We have a nest of young bloods around Ayres who are practicing for a show of some kind. They have tried several plays, but none had enough sparking. They have been practicing on the sly, but the play soured on one of the parties and he let the cat out of the bag, and from what he says they have the crazy part down fine. They met Friday night at the school house and some were so crazy that they had to draw pictures of themselves and leave them in the desks.

In regard to the article several weeks ago giving the State Labor Bureau's statistics of Saline's surplus products, Jo Mullins of Miami writes us that he thinks the labor bureau bases its estimate on shipments made from the county on figures furnished by our two railroads, in which case he says Saline would be the loser as his part of the county ships much grain by boat or on the Wabash railroad across the river.
