CLASS DAY OBSERVED

Tree-Planting, Spring Festi- val, Meetings and Lunch- eons on Program.

The University of Missouri today
paid tribute to the class of 1926.

The members of the graduating
class assembled, in cap and gown, in
Academic Hall and from there pro-
ceeded in a procession to the Columns
where Miss Zella Edwards, represen-
tative of the senior women spoke. Miss
Elizabeth Bruce of the School of
Journalism reviewed the history of
the class.

The procession was led by Arthur
O. Kircher, president of the class, to
the south side of Academic Hall where
the oak tree planting ceremony was
performed. J. T. Hunt, of the Col-
lege of Arts and Science spoke briefly
of the oak trees as a symbol and
compared the growth of the oak to the
efforts for progress of each member
of the class.

Miss Mary Foster Payne, chosen
queen of the spring festival by the
women of the University, was crown-
ed this afternoon by Miss Nita Col-
lier, president of University women.

Music accompanied each scene of
the festival. After the crowning cere-
mony the junior attendants robed the
seniors whom they accompanied. Each
senior girl marched with her chosen
junior attendant in the procession.

How Much Is a Shoe Worth If It Doesn't Fit?

In addition to being painful, shoes that don't
fit wear out quicker.

When you buy ill-fitting shoes—you are do-
ing yourself or child a great injustice.

Our salespeople have been trained to under-
stand feet so they fit shoes properly. Our aim
is to render real service to our customers and
sell you shoes that give satisfaction.

We have a Foot Expert who has been trained
in the Wizard System of Foot Correction.

He will relieve your foot troubles. He uses

Wizard

foot appliances in all his corrective work.
They make shoes last longer.

No More Worries Over Excessive Coal Bills

It is not generally known that even the
small coal consumer can have his coal
shipped direct from the mines, thus sav-
ing the profits that otherwise would go to
wholesaler and retail dealer, besides sav-
ing hauling expense. Of course, big man-
ufacturers and other large consumers have
always bought this way, but the man who
buys only enough for his household is
now in position to take advantage of the
same purchasing privileges. The well-
known BERNICE COAL CO., 553 Combs
Building, Chicago, is doing an enormous
business in supplying small consumers—as
well as the big ones—with all grades of
hard and soft coal at mine prices.
That these customers are highly pleased is
evidence by the letters they write after
receiving and trying their coal. The fol-
lowing are extracts from several such let-
ters: "Have found your coal entirely satis-
factory and your dealings courteous and
fair. I shall continue to buy my coal from
you."—Ed. G. Gereka, Burlington, Ia.
"More than pleased with it. Please quote
me prices on same coal for December."—
Arthur Churchman, Alexandria, Ind. "Well
pleased with it. Expect to buy more from
you."—Fritz Bros., Pompell, Mich. "Coal
arrived on time; has given entire satisfac-
tion; am exceedingly well pleased. Wish
to thank you for your courteous treatment
in our dealings."—M. R. Ford, Franklin,
Ky.

Come to our Store and see an Exact Duplicate of the Official Laboratory Model used in 4,000 Tone-Tests

We guarantee that this phonograph in
our store will sustain any and all of
the amazing tone-tests described at
length by the music-critics and review-
ers of America's principal newspapers.
We guarantee this in writing, if you
wish. Come in. Ask to see the Offi-
cial Laboratory Model. Ask to hear
the Realism Test.

WHAT A "TONE-TEST" IS

In the book, "Edison and Music,"
written by one of Thomas A. Edison's
righthand men, you will find the fol-
lowing description of the tone-test:

"An artist stands beside the New Edi-
son and sings—or plays. Suddenly,
and without warning, the artist ceases
and the New Edison continues alone.
The test is whether the audience, with
eyes closed, can tell when the living
artist has ceased to sing—or to play.
Where practicable, the lights are
turned off suddenly and the artist
steals from the stage, leaving the New
Edison to perform its miraculous feat
of RE-CREATING the singer's voice—or
instrumentalist's performance—with
such perfect realism that the audience
is not aware of the artist's departure
until the lights are turned on."

The NEW EDISON

"The Phonograph with a Soul"

Let the talking-machines vie with one
another in glittering generalities, Edi-
son deals with facts alone:

1. The New Edison has sustained
4000 "Tone-Tests."
2. 50 different artists (both vocalists
and instrumentalists) made these
tests.
3. 4000 different New Edisons (all
Laboratory Models out of regular
stock) were used in the tests.
4. 3 million people heard these tests.

5. 500 of America's leading news-
papers published the results.
 6. Everyone has admitted that the
human ear cannot distinguish be-
tween an artist's voice and the
New Edison's RE-CREATION of
such voice.
- You have something mighty tangible
in this proof by the New Edison.
When 3 million people hear, consider
and agree, you have a fact as firmly
established as any scientific law.

You will be interested to know that we have a plan whereby
you can arrange your own payments for your New Edison.
