Leland James and Hiram Slinkard of Zalma were in town Saturday.

C. L. Bollinger and wife, Arthur Whitener and wife and Dan Fish and family were the guests of Henry James Sunday.

Chas. O. Hobbs, Lyman T. and John Kinder of Lutesville motored over here Sunday.

Otto Burk of Buchanan visited Hobart James Saturday evening while at this place.

A fire broke out in Hobbs' furniture store Sunday night but not much damage was done.

The town voted on a new fire de-

Prince Albert gives smokers such delight, because

- its flavor is so different and so delightfully good;
- it can't bite your tongue;
- it can't parch your throat;
- you can smoke it as long and as hard as you like without any comeback but real tobacco happiness!

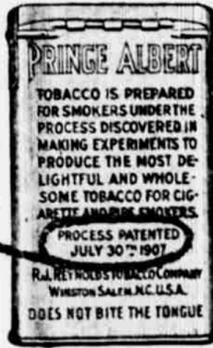

On the reverse side of every Prince Albert package you will read:

PROCESS PATENTED JULY 30th, 1907

That means to you a lot of tobacco enjoyment. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

PRINCE ALBERT
the national joy smoke

Copyright 1916 by R. J. Reynolds Tobacco Co.

This is the reverse side of the Prince Albert tin. Read this "Patented Process" message to you and realize what it means in making Prince Albert so much to your liking.

in goodness and in pipe satisfaction is all we or its enthusiastic friends ever claimed for it!

It answers every smoke desire you or any other man ever had! It is so cool and fragrant and appealing to your smokeappetite that you will get chummy with it in a mighty short time!

Will you invest 5c or 10c to prove out our say-so on the national joy smoke?

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

partment which is needed very much at this place. LONESOME

Rockport, Ill.

Well, as we haven't seen any news from Rockport we will try our hand.

Health is good, except a few cases of smallpox.

The farmers are busy sowing oats. They are rather late on account of high water.

Dr. and Mrs. Burton of Lowndes and Grover Myers of Buchanan visited J. W. Hammock and family this week. They also attended the Fox Hunters' association.

J. W. Hammock made a business trip to Pittsfield Wednesday.

Dr. Goodwin of Pleasant Hill, Ill., motored down to J. W. Hammock's Saturday.

Mr. and Mrs. W. E. Hammock visited Cliff Ferguson at Atlas, Ill., Sunday afternoon.

Quite a number of our people attended church Sunday night.

Will Allen and family visited Willie Ralph and family Sunday.

Mrs. Sweetman and Mrs. Hammock were the guests of Mrs. Willie Ralph Sunday afternoon.

Come on Brush Creek with your news.

WINTER BLOSSOMS.

Stanfill

Corn planting is the order of the day.

Roy Smith and Roy Denman attended the basket dinner at Rhodes chapel Sunday.

Mr. and Mrs. Tony Smith visited Mr. and Mrs. Charley Smith Saturday night.

Miss Carrie Smith and W. S. Limbaugh spent Sunday with their friend, Miss Kathleen Smith.

Will Green visits on the hill quite often. What is the attraction Will?

John Stanfill is still going out the road. Johnnie surely means business.

Roy Denman visited Mr. and Mrs. Charley Smith Saturday night.

Mr. and Mrs. Walter Green were in Patton Saturday.

Rev. John Starkey preached at Pleasant Valley Sunday.

Our merchant, W. G. Stanfill is doing a good business.

Misses Laura and Willie Henson attended church at Patton Sunday.

Homer Henson is working for F. Robinson this summer.

Mrs. Frank Heitman and daughter

were at Patton one day this week. BLUE EYES

Congressman Hensley Announces.

We learn from the papers in the 13th Congressional district that Hon. Walter L. Hensley has again announced as a candidate for congress in the democratic primary. For a time it was thought that he was considering the propriety of voluntarily retiring from politics and again taking up the practice of his profession as a lawyer.

Congressman Hensley is a citizen of high standing, an able lawyer, a man of unquestioned honesty and sincerity, and has made the 13th district a good representative in congress. He stands very high in the house of representatives, and although he is now only serving his third term he is a member of the Naval committee, one of the most important in the house, and stands high with his associates on the committee, as well as with the entire membership of the house.

Champ Clark recently made a speech in Washington in which he stated that districts that have faithful and able representatives in congress make a great mistake in not keeping them there for long terms, as the longer they remain in congress, the more influence they exert and the better service they can render to their constituents.

Mr. Hensley is now in better position to be of service to his district than any new man would be, and the people of that district will doubtless continue him in congress. —Jackson Cash-Book.

Hog Raisers, Here is Something Interesting

Here is the hog cholera law: You must not let cholera hogs run out on public highway nor drive them along the public road; you must put up yellow flags at your gates where hogs are sick. You must burn hogs that die on your premises within 24 hours after they die. Mind you, the law says burn and not bury the hogs. And you must not drive cholera hogs on another man's land. If you are reported to the state veterinarian for violating this law, he will prosecute you. Better cut out these provisions and paste in your scrap book, as you will not make any mistake. Please remember or you may get fined! Beside, somebody who loses a lot of hogs may sue you for damage. Other papers please copy. Let's stamp out hog cholera.—Ex.

