Guiteau's Bones.

The Washington *Star* gives the following particulars of the final disposition that has been made of the bones of the assassin of President Garfield:
"When the body was removed from the jail to the Army Medical museum on the night of July 3, it was at once taken from the coffin, stripped of its clothing and placed in a vat or barrel of alcohol. Owing to the fact that the furnaces were being repaired, it was allowed to remain here some four or five days. Then Dr. Schaffert used the 'rapid maceration process'—the parts in glass jars having artificial heat applied at less than the boiling point for about 60 hours which requires constant attention, but which prepares the bone to be taken out perfectly clean, when nothing else is required, but to treat them with sulphuric ether to take out what grease may remain in them. Much of the work on them was done at night, and in ten days they were ready for articulation, all the work having been done by Dr. Schaffert alone. He declined proffered assistance. When the skull had been cleaned and when it was dry, it was given to Mr. Flinn the custodian and cranecologist of the museum, who made the measurements of angles and depressions. It was then passed to Dr. Lamb, who had it in his possession for two weeks. With this exception none of the bones have been out of the custody of Dr. Schaffert since he took charge of them. They are perfectly white and have been prepared in the highest style of art, and as soon as they have been formerly passed into the museum will be articulated.

FINAL DEPOSITION.
"Dr. Hicks still holds the remains, not only under the will, but by virtue of the oral gift of them by Guiteau by the consent of his brother and sister. There is but little doubt that Dr. Hicks will eventually formally present them to the surgeon general of the army, for the museum. Of course it would be preferable that Dr. Hicks should, as the executor of the paper purporting to be the will of Guiteau present them in that capacity; but if Mr. Reed should refuse to swear that Guiteau was of sound and disposing mind, capable of making a valid deed or instrument, the paper cannot be regarded as a lawful will. Having it, however in his possession, he has nine points of the law in his favor, and the verbal gift of the prisoner, with the consent of his representatives, will doubtless make up the other point."

Lincoln as a Whisky Seller.
(Cincinnati Commercial).
Concerning the statement made in yesterday's paper, that not only William Penn, but Abraham Lincoln, sold whisky, the fact as to Lincoln is that when he was a young man he kept a "grocery" at New Salem, Ill., and had a partner named Berry. It is not questionable that a part of the stock in trade was whisky. It is denied strenuously that Lincoln sold the whisky by the drink. It was certainly sold in quantities to suit the purchasers. Whether it was drunk on the premises, we presume, depended on the custom of the country. One custom to which no doubt the firm of Lincoln & Berry conformed was to give persons who patronized the store a dram. We should not have thought of referring to this if it had not been for the attack upon the memory of William Penn as a man who sold rum to the Indians. Stephen A. Douglass once referred to Lincoln as a keeper of a grog-shop, and Lincoln's reply was that when he practiced at the whisky bar Douglass was, as usual, on the other side, and, perhaps, drank quite as much as he sold. It didn't seem that the Little Giant had much the best of this.

A Huntsville, Alabama, special under date of November 2nd say:
Dick Little, on trial several days for conspiracy, in being connected with the robbery of Alexander Smith, at Mussel Shoals, Ala., was found guilty to-day. Little had proved that he was in Kentucky at the time of the robbery, which he says was committed by Frank and Jesse James and Bill Ryan, who were hiding from the officers; that he did not know of the intention to commit robbery. He admitted that he, at other times and places, had robbed with the gang. The verdict is a peculiar one. It recites the belief in accordance with what Little testified, but says he is guilty of conspiracy nevertheless, which conclusion they reached by the judge's charge which the said actual participation in or knowledge of it was intended, or sufficient proof of the conspiracy of which the prisoner was guilty as a participant. The jury signed a petition for executive clemency.

An Ancient Mining Town.

From the Virginia City (Nev.) Enterprise.
Some twenty-three years ago a Texan, who came through to California by way of Mexico, informed the writer that in the Guadalupe mountains the guide of their train, an old trapper and preacher, took him to the ruined town where there were silver mines. They traveled several miles from the wagon road into the mountains, and came to a place where there was a tunnel on a ridge, with many rootless stone buildings—some of them very large—in a valley below. The country was then full of Indians, and the two men were frightened away a few minutes after reaching the tunnel, but our Texan carried with him a piece of rock from the dump, which upon the arrival in Mexico experts pronounced rich silver ore. When silver was struck in the Comstock our Texan, who was then in Omega, Nevada county, Cal., was hot to go to the Guadalupe mountains. An effort was made to fit out an expedition, but those enlisted deserted and came to Cemstock. We are reminded of all this by the following dispatch, dated Austin, Tex., Oct. 11: "The adjutant-general has just come back from a trip along the front. He reports rich deposits of gold, silver and copper in the vicinity of Guadalupe and the Waco mountains. Extensive rich deposits of gold and silver were discovered near Carizza. Soon we may expect to hear of the re-discovery of that old town and its mines and furnaces. They must now be close upon it."

Alive in Her Shroud.

From the Ft. Wayne Gazette.
On Tuesday afternoon last Mrs. W. L. Pettit, wife of the teller of the First National Bank of Ft. Wayne, apparently died, and the undertaker took charge of the body. Arrangements were making for the funeral and watchers sitting up with the supposed corpse. At ten o'clock at night a faint sigh was heard coming from the body. The watchers started to their feet with alarm, stepped to her side, found her eyes wide open, while a voice that was scarcely an audible whisper she recognized them and asked for her husband. For a moment the attendants were speechless with wonder at this resurrection of the dead; then with the revulsion of feeling, they almost screamed with excitement. The husband came in haste, and with joy unspeakable clasped again his living wife in his arms. The doctor was sent for, and he was as much astonished as the rest of the household at beholding living what in his exact medical science he had declared dead. He administered proper restoratives and the patient rapidly recovered and was declared at a late hour to be in a more hopeful condition than ever.

Flagged by a Lady.

At Glendale Station, on the Missouri Pacific railway, Mrs. Joseph Riley, by most remarkable presence of mind averted, what would doubtless have proved an appalling catastrophe. It is customary for the east-bound Washington accommodation train and west-bound Sedalia accommodation or local passenger train to meet at Kirkwood. The Washington train arrived at Kirkwood on time. It waited some minutes for the Sedalia to pass as usual, and then proceeded towards St. Louis at the rate of 40 miles an hour. In the meantime the Sedalia train was dashing west with equal speed on the same track, and both trains came thundering around the curve at Glendale simultaneously. Neither of the engineers apprehended any danger, the view being obstructed by the surroundings. Mrs. Riley, at a point midway between the trains, saw the engines and coaches heavily laden with passengers bearing in down upon each other, and with wonderful forethought ran to the track, waved a white handkerchief and then hurried away. Fortunately both engineers saw the signal and stopped the locomotive pilots within two hundred feet of each other.
