

ALLEGED FORGER IS WIDELY SOUGHT

Wanted in Several Cities on Charges of Passing Bad Checks.

OPERATED HERE BY NAME OF FITCH

Engaged as Insurance Agent and Uses That as His Fort.

Traveling about the country under several fictitious names, a man, going by the name of Robert A. Fitch in this city, is wanted at several points for forgery.

He went to Cando and called upon the agent of the company at that place, and induced him to help get a forged draft cashed at one of the banks there, the amount being \$15.

According to advices, Fitch also succeeded in cashing a forged draft at Cuberton, Mont. The matter is being taken up by the National Bankers' association.

OPERATION IS NOT SERIOUS

T. B. Holmes Underwent Operation for Ulcer of Stomach—No Complications Says Physician.

T. B. Holmes, who is connected with the John Birkoth company, underwent an operation at the Mayo Bros' hospital in Rochester, Minn., this morning for ulcer of the stomach.

BJORNSON LEAVES FOR LA MOURE

Will Assume Superintendency of City Schools—Miss Guri Sand Begins With County Superintendent.

J. S. Bjornson, who has been field deputy for County Superintendent of Schools Miss Beatrice Johnson, since she assumed the office, leaves tonight or tomorrow for LaMoure, N. D., where he will begin his duties as superintendent.

Miss Guri Sand, who was appointed a deputy superintendent, began her work in the county office this morning.

MRS. W. A. M'KENZIE IS DEAD

Former Resident of Grand Forks dies at Goldendale, Wash., Home for the Last Few Years.

Mrs. W. A. McKenzie, a resident of this city many years ago, died recently at Goldendale, Wash., according to word just received here, at the age of 82 years.

DRUGS ADVANCE IN PRICE

War Has Paralyzed German Manufacturers and as Many Drugs Come From There the Price Goes Up.

Chemicals used in the development of photographic films have doubled or quadrupled in price during the last two weeks.

Most of the chemicals used in photography are made in Germany, and, as in the case of most medicinal drugs manufactured there, the process is patented and so is copyrighted in the United States.

Local druggists quote the following to show the great advance in price: Hydrochlon, 10 cents a pound two weeks ago, now \$4 a pound; metol, amidol, dianol and oratol, formerly \$6.65 a pound, now \$10; citric acid from \$1 to \$2, bromids of potassium from \$4 to \$6 cents a pound, and pyrogallol acid from \$1.25 to \$2.40.

PARTIES TO NAME THEIR OFFICIALS

State Committees Will Meet at Bismarck Tomorrow For That Purpose.

LITTLE KNOWN AS TO CHOICE

Republicans Without Candidates, While Dems Have Several Aspirants.

Grand Forks county members of the republican central committee, J. D. Bacon, J. G. Hamilton and Edgar Richter, the latter of Larimore, departed today for Bismarck where the committee meets tomorrow for the purpose of organization.

J. Nelson Kelly and Thomas Griffiths of this city, democratic county committeemen from the sixth and seventh districts, and George T. LaShell of Larimore, democratic committeeman from the fifth district, have gone to the meeting also.

There is very little indication of the prospective choice of the two committees of chairmen, this being particularly of the republicans. The democrats have numerous candidates in the field.

Under the state primary laws, the state committees meet at Bismarck for the selection of their officers, on the first Tuesday of September, the adoption of resolutions, setting forth the policies of the parties, also is a feature of the committee meetings.

REPUBLICAN COMMITTEEMEN

The state committeemen of the republican party, in part, follow: E. Smith Peterson, Park River; M. H. Sprague, Grand Forks; J. D. Bacon, Grand Forks; Major Hamilton, Grand Forks; Ed Richter, Larimore; R. J. Hughes, Wahpeton; W. W. Smith, Valley City; M. B. Olson, Drake; B. T. Benson, Upham; A. W. McMaisters, Mohall; G. R. Powell, Hansford; G. A. Stenich-john, Arnegard; E. L. Gardner, Souris; P. W. Eddy, Jamestown; Senator C. W. Plahn, Milton; E. C. Olgard, McVid, Thos. Slohr, Martin, Hon. John F. Callahan, T. J. Hampton, Fargo; A. Eseland, Cando; F. B. Oakley, LaMoure; J. M. Devine, Minot; Ed Richter, Larimore; Chas. W. Pollock, Fingal; A. R. Mackay, Bottineau; C. G. Gunderson, Noonan; Henry Nelson, Rugby; H. L. Saylor, Cogswell; R. D. Ward, Garrison.

SECOND ANNUAL CORN SHOW

The Garrison Industrial association is making final preparations for its second annual corn show, which will be held the middle of this month.

The farmers in that vicinity are taking an unusual interest in the show, and the splendid crops in that section assure the association a wonderful display of farm products.

