Why Swift & Company Handle Poultry, Eggs, Butter and Cheese

Swift & Company went into the produce business because they saw a crying need for the kind of service they were equipped to perform.

The produce business was in chaos. Collecting, transportation, preparation and distribution was hit or miss, with delay, deterioration and loss on every hand.

The farmer was at the mercy of an uncertain, localized market. He had no way of reaching through to the people who needed what he was raising for them. There was no premium upon improving his stocks, for grading was lax or lacking.

The consumer had to accept produce that, as a rule, had no known responsible name behind it. He had no way of knowing how long the eggs or the butter he was buying had been lying around in miscellaneous lots in the back room of a country store. Much of the poultry was not properly refrigerated before shipment or properly protected by refrigeration in transit.

Swift & Company's initiative brought system to this chaos. Their organization, equipment, and experience in handling perishable food products were already adjusted to the task. Their refrigerator cars, branch houses, central points, far-reaching connections, trained sales force, supplied just what was demanded.

Now the farmer has a daily cash market in touch with the nation's needs with better prices. Standardization makes better produce more profitable. More consumers are served with better, fresher, finer foodstuffs.

Nothing suffers from this save inefficiency, which has no claim upon public support.

THRIFT IS

..PREPAREDNESS..

Financial strength is to nations as important as military strength. No nation can survive a war if it cannot finance itself.

The man who fortified himself with an account in a savings bank does more than prepare himself—he contributes to the preparedness of the country.

Germany, unable to borrow from other countries, has been financed by the thrift of her people, as this thrift was expressed in accounts in savings banks.

A savings bank deposit helps the nation and is indispensable to the individual.
