Western Canada

Wonderful Stock Raising Country

Vast stretches of undeveloped fertile agricultural land of the highest productivity await the settler in Western Canada. The land possesses the same character of soil as that which has produced the high quality of cereals that have carried the world's premier honors so many times in the past ten years.

Native Grasses are Rich and Abundant

Cattle fatten upon them without any grain being fed. Limited capital on high-priced lands is not a success, neither can the tenant burdened with high rents hope to succeed. The place to overcome these is in Western Canada—where land is cheap where a home may be made at low cost, and where dairying, mixed farming and stock raising give an assured profit.

Land may be purchased from the Railway Companies or from responsible land companies or from private owners. Free homestead of 160 acres each are to be had in the more remote districts.
