## Southeast News.

**Jackson Items.**  
A sudden death occurred Tuesday shortly after noon when Julius Macke, a prominent farmer of Huble township, who lived a few miles west of Gordonville dropped dead in the field where he was engaged in plowing.

**Jackson Items.**  
There will be a Cape fair this fall after all. After the fair directors had become discouraged, the Commercial club got behind the proposition and an agreement was reached with the board of directors whereby the annual fall exhibition is to be given and the club will shoulder any possible deficit up to \$1500. The fair would have to strike an exceptionally tough streak of luck to result in the creation of such a deficit.

**Jackson Cash-Book.**  
It is reported that Thomas Taggart, owner of the famous French Lick health resort in Indiana, was at Schumer Springs recently looking at the place with a view of buying it. Taggart is a democratic politician of national note. A republican paper observes that if Taggart buys the place he will make it a mecca for democrat politicians to meet and fix up political deals. As is well known, Taggart's Indiana resort is famous for liquid "refreshments" and gambling. If he takes over Schumer Springs and makes it a Missouri French Lick resort the democrats may journey there to play politics and the republicans to get liquid "refreshments" and play something else besides politics.

## April is War Month of United States.

The Atlantic fleet arrived at Tampa April 21. This was the sixteenth anniversary of the declaration of war between the United States and Spain.

The resolution declaring war with Spain was adopted April 25, but was dated April 21 because it was on that date President McKinley's ultimatum to Spain was rejected.

The Revolutionary war began April 19, the Mexican war April 24 and the Civil war April 14. Now comes trouble with Mexico

in April. For the latest developments and pictures of scenes in the Mexican war crisis see other pages of this week's Press.

## Obituary

Gilbert Johnson Green departed this life at the home of his father, George Green, April 6, 1914, aged 19 years, 6 months and 6 days.

He leaves a father, step-mother, two brothers, two sisters and many other relatives and friends to mourn his departure.

He united with the Little White-water Baptist church at the age of 16 years and lived a faithful, Christian life to the end.

Weep not, dear friends as those who have no hope, for our brother has gone to that home not built by hands. Let us so live that we may meet him beyond this world of trouble and sorrow.

He is not dead, but sleeping and awaiting the resurrection morn.

The funeral services were conducted by the writer, after which the remains were laid to rest in the Pulliam cemetery.

REV. P. M. ROBINS

## Attention, Apple Growers

Apple scab took the fruit off clean from thousands of acres of apple trees in the year 1912. Hundreds of orchards of forty acres and more stood without a single apple or leaf for that matter at picking time because of the attacks of this fungus.

Weather conditions are exactly favorable for its growth again this spring. Get in right now, before full bloom, and put on lime-sulphur at the rate of one gallon to twenty-five gallons of water, if you want to harvest this year's crop yourself. Spray same strength again when the bloom starts to fall, but add four pounds of arsenate of lead to each hundred gallons. Finish before bloom end closes.

Bad weather is bad enough, sometimes, but blame yourself and not dry weather if you fail to get fruit this year. Wire or write this office for further information.

JOHN BLAND, Secretary.

State Board of Horticulture.

## Directions For Spraying Peach Trees

(By W. L. HOWARD.)  
The Missouri College of Agriculture advises the following system of spraying peaches:

**First Spraying:** A few days after the blooming period, when the calyx tube or "shuck" is just dropping off from the little peaches, spray with arsenate of lead paste 2 lbs., lime 4 lbs., water 50 gallons. (Slack the lime, mix the arsenate with water and pour in, then add water to make 50 gallons.)

**Second Spraying:** Three weeks after the first application, use arsenate of lead paste 1 1/2 lbs., the Scott self-boiled lime sulphur 8-8-50. This kind of lime sulphur cannot be bought, so it must be made at home. Slack 8 lbs. of lime in a box or large vessel. When it begins to simmer from its own heat, stir in 8 lbs. of fine sulphur. Stop the simmering or boiling at the end of eight or ten minutes by pouring on cold water. Strain the mixture into a barrel and add water to bring up to 50 gallons. Peaches are sprayed in order to

prevent the brown rot which destroys the fruit near ripening time. To aid in preventing the rot, it is necessary to poison the curculio insect which is responsible for spreading the disease.

Sometimes a third application will be necessary. This should be made one month before the fruit is ripe with self-boiled lime sulphur 8-8-50. It is not necessary to add any poison. The commercial lime sulphur, even when greatly diluted, is not safe for spraying peaches, as it is liable to cause injury to both fruit and foliage.

**Spraying Outfits:** A barrel sprayer will spray from five to ten acres of orchard and costs, complete, from \$12 to \$30. A bucket sprayer is useful for whitewashing or spraying a dozen trees or less; costs \$3.50 to \$8. The small hand compressed air and knapsack outfits are used for spraying potatoes, nursery trees, berries and vineyards. They cost from \$5 to \$15. All sprayers should have brass working parts which are not injured by acids.

Further information may be had by writing to the Missouri Agricultural college, Columbia, Missouri.
