## HUGE WASTE CAUSED BY POOR THRESHING

### Millions of Bushels of Wheat Lost Annually, Says Expert.

## IMPROVEMENT MADE

### Saving Effected by Work of Former Columbia Mail Carrier.

Captain Kenneth D. Hequebourg, head of the Grain Threshing Division of the United States Food Administration, who was in Columbia yesterday to confer with F. B. Mumford in regard to better threshing methods in Missouri, declared that millions of bushels of wheat had been lost every year because of poor or careless threshing.

"But this is being remedied and a great deal of good has been accomplished this year by the threshermen's assistants appointed by the Food Administration to investigate threshers that needed repair," said Captain Hequebourg. "Out-of-repair machines have been put in good condition and wheat that formerly has gone to waste is now being saved."

A "blanket test" for all threshing machines is now being advocated by Captain Hequebourg. By this method the straw is tested for the percentage of wheat contained in it. Where a large percentage of the grain is found the machine is ordered put in good repair. Captain Hequebourg said this test recently showed a new thresher in Oklahoma was wasting 10 per cent of grain because it was running too fast. He declared Missouri has one of the best threshing organizations in the country.

W. E. Powell, former Columbia mail carrier, who was appointed threshermen's assistant for Missouri, has been investigating machines in this state for the last two months. A county agricultural agent in Mississippi County has reported that thousands of bushels of wheat will be saved in that county as a result of Mr. Powell's work among the threshermen. Mr. Powell is now inspecting machines in Iowa.

## EVENING MAIL CASE ONE OF MANY

### Von Bernstorff and Albert Given Free Hand by Germany.

By Associated Press. NEW YORK, July 12.—The trail of German propaganda financed by American money raised in this country from the sale of German war bonds is still one which is long and practically unexplored by American investigators, it was learned authoritatively today.

Count Von Bernstorff and Dr. Heinrich Albert were given carte blanche by the German government, according to evidence today declared to have been unearthed in the New York state attorney general's office. The money alleged to have been used to control the New York Evening Mail is said to be only a small portion of the great sums used by German agents to influence public opinion. Count Von Bernstorff and Doctor Albert are said to have had accounts in sixteen New York banks.

## SUBSTANTIAL GAINS BY FRENCH FORCES

### Pétain Gives Germans Little Rest on Western Side of Marne Salient.

## LONGPONT IS TAKEN

### Progress Made in Process of Straightening Line Between Aisne and Marne.

By Associated Press.

General Pétain is giving the Germans on the western side of the Marne salient little rest in their positions east of the forest of Villers-Cotterets. Last night his troops again drove in on this front with substantial results.

One of the tangible results reported from this latest fight was the capture of the village of Longpont, to the outskirts of which the French had advanced on Wednesday night. The French lines also drove ahead in the Chavigny Farm district, north of Longpont. A forward push was given the line in the area south of Longpont, east of Faverolles.

Further extension of the front under attack to the Faverolles region is noteworthy as showing that the process of straightening out the line between the Aisne and the Marne is being carried still further south through the local salients held by the Germans from Longpont to the American sector at Chateau Thierry.

Last night the activities on the British front were confined to scouting operations, the majority of which were on the Flanders front.
