

Big N. D. Ranches to Be Cut Into Farms

ONE HUNDRED FAMILIES WILL COME TO STATE TO OCCUPY LAND.

Minneapolis, Aug. 15.—Two famous North Dakota bonanza farms, the Adams and Keystone, that comprise more than 15,000 acres, and that have stood intact through the changing trend of agriculture in that state from "one-crop" farming to diversification, are to be broken up as the result of a deal closed today that involves more than \$1,000,000. J. L. Mathews, Lidgerwood, N. D., banker, who is interested in a bank at Kermit, and who recently sold his interest in the Lidgerwood National bank to J. W. Stitteler, and who will reside after Sept. 1 at 2019 Second avenue south, Minneapolis, and A. L. Benzer of Lidgerwood and Matador, N. D., are associated in the deal.

The Adams farm, in Richland county comprises fifteen sections, eleven sections being in one block. The farm is near Matador, on the Soo line, and close to Bayne, on the Northern Pacific.

The Keystone farm, owned by Jones & Son of Niagara Falls, who are interested in the gorge railway and other enterprises of that vicinity, is directly on Soo line trackage, the townsite and station of Matador being on the farm. It consists of sections alternately distributed according to original land grants, four in the first tier, three below and two in the third tier.

The Adams farm contains in all a little more than 9,600 acres and the Keystone farm 5,760 acres in all.

The price paid is said to have ranged from \$60 to \$80 an acre.

J. L. Mathews conferred with T. E. Sands, general freight agent for the Soo line, after the sale. The Soo line and Northern Pacific, the North Dakota Better Farming association, the North Dakota State Agricultural society and the North Dakota Bankers' association all are working for the cutting up of big farms.

It is calculated that not less than 100 families of farmers will occupy the land.

Harvey Lock is greeting old friends in the city this week after spending the summer in the south with the Nat. Reise Carnival Company.

Many growing girls in school or business are frail—delicate—**anemic**—lack energy and ambition and have thin blood. It is all unnatural and unless checked leads to serious and chronic ills.

Nourishment, not drugs, is the law of reason to build strength—but when appetite is poor and digestion weak, ordinary foods do not nourish—then **SCOTT'S EMULSION** is necessary.

SCOTT'S EMULSION overcomes just such conditions; its tissue material enters the blood without digestive effort and makes it rich. It tones the whole system and starts the healthy action of cells throughout the body.

Imitations are often offered, but to get results you must get **SCOTT'S**. Scott & Bowne, Bloomfield, N. J.

Why Have "Nerves"?

This is the reason why women have "nerves." When thoughts begin to grow cloudy and uncertain, impulses lag and the warnings of pain and distress are sent like flying messages throughout limbs and frame, straightway, nine times in ten, a woman will lay the cause of the trouble to some defect at the point where she first felt it. Is it a headache, a backache, a sensation of irritability or twitching and uncontrollable nervousness, something must be wrong with the head or back, a woman naturally says, but all the time the real trouble very often centers in the womanly organs. In nine cases out of ten the seat of the difficulty is here, and a woman should take rational treatment for its cure. The local disorder and inflammation of the delicate special organs of the sex should be treated steadily and systematically.

Dr. Pierce, during a long period of practice, found that a prescription made from medicinal extracts of native roots, without the use of alcohol, relieved over 90 per cent. of such cases. After using this remedy for many years in his private practice he put it up in form of Dr. Pierce's Favorite Prescription, that would make it easily procurable, and it can be had at any store where medicines are handled.

Mrs. LILA B. HAWKINS, of Zeus, Va., writes: "I had been failing in health for two years—most of the time was not able to attend to my household duties. Female weakness was my trouble and I was getting very bad but, thanks to Doctor Pierce's medicines, I am well and strong again. I took only three bottles of 'Favorite Prescription,' and used the 'Lotion Tablets.' I have nothing but praise for Doctor Pierce's wonderful medicines."

Union Men Are Opposed To I. W. W.

The following statement was issued Saturday:

Whereas considerable misunderstanding exists concerning the relation of the so-called I. W. W. organization to the trades labor movement—the American Federation of Labor, and

Whereas, the A. F. of L. is most emphatically opposed to the I. W. W. principles and methods, not only in North Dakota, but in every state in the union, be it

Resolved, That the Fargo Trades and Labor Assembly condemn unequivocally the lawless and uncalled for disturbances caused by efforts to gain publicity at the expense of North Dakota farmers.

(Signed) Trades & Labor Assembly, Fargo, N. D.

Decaying Fish Are Menace to Health

Complaint has been heard again today of the condition of the river below the dam where it is claimed that hundreds of dead fish in an advanced state of putrefaction is a menace to health, and the odors revolting to anyone who happens in the neighborhood.

No cause is known for the fish having died in such large numbers but is a matter that will in all probability require attending to in the interest of public health. The people living in the vicinity will bring the matter to the attention of the board of health today, and no doubt immediate action will be taken.

The negro population of the state is only 1 per cent of the total population of the state which has more than 500,000 inhabitants. The negro population of the state penitentiary is 10 per cent of the total number of convicts in the state prison.

