Last winter people living in the east were perplexed when they read in papers published in this state that people living in Minnesota were enjoying the finest of picnics and at the same time it was stated that ice was only 18 inches thick. The yankees thought the air must be powerful dry up there in winter. They would undoubtedly be more surprised if they would read that one of our merchants whose necrotic is beyond a question, saw last week, the last week in February, a large yellow butterfly flapping his wings in the air as though it were a hot summer day and robins chirping and the same time the river was frozen to the very bottom. Nature cots up some great capers in this glorious northwest.
