

SUPPLY TRAIN FOR THE ALLIES IN MANCHURIA

A military train with supplies for the allied armies, from Siberia, arriving in Manchuria. The photograph shows American soldiers in front with soldiers of all the allies.

HARBOR OF DURAZZO, RAIDED BY THE ALLIES

View of the harbor of Durazzo, Albania, which was entered by a naval force of the allies, the Austrian naval base being destroyed and all enemy vessels sunk.

GARLAND IN NEW ROLE

Charles Garland, an American millionaire, served with the British cavalry and was honorably discharged. He became a naturalized Britisher and is a candidate for parliament as representative of the discharged soldiers of the Warwick division. This photograph was taken at Mr. Garland's home in Warwick.

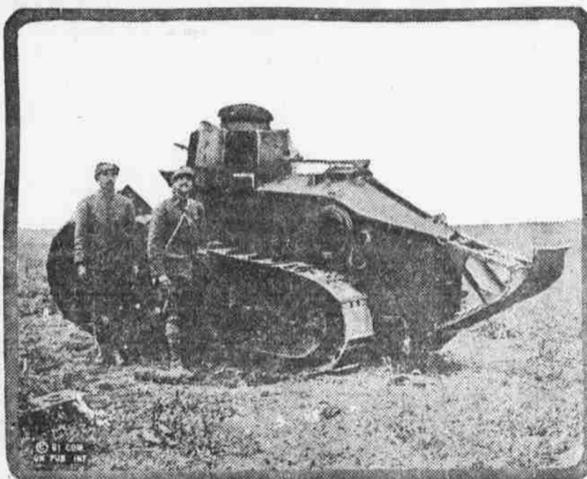

This Dog Bites.

When F. O. Rock of Ben Avon, a foreman employed by the Pennsylvania railroad, has any more French poodles in his custody for shipment he will be very careful with his language.

Recently Rock received a crate containing a French poodle consigned to Detroit. The canine refused to stop barking. Rock had a great deal of figuring to do, and the dog annoyed him. "Shut up, Kaiser, or I'll give you a Yankee wallop," he yelled. The poodle only set up a louder series of yelps and when Rock passed by the crate the poodle stuck its head out between the slats and nipped him on the ankle.

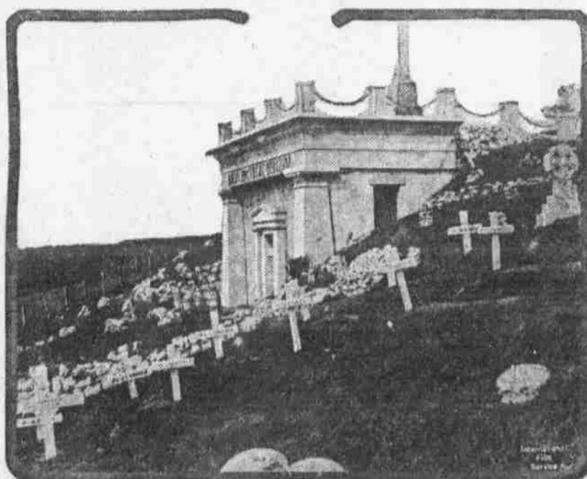

Before calling the dog Kaiser Rock said it licked his hand and was very friendly.—Detroit Free Press.

WIPER OUT OF THE MACHINE-GUN NESTS

This is one of the small British tanks that do such valiant service in wiping out the machine-gun nests that the enemy relies on to make good his retreat.

TO THE MEMORY OF BELGIUM'S DEAD

The dedication of this mausoleum, erected to the memory of Belgian soldiers who fell in the fight to protect their country from the Hun, took place in the Shorncliffe Garrison cemetery. The mausoleum is the only one of its kind in all England.

BRIEF BITS

England's prison population before the war was 18,000; it is now 9,500. New Zealand has an annual death rate of less than 1 per cent.

Woman suffrage was indorsed at the annual convention of the Pennsylvania State Federation of Labor. The inventor of a pulley with depressions in its surface contends that belts will not slip when it is used.

DADDY'S EVENING FAIRY TALE

MRS. DEER'S SICKNESS.

Poor Mrs. Deer was sick. She was certainly a very sick animal and her large eyes looked at the keeper as though to say:

"I feel so badly, I feel as though I were going to die. And I don't want to die, keeper, for the world is such a beautiful place. The sun shines, the rain cools it off, the snow looks soft and white and beautiful when the winter is here and the trees are almost always lovely.

"In the spring they burst into bloom, in the summer time they are full and green, in the autumn they are of various colors and in the winter they are often covered with soft blankets of white snow.

