The Red Men have no fraternal insurance features, but the members receive a sick and accident benefit, they bury their dead and care for their orphans and widows.

## Seymour's Great Band.

Chas. P. Seymour, conductor of the great Seymour band has become a popular favorite here.

Mr. Seymour has played several engagements in the Cape, and each time his fine music has given general satisfaction. His last visit here was with the Elks during their State Convention, and before going home, Mr. Seymour and his boys expressed a wish to return soon.

## The Princess.

The coolest place during the warmest weather is the Princess Theatre, on Main street. Managers Cowan and Strain have added a dozen more large fans to give ample comfort to their many patrons during this extreme hot weather. Every Thursday night a special feature picture will be shown, and it is well for the theatre going public to remember this night.

Next Thursday "The Little Minister" one of the strongest features in three reels will be presented here for the first time. It is a beautiful and interesting story of a Lord and the Little Minister falling in love with a little gypsy girl, who after a series of adventures and experiences marries the minister. This picture is pronounced as one of the Vitagraphs extraordinary features.

## Commercial Club Banquet.

The Cape Girardeau Commercial Club will give a banquet tonight at the Elks Cafe, in the Elks building.

Plates will be laid for 150 guests, and the menu will be prepared under the personal supervision of Mr. A. Mueller, manager of the Elks Cafe, whose long experience in this work is a guarantee to please the most fastidious.

Mr. Mueller came here recently from Chicago to manage this cafe, and during his stay has made many friends. His cafe is first-class in every respect, and the manner in which he accommodated the large crowd during the Elks convention gives credit to his management.

The Knights of Columbus have just completed arrangements with Mr. Mueller to serve their banquet next Sunday night for one hundred and fifty members. Music and speaking will follow.

## King Goes Up In Airship.

Rome, June 6.—King Victor Emmanuel and his principal aide-camp, Gen Ugo Brusati, today made a flight in a military dirigible balloon at the army flying ground at Bracciano, about 20 miles from the city.

## Mid-Summer Wearables.

The mid-summer stock of men's fancy wearables have been received and are now on sale at Garrett Glenn's "Men's Shop" on Main street.

This selection is undoubtedly the finest that has ever been displayed and offered for sale in this city. No matter how keen the eye may be for color harmony, or how fastidious the taste in harmonious dress, their selection cannot fail to appeal to you.

There is a class and a standard of quality to these goods which characterize the store selling them as a first-class house. They win a prestige, the value of which cannot be at all over-estimated, and popular prices still prevail.

## A Swarm of Bees Captured.

A noise sounding like the beating of a drum, caused a hundred people to gather around the north side of the St. Charles hotel last Sunday morning to witness the capture of a large swarm of bees.

Charles Hitt and Charles Freeman were strolling on the river front when their attention was called to the bees flying south. Freeman secured a metal tray and began beating a tune which equalled the work of Seymour's crack drummer. It required but a few minutes to land the queen bee under the automobile of Ben Vinyard; then the march started up the street, bees and a large crowd of people following.

A large box had been secured and after two hours hard work the honey makers were safely stored away. It is estimated that over ten thousand bees were captured, and Mr. Freeman says he will have enough honey this winter for all the buckwheat cake eaters who will visit the Crescent restaurant.

## Missouri State Normal School.

The Missouri State Normal school at Cape Girardeau is closing its most prosperous and successful year. The enrollment has shown an increase of 25 per cent in the past two years and over 15 per cent the past year. The total enrollment of the year is 1153, the largest in the history of this school.

On June 9th the Summer school will open and it promises to be large. Indications point to a good representation from practically all counties of the district. The student body will be composed of successful and progressive teachers who wish to better fit themselves for their work and of many other students who will take advantage of this opportunity to prepare for more efficient service.

President W. S. Dearmont, in a letter to the editor of the Herald says:

"Much of the credit to the growth and prosperity of the Southeast Missouri Normal school we feel is due to you and other editors of the district and I wish to thank you personally for the many courtesies you have extended us."

## Negro Convict Escapes.

Jefferson City, June 6.—While assisting a number of other convicts laying a water main in the Governor's mansion, George Clemens, a colored trusty convict slipped away from the guard, discarded his suit of stripes and donned a new suit of Governor Major, hid until nightfall, and then escaped.

Gov. Hadley lost a dress suit in the same manner during his term of office.

### Fighting Insect Pests.

Following a rather open winter it is probable that insects may prove troublesome in the home garden and in truck patches. The following list of standard formulas, as recommended by various agricultural experiment stations, is sent out by the Missouri State Board of Agriculture, Columbia, Mo.

**Kerosene Emulsion**—Kerosene (coal oil), 2 gallons; rain water, 1 gallon; soap ½ pound. Boil the soap in water until dissolved. While the mixture is boiling hot, turn it into the kerosene, stir for about five minutes and until it is of a smooth, creamy nature. Before using dilute with nine times its measure of water. Three gallons of emulsion will make thirty gallons of wash.

**Soap Wash**—concentrated potash lye, ¾ pound; water 7½ gallons; fish oil, 1 gallon. Dilute the lye in water, half. To the boiling solution add the fish oil. Continue to boil for two hours and then allow to cool.

**Carbolic Acid Emulsion**—Carbolic acid, 1 pint; hard soap, 1 pound; water, 1 gallon. Dissolve the soap in the boiling water and while boiling add the acid and continue the boiling for a few minutes, stirring thoroughly. Put the emulsion away in a tightly closed vessel and label, "Stock Solution of Carbolic Acid—Poison." Before using, dilute one part of the stock solution with fifty parts of water.

**Carbolized Plaster**—Carbolic acid, 1 pint; air slaked lime, road dust, or some other diluting medium, 50 pounds. Sprinkle or dust on the plant in the dry state.

**Tobacco Spray**—Hard soap, 1 pound; water 8 to 10 gallons; strong tobacco extract, gallon. Dissolve the soap in boiling water; add the decoction and then make up 8 to 10 gallons.

**White Hellebore**—This is a powder which may be obtained at any drug store. The powder may be used dry or with water. Where water is used, 1 ounce to 2 gallons of warm water is the proper proportion.

**Pyrethrum or Insect Powder**—This powder is also called Dalmatian Insect Powder and Persian Insect Powder. Like Hellebore, it is obtained from plants. To be effective, the powder must be fresh. Where used in the liquid form, use 1 ounce to 3 gallons of water. In the dry form use 1 ounce to 5 ounces of cheap flour. Mix thoroughly, allowing it to stand over night in a closed tin box, then dust on the plants through a cheese cloth.
