## LOUISIANA，MISSOURI．

 MONDAY， IT The poll books from the differen Bownshing had not all been received a xpected that they would be examined and the official vote given to－day．The re－ sult，however，is fully ascertained，－It iscertain that Jaines M．Martin has been elected circnit clerk，S．F．Murray couuty clerk，and Perry A．Curry，eougty survey－ marks upon the election will be mainly re merved till then．

Nature presents few anomalies man．A strong dash of similarity runs
through all her works，stamping them as a masterpiece．The noblest of nature＇s pro－ ductions，whether in the animal，the veg－ etable，or the mineral kindgdoms，presen a striking eongruity．The beasts most ad－ haunts of the weaker and meaner animals． The weaker animals．roam in focks，and
herds，and packs，as if to secure that pro－ lection by herding together，which they cannot by individual majesty．The mighty waters of the poles alone：the Eagle make his eyry above the flight of the feathered tribe：the Lion singly seeks his prey，the Jackall preys in packs．Each，trae to its own instinct，pursues the teachings of its artion by the form of the material．This
once is not confined to brutes．Man
strongly in this power of the or－ the texture of the material，frequently gives the best clue to the workings of the pears to be a congruity running parallel，as
if laid down for the direction and guide of the hnman race．The faithful observer of this has a sure chart to point out his dom fail．It is not our purpose to endeav－ or to account for this，but to profit by it and we urge an examination of it upo others．
Look at the man of firm wind and un－ bending integrity，who seeks just ends by just means，who would shun a paltry
tion as he would a pestilence， will find his physical confirmation bearing the deep impress of truth，justice，and linked in with scheming cliques，nor im－ pelled by petty partizanship．Examine the
outline of their physiognomy and you can－ outhine of their physiognomy and you can－
not point out one that will bear the broad seal of candour or conscious integrity．－ Community perceives this and acts upon i without any of those refined dissertation The people take cognizance of the fact，and by a straight course and direct action ar－ Justice and fair dealing call circumventions． support，and true as the magnet，the inate impulses of the people arrive by direct dealing at conclusions，that the schemer have sought to avoid．Polities give place to rectitude，and the political bands of par－ y are dissolved by that simple touchatone New arrangements，fresh organizations， these combinations，these seperiven，and the upright to advocate moral principles； tual protection，who otherwise are widely seperated by party priociples．We claim
no party trinmph in the Jate elections．It no party tritmph in the late elections．It they were divided；nor by the whigs for
similar reason．But we claim it as the
esentative of the free expression of the 1．ple at the polls，rebuking the petty party managers of the Whig party in their ridicu－ lous attempts to choke off and put on，to elect and reject，to will and will not in fallen；but the conceited possessors of grass fed popularity have been taught severely， yet justly，that their popularity lasted no questions involved，and that when left to their own leaden weight，like lead they sank This has also taught a lesson to those not Whigs，unpronounceables，nomen ex nomi－ $n e$ ，whose inflated pretensions were fed by
the green puddle of their own puffed－up－ paltriness．They will know henceforth that though＂E pluribus unum＂yet that the
