

The Goodhue Volunteer HOME COLUMN.

RED WING, MARCH 5, 1862. TOWN ORDERS.—We have just printed, and have now on hand, a large lot of blank town orders which we shall sell cheap.

To the Public. Notice is hereby given that T. L. ADAMS is no longer my authorized foreman.

TAXES.—Come, pay up! The books have been handed over to the Auditor, who is now making out the list of unpaid land for publication.

At the quarterly Conference of the Red Wing Circuit held at County line, January 26th, 1862, the following resolution was passed:

Resolved. By the quarterly Conference that our people be asked they are hereby respectfully requested not to encourage or trade with any merchant that sells intoxicating liquors as a beverage.

More Snow.—Saturday night about midnight it commenced snowing, and snowed furiously, with scarcely an intermission until Monday morning. During the time about eighteen inches of snow fell, which added to about two feet that we had before, gives a very good bed for sleighing—if we could only get down to the bed.

COMMUNICATIONS.—A communication from one of our subscribers on the subject of "Chattel Mortgages," is unavoidably left out this week. We shall publish it next week.

We have had in our possession for several weeks a communication in verse, which the writer probably thought was poetry. We take it a rule, from which we will not depart, to publish nothing unless we know by whom it was written.

EXAMINATIONS.—The term examinations of the classes of the University will commence on next Monday, at 9 A. M., and continue through the day and Tuesday.

MINNESOTA REPRESENTATIVES IN CONGRESS.—According to the former basis of representation, Minnesota was entitled to but one Representative in Congress; and as a census is taken but once in ten years, we should have been entitled to but one until 1870, when, probably, at that time, and long before the expiration of that period we will be entitled to three or four.

Wright, Esq., is a clerk in Brown & Betcher's hardware store on Main street, and was there during the day. If Mr. B. could have made such an affidavit as a Justice would issue a warrant upon, a Justice could have been found to sign it in three minutes.

Next, without regard to order of occurrence, Mr. B. traced the affair to Ward as follows: THE PROPERTY CONCEALED IN HIS POSSESSION.

But Mr. Meredith says Mr. D. traced the affair to Mr. Ward. What affair? Why of course he can refer to no other than the affair of stealing the saddle. Here again our excellent friend is mistaken or wrong; for the theft was not traced to Ward at all, nor can it be.

On the contrary, Mr. Ward is abundantly able to prove that he did not take the saddle, by a proving who did take it; and when the matter is thus shifted from Ward's shoulders, it will be easily admitted that it was not theft at all, and the blame (not guilt) lies in neglecting to return it.

Johnson's Agricultural Warehouse. ZUENS & HAINES' PREMIUM GRAIN DRILL!

Improved for 1862. The above drills are all warranted to sow and distribute evenly all kinds of grain, such as WHEAT, RYE, OATS, BARLEY, BUCKWHEAT AND HEMP.

Those with Grass Seed attached will sow FLAX, TIMOTHY, CLOVER, MILLET, and HUNGARIAN GRASS SEED. Those Drills can be regulated to deposit the grain at any required depth, and can be changed in a moment to any kind of seed.

By the use of these Drills a large saving of seed is made and a larger yield of grain secured. The seed is better covered, and the soil better prepared than by sowing broadcast. The seed is not so liable to be winter killed, and the frost, which are so disastrous to broadcast wheat, have a good influence upon that properly drilled. The growth of drilled wheat is uniform, its ripening is nearly simultaneous, and is not subject to the ravages of the mildew, which no fall sowing can furnish to the public at reasonable rates.

The Drills are arranged so that grass-seeds are attached, that while the grain from that sown box is being planted in drills, grass seed is sown broadcast from another. These Drills can be regulated to deposit the grain at any required depth, and can be changed in a moment to any kind of seed.
