How About the Other Half?

It is generally admitted that half of a college education is gained outside the class room. Certainly, it is true in every life that a man's leisure hours are the ones that count most in success or failure.

President Harper of the University of Chicago said: "College men receive as much benefit from fellow students as from officers of instruction. The Reynolds Club (Chicago's Union Building) is the headquarters of student life and activity. Here friendships are cemented, battles fought, victories gained, and defeats and disappointments manfully accepted. It is impossible to overestimate the importance or significance of this addition to the university life."

The far-reaching results which President Harper credits to the Reynolds Club at Chicago have been equally manifest at other institutions. The Union buildings at Michigan, Purdue, Iowa, Ohio, Pennsylvania, Dartmouth, and scores of other schools have been equally beneficial.

Let us provide for the means for Missouri students to develop the other side of college education, by erecting the

Over there, in his captain's uniform, he had been her beau ideal of a man. Over here, in his butler's garb or his noisy "hand-me-downs"—well this snobbish little aristocrat hadn't planned for that!

But he was her husband, married in France. And fighting Sam McGinnis made her fit to be called his wife in America. Also