One of the features of the show will be a parade of school children on the opening day. The school children throughout the section will play an important part in the exposition.

Governor L. B. Hanna will be the principal speaker. Other speakers will be J. G. Hanev of Grand Forks, R. F. Flint of Bismarck, P. D. Norton of Hettinger and J. H. Worst, T. A. Goyestad and Wesley C. McDowell of Fargo.

AT THE HOTELS.

DAKOTA—A. N. Johnson, Rugby; E. Newman, Minn.; Mrs. E. W. Gebke, Adams; Mrs. M. Moore, Drayton; Fred N. Kelly, Lakota; E. R. Orchard, A. C. Hoffman, Fargo; Ernie M. Kelly and wife, Mrs. R. Cass, Winnetka; M. C. Larson, Minn.; William M. Maschie, O. W. Phillips, Cavalier; J. N. Ottum, Grafton; K. C. Nelson, Lakota; F. P. Bergman and wife, Williston; Misses Bertha M. Walker and Gertrude Walker, Park River; Mrs. Anna Beckstead, Inkster.

FREDERICK—H. J. Johnson, Minnot; Nels Johnson and Ed Ohnson, Warren, Minn.; C. C. Moore, Glasgow, Mont.; O. A. Froy, Edmore; W. N. Washburn, Clyde; E. L. Richter, Larimore; J. A. Penner and H. G. Clizbe, Fargo; H. N. Kirsch and wife, Bismarck; A. P. Stedman, Crookston; E. Keller, Cavalier; John Hancock and E. R. Tuten, Larimore; Miss Marie Overbye, Fairdale; A. D. Greene, Michigan; G. R. Blessum, Devils Lake.

DOG HAS THE TAXI HAT.

(Baltimore Sun.) Kathleen Howard, the dramatic contralto of the Century Opera company, arrived in Paris a few days ago and took her brother, Cecil, an American sculptor, to the strenuous season in America, where new productions necessitated considerable extra expense for costumes, the singer decided that she would practice strict economy this summer. But her brother has a German police dog, whose features in marble and bronze have been seen in several recent salons.

The dog resides in Cecil's studio, and always accompanies him on his walks. The day Miss Howard arrived she took the dog for a walk. But he made a beeline for the nearest taxicab, jumped up with the driver, and turned and smiled at her joyfully. Miss Howard was obliged to climb in after him, and she now is bewailing the fact that taxis cost so much money, especially as the dog never leaves home without immediately climbing aboard the nearest machine.

Local druggists quote the following to show the great advance in price: Hydrochlon, 10 cents a pound two weeks ago, now \$4 a pound; metol, amidol, dianol and oratol, formerly \$6.65 a pound, now \$10; citric acid from \$1 to \$2, bromids of potassium from \$4 to \$6 cents a pound, and pyrogallol acid from \$1.25 to \$2.40.

USE SPRINKLERS IN BASEMENTS

Chief Fitzgerald Suggests Measure for Better Fire Protection.

LOSSES COULD BE MATERIALLY LOWER

Proposes Two Methods, but Favors Sprinkling—Open Letter on Subject.

That damage from basement fires could very easily be prevented is the belief of Chief John Fitzgerald of the local fire department. He declares that by installing sprinkling heads in the various basements in the business houses of the city there would be small chance for such fires to gain much headway.

He has studied the situation over carefully and has concluded that such a system would be a fine thing. Mr. Fitzgerald also states that the perforated water pipe plan is another good system for the prevention of basement fires.

In an open letter Mr. Fitzgerald has made the following recommendations: "I have come to the conclusion that there are two very practical and feasible methods by which basements could be equipped so as to make the possibility of basement fires practically nil.

"One method, and perhaps the better one, is to equip all basements of business houses with sprinkling heads, properly equipped, and all equipment to be installed in the same manner as a regular sprinkler equipment, but with no other source of supply than that of the fire department. Then in case of fire all the department would have to do would be to connect onto this equipment, and wherever the fire would be the sprinkler head would let loose and the fire would be extinguished, provided, of course, the fire had not become too general before the department arrived and made the connection.

"Another method is what is called the perforated water pipe equipment. While this method is good, and, perhaps, not as expensive as the sprinkler equipment, it has, nevertheless, disadvantages, for with this equipment it would be impracticable for the department to make the connection until the fire would be practically beyond control, because if it did the water would escape through the perforations in the pipes and would wet the basement, and the water would damage whatever goods or merchandise that there might be in the basement.

"While I prefer the sprinkler equipment, still the other equipment is a great improvement on what we have at the present time, and if we can not have the sprinkler we should by all means have the pipe system. Only a business district of the city should be thoroughly equipped with one of these systems. It would unquestionably reduce the loss in the business district to a minimum and would, of course, reduce insurance rates; and it would be locking the door of the stable before the horse is stolen, which is a very wise precaution to take. Only four months ago I saw a business building in East Grand Forks burn to the ground, whereas if it had been equipped with either of the systems above suggested it would be standing today.

