McClure's for July.

Miss Tarbell's character sketch of John D. Rockefeller, the first utterance on his personality by the historian of standard oil, leads McClure's for July. It is a recital of marvellous interest telling for the first time the astonishing story of the things that have gone to make Rockefeller what he is. Lincoln Steffens has reconnoitered Ohio and tells in "Ohio: A Tale of Two Cities" the inspiring story of "the best governed city in the United States." Another article of hopeful tone is the second half of Henry Beach Needham's "College Athlete," which has created so much stir in undergraduate athletics. He makes further disclosures of rottenness in college sport; but there is a remedy, and he points it out. As always in this magazine the articles take a strong grip on the affairs of the day. The fiction for July is clean, vigorous and entertaining. Sewell Ford and Richard Washburn Child have powerful stories illustrated in tint. There is a blood-curdling tale of adventure in Borneo by Henry C. Rowland, a Christian Science story that would wring a smile from an idol, and two charming little bits of the "old, old story" in a new guise; among the picture features are the latest portraits of the president and his family, reproduced full page size in the tints of the photographer's proofs.