Send Them to Bed With a Kiss

O, mother, so weary, discouraged, Worn out with the cares of the day, You often grow cross and impatient, Complain of the noise of the play, For the day brings so many vexations, So many things going amiss; But, mother, whatever may vex you, Send the children to bed with a kiss.

The dear little feet wander often, Perhaps from the pathway of right; The dear little hands find new mischief To try you from morning till night. But think of the desolate mothers, Who'd give all the world for your bliss, And, as thanks for your infinite blessings, Send the children to bed with a kiss.

For some day their noise will not vex you; The silence will hurt you far more; You will long for the sweet children's tones, For a sweet childish face at the door; And to press a child's face to your breast, You'd give all the world just for that, For the comfort 'twill bring you in sorrow.

Send the children to bed with a kiss —Charlotte Daily New Idea.

How to Prepare Cow's Milk For the Baby

In this country cow's milk is practically entirely used as a substitute for mother's milk. Its composition is the same so far as the ingredients go, but they vary greatly in quantity and in their behavior.

All milks contain the three food principles which are required: (1) Protein, (2) sugar, (3) fat. In cow's milk these are so proportioned and mixed as to be suitable for a calf but not for a baby.

The protein is the part which forms the curd. As soon as cow's milk reaches the stomach, the protein is precipitated in heavy and solid curds which are so well known. Mother's milk never forms this solid and indigestible curd. In artificial feeding this trouble is modified by diluting, by boiling, and by adding well cooked starch.

The sugar which milk contains is known as milk sugar or cane sugar. It is a necessary constituent but should not be added in excess as it makes fat, flabby babies.

Starches are usually classed with sugar in talking about foods because all starch is converted into sugar before it can be utilized by the child. Starches should be given to the baby in very small quantities up to the time they begin to cut their teeth. Before this time they are incapable of digesting it, and only trouble results when much of it is given.

Fat is found in the cream of milk.

It is easy to give a baby too much, consequently milk, like that of Jersey cattle, is often too rich for easy digestion.

When it is certain that artificial feeding must be resorted to, the first step is to secure a good, clean supply of milk from healthy cattle, according to Dr. M. P. Ravenel of the department of preventive medicine of the University of Missouri at Columbia. The second is to provide clean utensils for its preparation. The utensils usually required are a measuring glass which will hold eight ounces (This must be graduated so that single ounces can be read off); a wide mouth pitcher holding two quarts, preferably of enamel ware; a small funnel, ten feeding bottles; six rubber nipples; a tablespoon; an enamel or aluminum sauce pan; two bottle brushes; sugar, and absorbent cotton. It is best also to buy a wire bottle rack and have a package of borax at hand for cleansing the bottles. These should be reserved exclusively for use in the preparation of the baby's food.

This Missouri Boy A World's Champion

He's just a big good-natured country Missouri boy from Bosworth, but when he dons a track suit and steps down a cinder track he makes the whole world take notice. "Bob" Simpson is a world's champion track star. Recently he equaled the world's record for the 120-yard high hurdle race at Philadelphia, a wonderful performance, considering that the race was run on a grass track instead of a cinder one. Simpson is a junior in the University of Missouri at Columbia. He is studying agriculture.

Easter Sunday Rotation

Easter Sunday was late this year. Ash Wednesday was on March 8th, and Easter fell upon the very last Sunday it could possibly come—April 23rd!

Under the astronomical mutations that govern its date, Easter may come as early as March 22nd and as late as April 25th. These extreme Easter dates, which occur but three times during the nineteenth and twentieth centuries are in the following order: Sunday, March 22, 1818; Sunday, April 25, 1886; and Sunday, April 25, 1943.

It depends, as is well understood, upon the phases of the moon. The rule of computation, however, is not generally known. Easter is always the Sunday that follows the full moon immediately following the spring Equinox (March 21st). If the moon is full on Sunday, Easter is the Sunday next following.—The Tax-Payer

Morley Hanger.

In the scramble before the county court this week to secure the job of printing the financial statement for the county the contract was awarded to the Sikeston Standard on a bid of 24 cents per square. The Sikeston Herald's bid was 75 cents per square, which, if the job had been given him for the work. Scott county editors have a fashion of plunging after a little job of county printing like a pack of hungry hounds after a bone. There is no excuse for this. There is no more reason for printers taking work for less than the legal rate than there would be for county officials landing their jobs by competitive bids. In the past, county editors have been credited with possessing some sense, but Scott county editors are not displaying any great amount of business acumen in asking for work in this manner. The Banner is no exception to the rule, but you may mark it down for ready reference that the Banner never again asks for work at a price that does not show a profit.

Knew Her Rights

"I tell you I won't have this room," protested the old lady to the boy in buttons who was conducting her. "I ain't goin' to pay my money for a pigsty with a measly little foldin' bed in it. If you think that just because I'm from the country—"

Profoundly disgusted, the boy cut her short. "Get in mum, get in," he ordered. "This ain't yer room. This is the elevator."—Exchange.

Wild asters gem the meadow-land, And in forgotten dell, The golden-rod, its yellow plumes, To summer, waves farewell. —B. W. Mabry.

No. 666

This is a prescription prepared especially for MALARIA or CHILLS & FEVER. Five or six doses will break any case, and if taken then as a tonic the Fever will not return. It acts on the liver better than Calomel and does not gripe or sicken. 25c
