The straw vote at the Dakota Drug for Saturday and Sunday did not bring out many expressions of opinion on the presidential candidates. There were only eight votes cast in the two days and Mr. Harding received four and Mr. Cox four. Very little interest evidently is manifest over this vote which really is one of the biggest expressions of public sentiment in the country. Four years ago the straw vote taken by the Rexall company of stores, eight thousand of them in the country, forecasted exactly Mr. Wilson's election to the presidency.

A new shock loader is being demonstrated on some of the farms around here. This new labor saving device for the farmers, if it is a success, means the saving of much money and many men and teams. The machine is run by a gas engine. It goes along and picks up the shocks, dumps them into the wagon, then goes to the machine and dumps them there. It is claimed that the work of two of these machines will keep a big threshing machine busy. Farmers can readily see that if this new labor saving device is the success they expect of it, it means that the labor problem is going to be helped out considerably. One man runs each outfit.
