

Couldn't Walk!

"I used to be troubled with a weakness peculiar to women," writes Mrs. Anna Jones, of Kenny, Ill. "For nearly a year, I could not walk, without holding my sides. I tried several different doctors, but I grew worse. Finally, our druggist advised Cardui for my complaint. I was so thin, my weight was 115. Now, I weigh 163, and I am never sick. I ride horseback as good as ever. I am in fine health at 52 years."

TAKE CARDUI The Woman's Tonic

We have thousands of such letters, and more are arriving daily. Such earnest testimony from those who have tried it, surely proves the great value of this vegetable, tonic medicine, for women.

Cardui relieves women's sufferings, and builds weak women up to health and strength. If you are a woman, give it a trial. It should help you, for it has helped a million others. It is made from pure, harmless, herb ingredients, which act promptly and surely on the womanly organs. It is a good tonic. Try it! Your druggist sells it.

SILO NEWS

IF YOU are figuring on buying a Silo, we recommend that you investigate the Storm Lake Silo. This Silo, which is one of the best built and most convenient Silos on the market, is now set up and can be seen at the Groblebe Lumber Yard on South Campbell street. If possible, call and see this Silo; if not, write us for catalogue, price and terms. We buy our lumber in car lots direct from the mills, and can give you a better Silo for less money.

We Give You Eight Reasons for Considering a Storm Lake Silo

It has a new form HINGE DOOR which is QUICK DETACHABLE and closes absolutely air-tight. They cannot stick or bind in opening. They are easy to operate. They are ALWAYS in their proper place. There is no lifting them around.

It has a malleable iron and STEEL DOOR BAR, HOOP CONNECTION and LADDER combined. Hoops are all tightened from the doorway. No separate ladder needed. One man and a wrench can tighten all the hoops from the same ladder that is used in going up the Silo to remove the ensilage.

Hoop connection and door bars form a safe and convenient ladder with ample foot hold from which hoops are tightened.

The steel bar or hoop connection is securely bolted to the Silo, extends past the door jams and bolts to the first Silo stave, forming a strong and rigid construction. The Silo cannot bulge, collapse or get out of shape about the doors.

You don't need a 30 or 40 foot ladder around the place to tighten hoops if you have a Storm Lake Silo.

The swelling or shrinking of doors in the Storm Lake Silo cannot cause them to bind, stick or admit air. Our manner of attaching guy wires, with the inner hoop construction and BASE ANCHOR, holds the Silo as solid as a rock.

DON'T be afraid to purchase a STORM LAKE SILO. They are built to withstand wind, and after erection they require little attention.
