A WELL MERITED WORK.

The value of baking powder consists in the fact that the proportion of alkali and acid is exact, and there is no danger of having yellow biscuits from an excess of soda, or heavy ones from an excess of acid. It is probable that many of the powders are adulterated, some with injurious substances, and others with harmless additions to increase the bulk and consequently the profits. In our own family we have excellent results from the use of the Royal Baking Powder. We have no reason to think that it contains any harmful ingredient. Those who object to the use of baking powder because of adulteration must needs be very sure of the purity of the soda and cream of tartar they use in place of the powder.—N. Y. Christian Union.

THE CHICAGO DAILY NEWS costs but one cent per copy—it's so cheap you can't afford to lose time waiting for a weekly. You ought to know about things when they happen—not a week later. You live in the nineteenth century, in the greatest section of the greatest country on the earth, and you can't afford to be left behind.

Remember—its circulation is 220,000 a day—over a million a week—and it costs by mail 25 cts. a month, four months \$1.00,—one cent a day.

BEFORE YOU BUY A STEAM ENGINE OR BOILER. ATLAS ENGINE WORKS, INDIANAPOLIS, IND.

In those States which have the largest naturalized vote and in which this has been a potent factor, there are more churches, more libraries, more schools, better schools, and more general intelligence than are to be found in those States where the people are not only American-born, but are the children of American-born parents. As a rule, the poor among the immigrants have more education, are more industrious, and more used to continuous hard work than are the poor among native Americans, and consequently they generally succeed in making a living, while the latter frequently fail.—Judge Altged in the February Forum.

The Rev. M. J. Savage, the leading Unitarian clergyman of Boston, regards labor as a necessary evil and fails to see how it can be contemplated as an unmixed blessing, for the reason that the man who must go into the market and sell all the hours of the day in order to live, cannot travel or study or develop a taste for what are rightly called the humanities, or the higher sides of life. He concludes, though, that the wage system is a great improvement over the methods prevailing in the old world, and thereby those who must work are greatly benefitted. As a theorist Mr. Savage offers nothing helpful, and he must know that he, who undertakes to teach the dogma of discontent upon the lines he lays down, is not a minister of good to his fellows. The majority must work, and work to live, and the man of good judgment and true philosophy will encourage the honorable pursuit of that necessity and not undertake to upset conditions that none can remove.—ST. PAUL NEWS.

Two things should be prominently in view in arranging for the World's Fair. First, that it is a real celebration we want, and not a mere peddlers' fair. We can be content with nothing less than a grand, dignified celebration of an event of transcendent importance to the whole world, not alone to its industrial, but to its political and social, interests, as well. Secondly, that, on this occasion, the United States should appear, not for themselves alone, but as the head and front of the people of all the Americas, assuming the leadership, as is right, but associating with themselves, in the initiation and, to some degree, in the conduct of the celebration, all the other nations which owe their existence to the daring and adventurous voyage of Columbus. Many persons think of a world's fair as exerting its economic influence only as a school of industrial art; but this is the smaller part of its mission. It is through widening the markets for proposing new ends, as setting up larger and finer objects of desire, that an exhibition of arts and manufactures chiefly contributes to industrial development.—Gen. Francis A. Walker in the February Forum.