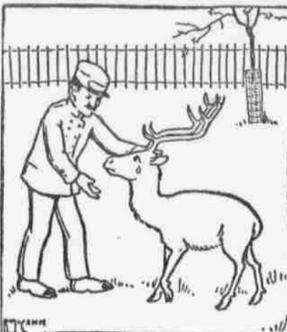

"And there are the trees of the forests, the dark pines and spruces and elms. They are always beautiful. Oh, keeper, the world is a very beautiful place and I want to live so very much."

Now Mrs. Deer was very nervous for all of the deer family are extremely nervous and timid. They are naturally rather delicate too in most cases.

"I am afraid," said the keeper, as he saw Mrs. Deer limping about most painfully, "that you have sprained or strained your knee joint or maybe your ankle."

Poor Mrs. Deer wanted to be made well and yet she was afraid to be captured by the keeper. Now the keeper did not want to frighten Mrs. Deer and he understood just how she felt. She was certainly in a great deal of pain and yet she dreaded being attended to for she knew that often meant so much more pain.

"I have to be patient," said the keeper, "for if I hurry her and frighten her I will only make her worse.

"There, There, Mrs. Deer."

Then she will have a terrible case of nervous fright in addition to the pain which is making her limp."

And indeed the keeper was very patient. He waited a long, long time before the deer would let him take her gently, not forcing her to come to him.

"Well, Mrs. Deer, we must see what is the matter with you," the keeper said, and then the zoo doctor came along. The keeper had sent for him. He had been around several times before, but the keeper had sent him away, saying:

"Stay around but not too near. We mustn't frighten Mrs. Deer, for she has enough pain without being made dreadfully nervous. We must be patient." And the zoo doctor had agreed with the keeper.

Mrs. Deer turned her eyes upon the keeper, now that she was being stroked by him, just as she had looked at him before he had caught her.

And once again it seemed as if she were saying: "I want to live, keeper, the world is such a beautiful place."

The keeper stroked her and soothed her and said:

"There, there, Mrs. Deer, you'll be all well soon. All well soon."

Then the doctor looked at Mrs. Deer and he examined the place where the pain seemed to be.

"Dear me," said the doctor, "you mustn't worry, Mrs. Deer. You have rheumatism which is making you stiff and sore, but there are no broken bones and no fractured joints."

Mrs. Deer didn't just know what all these things were but she knew from the doctor's voice that everything was going well and that she would soon be about again.

"Yes," said the doctor, "you took cold and so got a slight attack of rheumatism. But you'll be all right in a day or so."

"You simply need a little liniment on your sore knee joint."

So the deer had liniment put upon her knee joint. She didn't just know what liniment was, but she knew that something warm and soothing and comforting was being put on her knee and it was being rubbed in. It was poured out of a bottle and oh, it did make so much difference after it had been rubbed on her knee joint.

"You're going to be as well as ever in a day or so," said the keeper joyfully, and Mrs. Deer, feeling already so much better, looked at the keeper, with tears of joy in her big eyes, and said in deer language: "Thank you, thank you so much!"

Why Herman Objected.

"Now, Herman," said the mother of a small invalid, "I want you to take this powder the doctor left for us."

"Powder!" exclaimed the little pa-

POULTRY

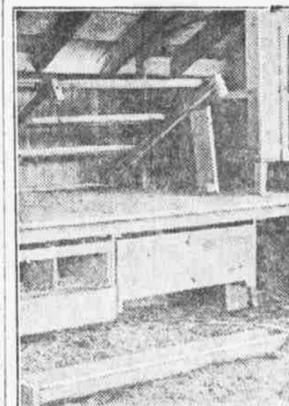

INTERIOR OF CHICKEN HOUSE

Kind of Floor Most Suitable Depends Greatly on Soil on Which Structure is Located.

(From the United States Department of Agriculture.)

The kind of floor which is best suited for a particular poultry house depends upon the soil on which it is located, and the use of the house. On light, sandy, well-drained soils a dirt floor is satisfactory, especially for small or colony hen houses. Such floors should be from two to six inches higher than the outside ground surface, and it is advisable to renew them each year by removing the contaminated surface down to clean soil, and to refill with fresh sand or fine gravel and earth. A board floor is generally used where the level of the floor in the house is from one to three feet above the ground surface and in portable houses on land which is not well drained. Board floors harbor rats and rot quickly and should be raised some distance off the ground so that cats or dogs can get under them, which also allows a free circulation of air to prevent the wood from rotting. Cement floors are adapted to long permanent buildings, brooder houses, incubator cellars, and to all permanent houses where an artificial floor is required and can be built on the ground level. These floors are easy to clean, very sanitary, rot proof, and comparatively inexpensive, if one has a cheap supply of gravel or sharp sand.

