

BOONE MUST SUPPLY 8 MORE PHYSICIANS

County's Total Quota in Medical Officers' Reserve Corps Is Thirteen.

MEETING IS CALLED Each State Is Requested to Furnish One Out of Every Five Doctors.

Every physician in Boone County has been urged to attend the meeting of the county committee of the medical section, Missouri Committee of National Defense, at 6 o'clock tomorrow night in the Daniel Boone Tavern, to discuss ways of filling the county's quota for the Medical Officers' Reserve Corps. Of Missouri's quota of 895 physicians for the army, this county is supposed to furnish 20 per cent of its medical population of fifty-eight or thirty-seven men. Five physicians hold commissions now, leaving eight to be supplied.

The meeting has been called by Dr. J. E. Thornton, president of the county committee. Dr. J. E. Jordan, secretary, has compiled a large chart, which he will take to the meeting showing the name and qualification of every physician in the county. He will make note of all the physicians who are eligible and who will volunteer for medical service.

Doctor Jordan has received a letter from state headquarters of the committee saying that 20,000 medical men are needed in the army, and that each state is requested to furnish one out of every five physicians. The letter emphasizes the fact that the physicians will be enrolled but that they will not be called out for immediate service. Of the Missouri quota about 700 have enrolled, leaving 200 places to be filled.

The city has eight car loads more promised, three of which are on the way.

The fuel board for the county has been appointed as follows: H. A. Collier, chairman, Lee Walker of Columbia, and R. L. Hope of Centralia. The coal dealers of Centralia will meet Tuesday night to discuss relief measures for Centralia.

Mr. Collier has returned from a meeting in Jefferson City with Wallace Crossley, state fuel administrator, and the representatives of the different railroads.

Help Us Conserve

Do your buying in daylight

The University is shutting off all light and heat at 5 o'clock daily to conserve the small supply of coal available. Friday and Saturday night we closed at 6 but Monday we will have lights and will stay open until 8 o'clock.

If the students will do their trading during daylight we will be able to close at 7 or earlier and thus conserve still further. Will you help us?
