Mayor Moe has recently had several pool hall proprietors up on the carpet in regard to allowing minors to play for money various games in their respective places of business. It will probably take about 40 minutes from the time they leave Fargo until they get here, so if you hear a big noise from these whistles you will know that it is these birds of the air approaching the city.

It has come to the notice of the publisher of the Times-Record that certain persons are buying papers from the regular carrier boys. We want to say that this is dead wrong and only teaches these boys dishonesty. Each boy starts out every evening with just enough papers to give every subscriber on his route a paper. If he sells one to somebody not a subscriber some subscriber has to go without a paper that night and the office gets the kick which is perfectly all right. People subscribe for this paper because they want it and they are entitled to have it delivered to them. Please bear this fact in mind and do not buy papers from the carrier boys. The office does not get the money from the papers they sell, the boys stealing it which is a mighty poor way for them to do or for those who encourage this kind of work.