Wooden floors are usually made of matched flooring and are generally doubled in cold climates to make them tight and warm, in which case the lower layer of boards is usually laid diagonally to strengthen the floor. Floors of one thickness give good satisfaction in most sections of this country and in growing houses. Three-quarter-inch mesh wire may be used under wooden or dirt floors to keep out rats. In making concrete or cement floors and walls select Portland cement of known reputation, which should be kept in a dry place; use clear, coarse, sharp sand or gravel which does not contain over five per cent of clay or silt and crushed stone or gravel one-fourth to two inches in diameter. The gravel should be screened through a one-fourth-inch mesh wire screen and the coarse particles used as stone, while the material which passes through the screen is sifted through a

Well-Arranged Hen House.

40-mesh wire screen in order to separate the sand, and any material which goes through a 40-mesh wire is thrown away. A mixing board with a smooth surface and a box for measuring the sand and gravel are necessary. Spread the sand on the board and add the cement; mix these thoroughly together; add three-fourths of the required amount of water and then the gravel or stone; mix thoroughly and add water to the dry spots, making the mixture just wet enough to be jellylike. Thorough mixing is very essential, as the mortar should completely coat all particles of the mixture. Only enough water should be added so that when the concrete is tamped on laying the water will nicely flush the surface.

POULTRY FOOD FROM WASTE

Fowls Convert Materials Into Feed That Cannot Be Utilized by Any Other Kind of Stock.

(Prepared by the United States Department of Agriculture.)

Keep this thought in mind in considering the growing of more poultry as a war necessity: Poultry is a means of converting into good food materials that cannot be utilized by man, that cannot be eaten by any other kinds of stock, and that without the poultry would be absolute waste. Very clearly it becomes a national as well as an individual duty to keep enough poultry to take up all such waste materials. As long as fowls take the bulk of their feed from such sources and require to be fed on grain or other garnered feeds only as a finishing process, additional food is being created.

HOW TO AVOID BACKACHE AND NERVOUSNESS

Told by Mrs. Lynch From Own Experience.

Providence, R. I.—"I was all run down in health, was nervous, had headaches, my back ached all the time. I was tired and had no ambition for anything. I had taken a number of medicines which did me no good. One day I read about Lydia E. Pinkham's Vegetable Compound and what it had done for women, so I tried it. My nervousness and backache and headaches disappeared. I gained in weight and feel fine, so I can honestly recommend Lydia E. Pinkham's Vegetable Compound to any woman who is suffering as I was."—Mrs. ADELINE B. LYNCH, 100 Plain St., Providence, R. I.

Backache and nervousness are symptoms or nature's warnings, which indicate a functional disturbance or an unhealthy condition which often develops into a more serious ailment. Women in this condition should not continue to drag along without help, but profit by Mrs. Lynch's experience, and try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound—and for special advice write to Lydia E. Pinkham Med. Co., Lynn, Mass.

Admonishing Them.

"The Kaiser," began one of the prominent and influential loafers occupying chairs on the porch of the Petunia tavern.

"Now, looky here, gents!" severely said the landlord, appearing in the doorway, "I am as patriotic as the next man and all that, but if you're going to use that kind of language I'll have to ask you to excuse yourself and adjourn. The windows behind you are open, and the dining room girls are working right inside."—Kansas City Star.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Bears the Signature of *W. C. Fletcher* In Use for Over 30 Years. Children Cry for Fletcher's Castoria

The Way.

"How can I manage that slippery customer?"

"Hammer at him until you nail him."

Consulting His Taste.

"Don't you generally have a homely when you minister dines with you?"

"Oh, no; he doesn't eat it."

Mixed Up.

Friend—So you have gone back to the straight drama?

Actor—Yes; I'm in a crook play.

The Retort Pleasant.

Belle—I think gossip is very narrow.

Nell—Is that why you spread it so?

No Substitute For Dodd's Kidney Pills.

That's Why Their Sale Has Increased Wonderfully for the Last Forty Years.

Don't accept a substitute for Dodd's when you know that if they didn't relieve and give permanent satisfaction they couldn't be selling to the same families for two generations. Thousands of users, who have saved themselves from the ravages of kidney troubles and Bright's Disease by the use of this famous old remedy, will accept nothing else. They know that upon the slightest backache, pain in the loins, stiffness in stooping or lifting, you must take warning and use Dodd's and Dodd's only.

You are protected by the name on the flat, round box—the name with the three D's for diseased, disordered and deranged kidneys. No article of similar name will do. Get your box today and start on the road to health. Druggists will gladly refund your money if not promptly relieved.

Business Opportunity in This Town

We wish to establish a branch in this town and are looking for a man or woman to handle our business. Experience desired but not necessary. Old established house with branches in many cities and towns. We furnish everything. Be the first to write.

Great Eastern Coffee & Tea Co. 301 to 317 N. 10th St. St. Louis, Mo.

Soothe Your Itching Skin With Cuticura

All druggists, Soap Co., Olmstead 24 & 26, Talbot St. Sample each free of "Cuticura, Dept. 2, Boston."

A Bad Cough

If neglected, often leads to serious trouble. Safeguard your health, relieve your distress and soothe your irritated throat by taking
