MISSOURI SLOPE NORMAL SCHOOL

A Vote for the Establishment of This School is Your Patriotic Duty.

ON A SEPARATE BALLOT

In the vast Territory West of the Missouri River there is not a single Higher Educational Institution—is This Fair?

We all recognize that the supremacy of the state is the education of all its children; that the school must be brought within easy reach of every boy and girl...

We now have over 6,000 teachers in the elementary schools of North Dakota. One-fifth of that number are new to the profession every year.

Twelve hundred inexperienced recruits thus begin their work in the school room each September. Few of them have had adequate special preparation for their all important work.

Many of them know very little of child development, of the history of education, of the principles of pedagogy, of the science and art of instruction...

of the methods of teaching the branches required in the different grades. Some of them become very good teachers in time; but their experience is gained, too often, at the expense of the pupils upon whom they are permitted to practice.

If the waste in time and effort that results from placing these ill prepared and inexperienced teachers in charge of the schools of North Dakota could be estimated in dollars and cents the result would be simply appalling.

A mere glance at the above map of North Dakota will disclose the fact that all of the state institutions, with the exception of the reform school at Mandan, are located east of the Missouri river.

There is only one higher educational institution in the entire west half of the state, and not a single one on the Missouri Slope. Help the light of education to come westward—vote "Yes" on the normal school question on Nov. 7th next. Let's have every vote in the Slope a vote for the normal.

More Than Pedagogy. Nobody is going to Wahpeton to study science; nobody is going to Bottineau to study forestry; nobody is going to the agricultural college to study agriculture...

Only the very few look to these schools solely for technical equipment. And the student body of each of our schools clearly demonstrates that fact.

You will notice the largest number come from counties immediately surrounding the school. At the state university there are 34 per cent from Grand Forks county; at the agricultural college 26 per cent are from Cass county; at the Valley City normal 49 per cent are from Barnes county; at the Mayville normal there are 49 per cent from Traill county; at the Minot normal there are 52 per cent from Ward county; at the Ellendale school there are 89 per cent from Dickey county; at the school of science there are 81 per cent from Richland county; at the school of forestry there are 95 per cent from Bottineau county.

All the schools are local. In order to get any large number of pupils to attend school from west of the river we must put a school here; otherwise we will never get them to go.

Would Not Increase Taxes. A word is due to those who hold that an additional normal school would entail too much expense on the state. TAXES WILL BE NO HIGHER because a new building is located advantageously for an unskooled contingency. The school taxes of the state are limited by the constitution, and the limit thus allowed has always been used in its entirety. They can be no higher under the law.

It will cost the state no more to build and maintain a normal at Dickinson than to do so where a normal already exists but at too great a distance for Slope students to go.

A few facts culled from the report of the commissioner of education indicate how meager is the present provi-

best quality. The city has a fine public school system, a well patronized public library, and six prosperous churches. The Masonic temple and Elks' lodge home are not surpassed in the state. Believing that goodness and righteousness are basic in the making of a strong people, the city takes special pride in the normal development of its youth.

THE WESTERN NORMAL. The people of the southwestern part of the state are anxious for the establishment of a normal school at Dickinson. Both political parties are committed to this in their platform.

West of the Missouri there is a vast territory, many sections of which are already populous and thrifty, whose people are contributing proportionately as much to the development of the state and to the support of its government as any other section. And in all that territory, many thousands of square miles in extent, there is not a single institution for the training of those teachers upon whose efficient-ness the wellbeing of the state depends in such large measure. The young man or young woman who desires to become fitted for the work of teaching, if a resident of that district, must travel several hundred miles to receive that training.

It is upon this actual need that the people of the western territory base their demand for better normal facilities, and it is in recognition of the real need that exists that both Republican and Democratic state committees have declared themselves unequivocally in favor of the normal west of the Missouri.—Editorial in Grand Forks Herald Sept. 27.

BE FAIR TO SLOPE COUNTRY. One of the important issues in the coming election, to which the Forum has already called the attention of the voters of the state, is the proposed amendment to the constitution which would locate a normal school at Dickinson. It is important because it is a matter of justice and fairness to the people of the western part of North Dakota that this normal school should be established.—Editorial in Fargo Forum Sept. 30.

Auto and Engine overhauling—Reboring cylinders and fitting them with new pistons and rings is a specialty with us.

Welding—All kinds of metals welded. Don't buy a new casting when the old one can be made as good as new for half the price.

Wagon Work—blacksmithing shoring discs, radiator work, in fact any kind of machine work can be done here.

JOSEPH PIESIK

PIESIK BLOCK

Whole Family Benefited By Wonderful Remedy

There are many little things to annoy us, under present conditions of life. The hurry, hard work, noise and strain all tell on us and tend to provoke nervousness and irritability. We are frequently so worn out we can neither eat, sleep nor work with any comfort. We are out of line with ourselves and others as well.

A good thing to do under such circumstances is to take something like Dr. Miles' Anti-Pain Pills

to relieve the strain on the nerves. Mrs. J. B. Hartsfield, 82 Plum St., Atlanta Ga., writes:

"I have on several occasions been greatly relieved by the use of your medicine, especially the Anti-Pain Pills, which I keep constantly on hand for the use of myself, husband and two sons. Nothing in the world equals them as a headache remedy. Often I am enabled by the use of one or two of the Pills to continue my household work when otherwise I would be in bed. My husband joins me in my praise of the Anti-Pain Pills and Nerveine."

are relied upon to relieve pain, nervousness and irritability in thousands of households. Of proven merit after twenty years' use, you can have no reason for being longer without them.

At all Druglets, 25 cents 20 cents. MILES MEDICAL CO., Elkhart, Ind.
