Winston-Salem, N. C.

MISSOURI WEEKLY INDUSTRIAL REVIEW

Prosperity in this nation depends upon continuous operation of employing industries. Conditions which retard or cripple industry are immediately reflected in market for farm produce and market for labor. Politics make the big noise but the wheels of industry fill the dinner pails.

Twenty-seven food products marked decline in market price.

Lees Summit.—An explosion in a water well on the Palmer Snodgrass farm near Grain Valley has created the impression that the country around there is underlaid with gas and oil. This well was dug fifty odd years ago and lately has shown indications of oil on the water after standing a while.

St. Louis opens campaign to "Lift Missouri out of the mud."

Car building and paper making show increased employes.

Kansas City.—High school and several ward buildings needed to relieve overcrowded conditions here; increase of 2,204 over last year's enrollment.

Rich Hill.—Surrounding country to be thoroughly tested for petroleum. Twenty-one wells drilled and ready for pump equipment.

Kansas City.—\$35,000 subscribed toward club house annex to Boys' Hotel to cost \$100,000.

North Kansas City.—Plans completed for \$7,500,000 plant for Corn Products Refining Co. to be constructed on 75-acre tract here, including 7 buildings, employing 1,000 men and use 25,000 bushels corn daily.

Japan has sent to our country in the past few months 100,000 tons refined sugar.

Kansas City.—Evans-Smith Drug Co. plans erection of \$250,000 plant changing from jobbing to wholesale distributors.

Trenton gets new bank.

Kansas City.—Daily airplane passenger service between this city and Tulsa, Okla., to be established Oct. 1.

Maplewood.—Population 7,537, increase of 2,455 since 1910.

Kansas City.—Thirteenth street from McGee road to Troost avenue to be widened.

Jefferson City.—Arrangements completed for erection of \$70,000 memorial for Atchison county service men.

Kansas City.—Government hospital for former service men in need of medical attention, planned for this city.

Carthage.—Road making machinery and equipment valued at \$75,000 received and sheds constructed for housing during winter.

When a surplus of products begins to accumulate it means competition for the laborer and the manufacturer alike. The laborer will have to give more efficient work to hold his job and the manufacturer better goods to hold his trade. Thus will conditions return to a normal basis with fair prices and honest work.

Kansas City.—An expenditure of \$2,500,000 planned by Kansas City Power & Light Co. in additions to plant and transmissions to keep up with city's industrial growth.

COLE COUNTY TO MARKET GRAIN CO-OPERATIVELY

A farmers' co-operative elevator association with a capital stock of \$25,000 is planned for Jefferson City. Smaller organizations capitalized at \$10,000 each are being formed at Marion, Eugene and Henley. Meetings for the purpose of organizing and selling stock were addressed by Ralph Loomis of the University of Missouri College of Agriculture.

Missouri Democracy needs more of the fighting Cox spirit. Too many Democrats are drawing their sole inspiration from the Republican-controlled metropolitan press and accepting the word of the St. Louis Globe-Democrat and the Kansas City Star that this is a Republican year. Remember: Eight years ago the Globe-Democrat predicted Taft would be re-elected and Taft carried only two states; eight years ago the Kansas City Star carried headlines thundering that Roosevelt would be elected and Roosevelt was beaten; four

SODIUM NITRATE BENEFITS MISSOURI ORCHARDS.

What a small application of sodium nitrate to the average Missouri orchard will do has been shown to the entire satisfaction of H. E. Gross of Webster County. Last spring H. E. Cardinell of the University of Missouri College of Agricultural recommended the use of sodium nitrate on trees as a general treatment of spraying and pruning. Mr. Gross followed this advice in part of his orchard. The poorest block in the orchard was treated at the rate of two pounds of sodium nitrate to the tree, and then a row thru the orchard was treated leaving every other tree as a check.

The results are showing up in good shape this fall in both the fruit and the vigor of the trees. The trees which received the sodium nitrate will yield a great many more apples than the others and they have a better foliage, showing them to be more vigorous for another season. An inexperienced man can stand off a quarter of a mile and pick out every tree that was treated.

