Hart, her husband, dated the 7th day of August, 1903, and recorded in book 46 at page 200, one of the land records of Bollinger county, Missouri, made to secure the payment of one certain promissory note therein described, which note is past due and unpaid; I, the undersigned trustee of said deed of trust, at the request of the legal holder of said note, will on

All of the southwest quarter of the northwest quarter of section twenty-seven (27), in township twenty-nine (29), north of range ten (10) east, containing forty (40) acres.

**MOTHERS**

Should be always on the watch for symptoms of worms in their children. These pests undermine strength and vitality. A child with worms is pale, sickly and cross, has dark rings under the eyes, bad breath, starts in the sleep. **WHITER CREAM VERMIFUGE** destroys worms and intestinal parasites of all kinds. A few days use produces a wonderful improvement. The pale, sickly child is transformed into a rosy, vigorous cherub, full of vim and activity.

When the bones ache and the joints are inflamed, with much tenderness at the affected parts, you need a powerful penetrating agent to overcome the attack.

**BALLARD'S  
SNOW LINIMENT**

IS A PAIN RELIEF OF GREAT EFFICACY.

Its wonderful penetrating power affords a most gratifying sense of relief to the afflicted. It eases pain quickly, subdues all inflammatory conditions and rapidly restores strength and comfort in the aching joints. It is equally effective in relieving neuralgia and sciatica. Rub it in well, gently but thoroughly; its healing and strengthening influence is manifest as soon as it reaches the nerves at the seat of the disturbance. A few applications controls the disorder and restores normal conditions. As a household remedy for curing cuts, wounds, burns, sores or the hundred and one accidents that are always occurring to the flesh, it has no superior.

Put Up in Three Sizes, 25c, 50c and \$1.00 per Bottle.

**FARM FURROWS**

Turned by a Practical Farmer for The Farmer and Stockman.

It is not always the neatest plowman who does the best job. It is a little harder on the horses to just turn the furrows on edge in a rough looking mass, but the soil can be tilled better and there is less soil washing because the ground will hold more rain. Try it and be convinced.

Cheese factories have rather hard sledding of it in my neighborhood. All the farmers are waking up to the value of skim milk in raising young stock, and the cheese makers, acting on some emphatic hints received, are converting their establishments into creameries. Yet, no separator agents have objected to this movement.

Scarcely a week ago my newest neighbor bought a fine team, of which he was very proud. Last Sunday one of the horses came stumbling in from the pasture so badly cut by barb wires that it bled to death in a few minutes. And still people will not put up woven-wire fences for their horses.

It seems that agents have never been thicker than this summer. Now, while some of the gentry may be all right, I object to have some oiled-tongued fellow come out to the field where I am working and try to argue lightning rods or pain killer when I am concerned about getting some important work done in a hurry.

One of the joys of life is trying to build a solid concrete silo when the nearest gravel bed is a dozen miles away and good crushed stone cannot be had. It's a nice little job to sandwich between our other work, but we are doing it. No more short feed for our cattle if we can help it. Last summer taught us a lesson.

This spring a couple of people were inclined to laugh at the owner of a fine corn bottom who went over his land again and again with the harrow before planting time, making the entire ten acres as fine as a garden. But this fall this same man has the best piece of corn in the entire neighborhood. Another strikeout for good tillage.

Soon will the phonographs be grinding out campaign speeches again. I move that all the candidates do their campaigning by making phonograph records, then, when the "dear pee-pul" get sick of the business they can easily "break the record." This is a reform worth working for.

If it were not for corn fodder I don't know what some of us would do for roughness for our stock this winter. This gives little relief for the city consumer of roughness, however, for corn fodder is a product of the farm that cannot very well be shipped. A few years ago shredding and baling was tried, but it was found that shredded fodder in bales spoiled quickly in damp weather. Corn fodder has to be fed out on or near the farm that produced it, and I am not sure but what this is a wise provision of nature. We sell too much of the grain, and should we get into the habit of selling the fodder, too, our farms would soon be sold in that form.
