**Do You Make a Profit In Buying, As Well As In Selling?**

MANY men seem to think they can make money only by selling something— they don't seem to realize there's such a thing as making a profit in buying.

The shrewd buyer makes money just as surely as the shrewd seller.

When you buy lumber, go after the top market value— get the best lumber you can for your money— that's buying lumber at a profit.

The Best Value in Lumber in the Market Today, High Quality and Low Price Considered, is

**ESTIMATING COST OF ROADS**

Much Depends on Type of Construction and Amount of Grading to Be Done—Some Figures.

The cost of a road is dependent upon not only the type of construction but the amount and character of grading to be done, the cost of labor and materials, the width and thickness of surfacing, the character and amount of drainage required, and other factors of equal variability. Based upon general averages, it has been ascertained by highway specialists of the department that under average conditions macadam roads can be built in southern states at from \$4,000 to \$5,000 per mile, gravel roads at from \$1,500 to \$2,500 per mile, and sand-clay and topsoil roads at from \$800 to \$1,500 per mile.

In New England and the other eastern states macadam roads are reported at from \$6,000 to \$9,000 per mile, gravel roads at from \$3,200 to \$5,000, and bituminous macadam from \$8,000

Good Road Along Pacific Coast.

to \$13,000, according to the character of construction, whether surface treated, penetration or mixing method. The bituminous type is quite general in the eastern states.

As indicating costs in other sections of country, the state highway commissioner of Michigan reported that in 1913 the average cost for macadam roads was \$4,300 per mile, clay-gravel roads \$1,500 per mile, and concrete roads about \$10,000 per mile. The average cost of state highways constructed in Ohio two years ago was \$9,883. According to types, in 1912 the brick-paved highways averaged \$14,650 per mile and the macadam highways \$5,950.

In California the first 356 miles of the state system of highways cost an average of \$8,143 per mile and consisted principally of thin concrete with a thin coat of bitumen. The maximum and minimum figures given are not absolute, but are intended to present the usual range of costs. The rates given include grading, drainage, surfacing and engineering costs.

**Pascola-Hayti Ball Game.**

On Sunday, May 14, the Hayti base ball team played their first game. Line up as follows:

Harry Gettings	3rd b
Eddie Juden	ss
Elmer Wilbanks	p
Frank Estes	cf
Hicks	c
Jack Wilbanks (Big Boy)	2nd b
Bates	lf
Chas. Foley	Pinch hitter

When Hayti boys walked out on the field the Pascola boys nearly had a fit; must have been on account of our big second baseman.

Pascola played a good game. Up to the seventh inning the score was 3-2 in favor of Hayti. The first man up in the seventh inning hit a home run over right field. From then on, Pascola kept gaining until they had run in eight scores.

Hayti boys put up a stiff fight till the last. Gettings starred on third base. Wilbanks pitched a star game clear through. Belton, coaching on first base, gave Gettings and Juden "the hip to the dodge" and worked a double steal as Wilbanks struck out. Pinch Hitter Foley took three over and walked to the water bucket. Several Hayti men got some good hits—Estes got a three-bagger; Juden got three assists and one pop fly with an error.

All Hayti boys report they had a nice time, although beaten to the tune of 8-3.

Electric lights were installed on school house steeple Tuesday evening.

**FALSTAFF**

"The choicest product of the brewer's art"

—for its perfect character has lifted it far above the level of the ordinary beer; to the very highest place in public appreciation.

Its flavor—so exceptionally fine; its color—so beautifully clear; its character—so perfectly balanced—proves the seventy-five years' brewing experience that has gone into its making.

Beer is a food. Bread and beer are made of the same materials, cereals, yeast and water. Bread is solid, beer is liquid—both are highly nourishing. Physicians prescribe beer to produce energy, build tissue and strengthen nerves.