This contrast becomes even more glaring when it is discovered that about 8 per cent of the number of negro convicts are sent up from Cass county and the city of Fargo. This is indeed strange when it is remembered that both the city of Grand Forks and Grand Forks county face almost the same conditions as are confronted by Cass county and the state metropolis.

A large number of negroes congregate in this city in the colored quarter down on lower Front street near the south bridge which has been the scene of many riots, murders, suicides and shooting scrapes of various kinds and descriptions in recent years.

Apparently there is no scarcity of farm help in the communities tributary to Cando and the papers are making the comment that the men are of the class of willing workers.

Woman Seriously Disfigured by Buggy

HUSBAND OF CASS COUNTY WOMAN KILLED AND HER FACE BADLY SCARRED.

Fargo, N. D., Aug. 15.—One of the most appalling accidents noted in this state in some time befell Mrs. R. A. Kruger, a well known and popular resident of Cass county living in the vicinity of Embden, when day before yesterday she was thrown from her buggy, the wheels of which ran over her face and throat.

Mrs. Kruger had been to Embden purchasing some household supplies. About half way home on the return trip, the horse became obstreperous from a gigantic bee or fly. The animal gave several lurches in the air, getting beyond the control of Mrs. Kruger.

Suddenly the vehicle overturned and the driver thrown out. The horse backed up once over the body of Mrs. Kruger, the wheels running over her face. A lurch forward brought the wheels directly over her throat.

The animal ran down the road with the empty buggy, attracting the attention of people in the nearby farm house. When Mrs. Kruger was found she was suffering intensely and so badly mangled that it was with difficulty that she was first recognized.

Immediately she was removed to her home, where she is receiving the best of care from friends who have volunteered their services in caring for her. Reports today were received by Deputy U. S. Marshal Brown, who said that possibly Mrs. Kruger may be permanently disfigured though perhaps the injuries may not prove fatal.

Just a year ago, Mr. Kruger was killed while out in a field by a fractious horse kicking him in the head. The horrible accident of his widow seems a strange coincidence. It is hoped she will recover. She has the sympathy of her many friends throughout the county where she is well known.

Bids Wanted For Lignite Coal.

Notice is hereby given that sealed bids will be received by the Board of Education of the City of Valley City, until 6 p. m., Tuesday, Sept. 2, 1913, for furnishing lignite coal for the ensuing year, in such quantities as may be required. The coal to be delivered F. O. B. cars Valley City, N. D.; railroad weights to be accepted. The Board reserves the right to reject any and all bids. By order of the Board of Education.

More Machinery for Electric Light Plant

CITY HAS SECURED CONTRACT TO FURNISH POWER FOR ELECTRIC LINE.

The foundation is being put in for the special machinery needed to furnish power for the electric line to the Soo depot. The city has secured the contract to furnish power for the Street Railway Company for a term of years and the necessary changes will be made as rapidly as possible. The machinery is already on the ground and will be put in place as soon as suitable foundation is completed.

After a complete tryout of the lights since the new dynamos for electric lighting purposes have been installed, has proved that a much better light is being furnished at a less cost to the consumer. Before the change many complaints were heard more particularly on the outlying districts but with the new equipment there is a uniform current furnished everywhere that the lines run. Valley City now has one of the most complete and best managed electric lighting plants in the state and every citizen can point with pride to our lightning system.

POTATO WILT.

This is the time of the year when potato wilt diseases begin to make their appearance. The symptoms of this wilting may vary to a considerable extent. Frequently the branches and leaves grow upward forming a more or less compact top, the leaves curling and folding along the midrib. The plants become a pale yellowish green while the stem may turn black or brownish at the soil surface, this discoloration sometimes extending as far up as the lower branches. These discolored areas may shrivel up and become dry while often they become soft and decay causing the plants to fall over.

Young plants may be killed prematurely, only small tubers being developed. In other cases the vines are large, the tops presenting a compact rosette appearance, but only small potatoes are produced. Often the formation of small green aerial potatoes in the lower leaf axils or near the surface of the ground, above the discolored portion of the stem, takes place.

The roots are frequently very brittle, breaking off very easily and appearing somewhat rotted. They may be grayish or brownish in color and are often partly covered with a pink mold. The stem branches leading to the tubers appear similar to the roots.

Plants showing any of the above symptoms may be affected with one of a number of diseases. Sometimes it is difficult to determine in the field which disease it is. The treatments needed may be different. Anyone finding a diseased specimen should send it to the North Dakota Agricultural Experiment station at Fargo.

Miss Jessie Sargent who has been in the Twin Cities and at points in the east for the past couple of weeks purchasing her fall and winter millinery stock returned home Friday. Miss Fuller, of Milwaukee, has been engaged for the millinery department.

WANTS

WANTED—A good steady gentlemanly salesman to handle a Ward's wagon in Western Barnes county. No experience needed. For full particulars write promptly to Dr. Ward's Medical Company, Winona, Minn. 8-7-10tw
