Farmers' Day at Laclede High school

In pursuance of the plan to make the course in agriculture at Laclede high school of the most possible value to the students who are taking that course, it has been decided to make Friday afternoon of each week "Farmers' day" and the farmers of the township are invited to visit the school Friday afternoon of next week or any Friday afternoon thereafter and see for themselves just what is being done.

Visitors will have an opportunity to express their views of the work being done and the methods used, and it will be of much benefit to the students and the mutual interchange of views may be very helpful to all.

The plan has been tried very successfully elsewhere, although this is its first trial in this county, and if it gives the results expected here it will probably be adopted by other high schools. Visit the school. You can spare the time now. Show the members of the class that you are interested in farm progress, not only for yourself, but for them as well.
