

Improve Your Soil

AND INCREASE THE YIELD

By using BLOOD and BONE FERTILIZERS. They contain the plant food necessary to promote an early rapid growth and hasten maturity of your grain. For increasing the yield and quality of wheat, there is nothing better than—

PURE BONE MEAL.

The results are early maturity, full head, and plump grain.

Every dollar expended for fertilizers will add four to your bank account. If you are in doubt about the quality, read page 129, Bulletin 122, issued by Missouri Agricultural Experiment Station. For the "Land's sake" place your orders early and be assured of your requirements when needed.
