aloud on a new piece and on the hard places until they are well learned. Always play your lesson over as soon as possible after leaving your teacher, calling to mind all of his suggestions and directions. Always do your practice first and the common things that you would like to do afterward. Always feel the rhythm as well as count aloud. Always find the phrase endings and play connectedly within the phrase. Always crescendo as you play toward the climax of a phrase. Always make evident the climax of a phrase by a sufficient accent. Always make the rhythm apparent by good accenting. Always find out and make manifest the contents of every passage. Always practice at regular hours and allow nothing to prevent you but sickness and absence. Always insist upon having your piano kept in good tune and order. Always have your music room sufficiently warm. Always have your lessons well learned, and you will like to meet your teacher at the lesson hour. Always play when asked and do it without urging. Always have some of your best pieces well in hand, so you can do yourself and teacher full justice when asked to play. Always have a good light on your music page when reading music. Always play accurately, and your advancement will be rapid and correct. Always remember that poor practice cheats yourself and not your teacher. Always conquer some difficult passage at each practice period.