Ozark butter production increased 35.5 per cent over last year. Over 12,000,000 pounds have been manufactured this year.

Sikeston citizens asked to donate site for \$40,000 hospital. New bank opens at Morehouse.

32000 SAVED TO BATES COUNTY POULTRY RAISERS.

The poultry culling campaign in Bates County was brought to a close early last month. A total of 3710 hens were culled, 740 of them being discarded as almost worthless for egg production. At the meetings held where culling was demonstrated the average attendance was good and 14 families were represented at each meeting. Many of these persons had seen the work done the year before but came back to receive further instructions. A conservative estimate places the direct saving to the farmers of Bates County as a result of this campaign at \$2000. If the results of last year's work can be used as a guide, many of these people will go home and cull their flocks, thus multiplying the estimated saving by at least five.

Poultry culling, as demonstrated by specialists from the University of Missouri College of Agriculture has proved popular thruout the state. Bates County indicates that a great savings will be made thruout the state as a result of this campaign.

Kansas City.—Corner stone laid of new \$500,000 Masonic temple at Lincoln and Park avenues.

Neosho.—Eastern grape juice manufacturer contemplates building \$250,000 branch factory here.

MISSOURI SOILS ARE BEING SURVEYED

A general soil survey of the state has been completed by the University of Missouri College of Agriculture, and a map and report issued showing the important soil areas, their composition, crop adaptations and agricultural value. A detailed survey showing the soils on every farm is under way, county by county. Soil samples are collected of each type and chemical analyses made. Reports and maps are issued giving information regarding the agricultural value and methods for handling each soil type. Fifty-one of the 114 counties have been mapped. More than 160 distinct soil types have been identified and more than 500 soil samples have been analyzed, representing more than 5000 individual chemical determinations.

The mapping of soils is preliminary to careful field studies of the best system of manuring, and fertilizing each type. Experiment fields are located in widely separated localities representing the most important soil types in the state. The land is leased and the work is directed by the College of Agriculture.

Here is a fair sample of the way Missouri newspapers generally are "boosting" the sixty million dollar road bond proposition. It is from the Fulton Daily Sun:

"Often we have heard the expression that everybody was in favor of good roads if they could have them without it costing them anything. If the \$60,000,000 bond proposition is carried in November, that is about what we will have in the future—a system of good roads over the state without it costing anybody anything. Automobile owners are required to pay a sum every year for license and it is proposed to use this fund to pay off the bond issue. At present this sum goes for driblets to different sections and is used to fix short stretches of road at a time, but it doesn't tend to make a good system of roads. By putting the big sum to work a real system of roads can be built and the bonds issued to pay for it will be paid out of this automobile license tax, which is increasing every year. Up to the first of this month there were 281,890 motor cars in the state that had paid a license tax, amounting to \$2,053,394. Vote for Amendment 6 in November, lift Missouri out of the mud and have some good roads that will not cost you a cent."

\$25.00 REWARD

A reward of \$25 will be paid by the undersigned for arrest and conviction of any person killing fish with dynamite or other explosives, and \$10 for conviction of any one violating the game laws.

The game laws have been violated to some extent in the past and I have determined that they must be enforced to the letter from now on if it takes a deputy in every school district.

ED. BYINGTON, Deputy Game Warden.

years ago the Globe-Democrat and the Star said Hughes would sweep the nation and Hughes lost out; four years ago Wall Street gamblers were betting three to one that Hughes would win but they lost.

Pain

Here is a message to suffering women, from Mrs. Kathryn Edwards, of R. F. D. 4, Washington Court House, Ohio. "I am glad to tell, and have told many women, what I suffered before I knew of Cardui and the great benefit to be derived from this remedy. A few years ago I became practically helpless... TAKE

Cardui

The Woman's Tonic

"I was very weak," Mrs. Edwards goes on to say, "and could not stoop without suffering great pain... Nothing seemed to help me until I heard of Cardui and began the use of it... I gradually gained my strength... I am now able to do all my work." If you need a tonic take Cardui. It is for women. It acts gently and reliably and will probably help you as it helped this lady.
