The last census shows that while 33,163 lawyers received \$25,000,000 every year in fees, 37,000 ministers got only \$8,000,000.

HERE is a new definition of the word straw. An observing young woman says on a hollow thing with a competent young man at one end of it and a fifteen-cent drink at the other.

A New Yorker has made a clock from 34,000 pieces of wood, comprising over 300 varieties. For sixteen years he has had sailors bringing him rare woods from every quarter of the globe.

THE following is a copy of a bill posted on the wall of a country village: "A lecture on total abstinence will be delivered in the open air, and a collection will be taken at the door to defray expenses."

QUEEN VICTORIA'S Highness does not come here without hard digging. She has a Hindu secretary, fact is, she is known to her American admirers. His name is Munshi Hafr Abdul Karim, and if his pupil were not a queen he would be called a tutor.

A WEALTHY Scotch gentleman who had intended to give each of his daughters a legacy of her weight in 41 half notes had 200 offered in opposition to Scotland to figure on the matter for him. It was found that the larger would get as her share \$5,344 and the smaller \$4,293.

THE free lunch eaters of New York city consume daily two tons of potato salad, a ton and a half of beans, 250 lbs. of beef, and a hundred weight of carrots, not to mention the large quantities of cheese, frankfurters, sausage, pickles, olives, corned beef, macaroni, etc.

THE use of the camera in hospitals for photographing different phases of disease has been productive of valuable results abroad. Pictures are taken of various stages of the disease, and a comparison of those with photographs of others similarly afflicted discloses phenomena of great interest and value to medical science.

C. E. SPANGLER, said to be the father of railway telegraphy and the inventor of numerous electrical appliances for working the clock system on long and foreign railways, was recently held the appointment which he had held for over thirty-five years, as chief electrician and telegraph engineer of the Great Western Railway Company of England.

Mlle. VIGORIE MENDES, who died recently at Nancy, aged 95, was the oldest schoolmistress in France. She was not allowed to learn to read till she was 18 years of age. Her own schools, a few years later, were declared by the government to be "normal and model schools." Mlle. Mendes gave 40,000 francs for the erection of a hospital at Nancy.

A FRIEND of the late Gideon Wells, of Maine, who was known as the cattle king of that state, estimated that during his long life he paid the farmers for horses, cattle, sheep, hay and wool upwards of \$50,000,000, and yet so exacting was he in his demands that although he was uneducated and trusted largely to his memory, he never figured in a lawsuit either as plaintiff or defendant.

YOUNG and diletant orators will take fresh heart when they learn, if they do not know it already, that so accomplished a speaker as the late Gideon Wells, of Maine, who was known as the cattle king of that state, estimated that during his long life he paid the farmers for horses, cattle, sheep, hay and wool upwards of \$50,000,000, and yet so exacting was he in his demands that although he was uneducated and trusted largely to his memory, he never figured in a lawsuit either as plaintiff or defendant.

THE Paragraph club of Newark, N. J., is unique in the collection of women's clubs. It has neither president, vice president, secretary, nor treasurer; at its meeting no chairman presides and no gavel falls. The members gather, and presently one says: "It is time to begin," and that is the beginning. It is decided at one meeting what will be the subject discussed at the next, and every member comes prepared to contribute at least a paragraph to the general fund of talk, which obligation explains the name. The club has a numerous membership, and includes some very bright women.

ONE of the most remarkable phenomena exhibited in the United Kingdom is the growth of wealth in Scotland during the very period that Ireland has been declining. Its population is increasing, though great numbers are constantly moving to the United States and Canada. Wealth is increasing faster than population and the manner of living is improving. The people are better housed and clad than they were ten years ago. It is reported in every county that houses are being erected or enlarged. But in Scotland, as in this country, there is a tendency to move from the rural districts to large towns.

NO SUICIDE has been committed in Montenegro for fifty years, the people regarding it as a cowardly act and evidence of a weak mind. An unwholesome crime. Recently a merchant who had been harassed by his creditors attempted to end his career with a revolver, but the bullet did not kill him. Prince Nikita called to see him and rebuked him for his unmanly act, and in his recovery the prince paid his debts, but banished the offender. He then issued a decree that the dead body of any suicide should be exposed to public gaze on the gallows for twenty-four hours.

THE first woman admitted to the bar in America was Arabella Mansfield, of Iowa, in 1859. Now there are seven women lawyers practicing before the United States supreme court, and a large number have been admitted to general practice.

MISSOURI STATE NEWS.

The Impressed Case County Judges.

There was an attempt at compromise the other day by the Cass county judges with the contesting bondholders before Judge Phillips at Festus City.

The three county judges—Linn, Clay and Allen—who for the past six months have been lying in the county jail, were present in their best clothes and cravats. They had the appearance of having been confined in jail for a half year. Judge Phillips, at a former hearing, ordered the county to pay the bondholders seventy-five cents on the dollar. This is a recent action of the people of Cass county to vote, and the poor judges of the county had to suffer in consequence. But they to the living influence of the Phillips, who he was in Colorado, offered to compromise with the bondholders at sixty-five cents on the dollar, and the judge, on his return, called a conference of the representatives of the bondholders and the county. Phillips asked the parties to decide on the compromise of the county, but the contesting church organs to freely express their opinions. The bondholders were obstinate, however, and the county refused to compromise. Phillips now take the matter under consideration, and has ordered the county to pay the bondholders seventy-five cents on the dollar, and will release the imprisoned judges.
