KIRKSVILLE POST OFFICE.  
The following is about the true status of the Post-office question at this place. Under the impression that there would be a vacancy at the beginning of Garfield's administration, Judge Sands last spring secured a numerous signed petition from the business men and citizens of this place and went to Washington. There being no vacancy his papers were left with a friend, and some two or three months since were put on file. About this time our present post master went to Washington, prepared to resign in favor of Mr. J. D. Miller, but according to dispatches was told that he must furnish more endorsements. Strenuous efforts were at once made and quite a list forwarded many of Sand's friends and petitioners signing under the impression that Judge Sands had retired from the contest. In the meantime Judge Sands felt easy and went about his private affairs confident that his application would be considered at the proper time. A week or ten days ago the present postmaster again went to Washington. Last Friday Judge Sands received word that when his application was wanted to be briefed and examined, that it was not to be found. This naturally surprised and startled Judge Sands and he immediately started for Washington. Saturday morning a dispatch was received here that J. D. Miller had received the appointment and it would be sent into the Senate on Tuesday. However, none of the daily news report in the St. Louis papers mentioned the appointment or its confirmation. The following dispatch from Judge Sands will explain:

"WASHINGTON, D. C. April 5.—Miller was appointed, but the appointment was referred back to-day. I found my papers after two day hunt, among petitions for fourth class offices."

Yesterday's Globe mentions the fact that there is a contest over the Kirksville post office and that both postmaster Hooper and Judge Sands were there.

We give above without comment or criticism, the true status of the matter so far as we understand it only adding the remark that this sudden disappearance of Judge Sands' papers, at the critical moment was to say the least, a little peculiar.

A later dispatch states that the proposed snap game had been blocked and that Mr. Miller's appointment had been withdrawn.

As to Mr. Miller and Mr. Sands, both men are competent, and either would doubtless make an efficient postmaster, nor is it supposed that Mr. Miller is responsible for the "dark lantern" tactics which are beginning to become visible. Our preference for Mr. Sands has been based first on the fact that he is incapable for active out door labor, having lost a foot by a southern cannon ball, second because he was first in the field, and third because of the bitter and vindictive war that has been made upon him without cause or provocation, merely because certain parties imagined he was a special friend of the Graphic. Further than this the Graphic is not directly or indirectly, interested in the contest. Nor has been.

Latest News From the Market—Everybody Interested!

Mr. B. F. Lamkin has just returned from a trip east after goods. He was just in time to strike the market when the millionaire firms were engaged in a fierce conflict over prices, and succeeded in "striking bed rock" on a large line of staple and fancy goods, which will enable him to make the public generally, and his competitors open their eyes in amazement. This is no buncombe as the figures will be given to back the statement. New Goods will be arriving this week, and look out for a profound sensation. Lamkin knows what he is about and when he strikes a good thing his customers get the benefit. He has purchased a heavy stock because he got it from 10 to 25 per cent lower than regular wholesale rates, and cheaper than they can be had to-day at the manufactory. "Goods well bought are half sold" and you may look out for a big rush for the next thirty days. Customers from a distance should make a note of these points and call and see him.
