SHORT COURSE MEN ORGANIZED

Students and Farmers at Marshall Form Permanent Club.

The extension short course in agriculture offered by the College of Agriculture has resulted in an organization at Marshall known as the Student Organization of the University Short Course in Agriculture at Missouri Valley College. H. O. Allison, J. C. Hackleman, T. R. Douglass and Dr. J. W. Conaway, members of the faculty of the College of Agriculture, returned to Columbia Friday night after giving the short course at Marshall. Mr. Allison said yesterday that the lectures were attended by from eighty to one hundred and fifty students and farmers every night. Demonstrations in stock judging, dissecting and hog cholera treatment were given by the lecturers on animals furnished by farmers.

The organization of students offered resolutions thanking President A. Ross Hill, Dean F. B. Mumford, of the College of Agriculture, the lecturers, and the faculty of the Missouri Valley College. The students asked that a similar course be given there next year. They also resolved that the organization be permanent.

A. J. Meyer, representing the department of animal husbandry, and J. C. Hackleman of the agronomy department left last night for Eagleville to hold a short course there.

PROPOSE TO CHANGE HIGHWAY

St. Joseph-Hannibal Road May Follow the Burlington Railroad.

Those interested in the St. Joseph-Hannibal cross-state highway propose to change the route to follow the Burlington railroad between those two points.

Curtis Hill, state highway engineer, has arranged a preliminary meeting at Brookfield Wednesday. Later a meeting will be held in all the counties along the proposed route.

Mr. Hill will confer also with business men in Kansas City this week about a proposed road between Kansas City and St. Joseph.

To Issue Bulletin on Road Building.

The manuscripts and cuts have been sent to the printers for a bulletin on practical methods and cost of building country roads. This material was furnished by the state highway department of the Board of Agriculture. Curtis Hill, state highway engineer, says that the bulletin will be of value in helping to improve Missouri road conditions.

ART EXHIBITION OPENS TOMORROW

Selection of 138 Pictures are From Water Color Society of New York.

BE HERE UNTIL MARCH 23

Paintings Insured for \$24,000. Brought to Columbia by Art Lovers Guild.

The sixth annual exhibition of Selected Water Colors by American Artists will open in the Archaeological Museum tomorrow. It is given by the Art Lovers' Guild.

This is the third collection of paintings shown this year. It is made up of 138 pictures selected from the exhibition before the American Water Color Society in New York.

"We are especially fortunate to get such a collection here," said

A Sunny Corner.
—By Clara T. McChesney.

Prof. John Pickard this morning. "It is the most brilliant display we have ever had. Few universities of this size are able to get such an exhibit."

This collection of water colors has been exhibited since last June. It has been shown in St. Louis, Buffalo, Pittsburg and Detroit. After being exhibited here until March 23, it will be sent to Toledo, Chicago and Indianapolis also will have the exhibit.

Some of the artists represented in the collection who have had their paintings shown here before are: Reynolds Beal, Carlton T. Chapman, Colla Campbell Cooper, Charles Warren Eaton, Charles P. Gruppe, George W. Maynard, F. Luis Mora, J. C. Nicholl, F. K. Rehn, Alice Schille, Charles H. Woodbury and Cullen Yates.

The museum will be open every morning from 8 to 12 o'clock. It will be open also each Monday night, beginning next week. These paintings are insured for \$24,000.

GERM CELLS CARRY HEREDITY

Dr. W. Johannsen Shows How Knowledge of Subject Has Developed

That our knowledge of heredity is very limited was the statement made by Dr. Wilhelm Johannsen in his lecture on the "Problems of Heredity" at the Agricultural Auditorium, last week. The lecture was given under the auspices of the Scientific Association and the Sigma Xi fraternity. Doctor Johannsen is from the University of Copenhagen in Denmark.

Doctor Johannsen first defined heredity, and then told the history of the development of the knowledge of it. The first person to make a mathematical investigation of heredity was Francis Galton, according to Doctor Johannsen. He found that the average height of one generation was the same as the average height of the succeeding one. He found that it was the law of heredity that in the human race the quantity of variation was two thirds.

Doctor Johannsen said that his investigations were different from those made by Galton. He studied the individual and its many offspring. The conclusion which he makes from his investigations is that the germ cell from which the individual grows is the carrier of heredity.

The science of heredity is not an exact science, according to Doctor Johannsen. The auditorium in which he spoke was filled.