"Basement fires are the most difficult fires to fight, owing to the density of smoke, or which may be carbon not eat but a limited quantity. And they are generally the fires that seal the doom of the building. They are very treacherous, for when you think you have a basement fire under control you very often see it coming in a conflagration through the roof of the building. So if we can prevent it getting a start in the basement we have prevented it from getting through the roof. And either of the systems mentioned will do this, because the pipes are carried through walls and partitions and you have the water where you want it.

BIRD IS MURDERER'S MASCOT.

Sparrow Visits Condemned Man's Cell and Becomes Friend. (Philadelphia Record.) Calogret Strazler, murderer, awaiting the result of his application for a new trial, has a novel way of passing his time in his cell. He has for his companion a sparrow, which came to him a week ago through his cell window, and is taken as a good omen by the prisoner.

During the court time the bird has been in the man's company he has taught it many tricks. When he goes to sleep the bird will fly on the man's bed, not content till he places it in the pocket of his pajamas. Here it will repose till morning. It will climb up his clothes, eat out of his hand, and does not appear to be satisfied until it is constantly fondled.

So far as politics is concerned, neither Lee nor Hammond has anything coming from republicans. The former has preached party disloyalty in the past and the latter is a democrat.

Local druggists quote the following to show the great advance in price: Hydrochlon, 10 cents a pound two weeks ago, now \$4 a pound; metol, amidol, dianol and oratol, formerly \$6.65 a pound, now \$10; citric acid from \$1 to \$2, bromids of potassium from \$4 to \$6 cents a pound, and pyrogallol acid from \$1.25 to \$2.40.

GUARDSMEN BACK, HAD GREAT TIME

Machine Gunners are Home from Their First Experience in Camp.

NORTHERN ARMY WAS SUCCESSFUL

Maneuvers Resulted in Complete Route of the Southern Forces.

Members of the North Dakota National Guard regiment left Camp McCoy at 10:30 o'clock Monday morning, two of the companies arriving in the city this morning. The Grand Forks Machine Gun company took the train with Minot, Williston, Hillsboro, Wahpeton and Grafton. Another train carrying Fargo, Valley City, Dickinson, Mandan and Jamestown, left the camp one hour later.

The boys are reported all in good shape, but are somewhat tired out as a result of the strenuous maneuvers on the past few days.

The first train arrived in Minneapolis at 4 o'clock Monday afternoon, arriving here shortly after 7 o'clock this morning. At Minneapolis the Grand Forks and Minot companies took the train No. 3 and went home by way of the Surrey cut-off. Wahpeton and Hillsboro dropped off at their respective stations and the Grand Forks and Grafton companies came on to this city.

The local company marched to the armory on North Fifth street on arriving in the city. Captain L. E. Eckman thanked the members of the company for their support during the camp. He was greatly pleased with the showing made by his company.

The story of Friday's maneuvers at Sparta, told by the staff correspondent, follows: Following up its victory of last Thursday maneuvers at Camp McCoy, the invading army, in a most enterprising fashion, the Army of the North Friday completed the annihilation of the Army of the South.

Practically the entire force of the invading army killed, wounded or taken prisoners, with the exception of a few survivors who went in frantic flight over the sand hills in the direction of Bismarck. The rain like a thunderbolt at the critical moment of the engagement.

The victorious army is saddened, however, by the terrific loss of life which the success of the invading army of Williston lost nearly half of its members, and the machine gun company of Grand Forks also suffered heavily in the charge across 500 yards of open ground.

After its defeat of yesterday the Army of the South fell sullenly back to the camp at Bismarck, and made a strong position in the mouth of a pass through the range of high hills southeast of Camp McCoy.

Across the front ran a strip of open ground 500 yards in extent, absolutely devoid of cover for the attacking force. The left flank rested against the range of hills which were believed to be impassable for a hostile army, while a low ridge, strongly entrenched protected the right.

The Northern army began its march in support of the retreating troops shortly after 3 o'clock this morning. The noon bivouac was made a short distance from McCoy station, and reconitering parties were sent out to ascertain the position of the enemy.

The High School Girl Dress Sale

75 New Wool Dresses of Best Style for Girls

THE REASON FOR THE SALE

One of the leading dress manufacturers of the country decided this fall to discontinue making Junior dresses. This decision was not made, however, until some of their sample lines had been completed. About 75 garments had been made up. These our buyer was fortunate enough to purchase at a marked saving in price.

MATERIALS AND PRICES

The dresses are all made of wool materials—serges, challies, etc. The styles are remarkably good—just the thing for the high school girl. In quality we consider them one of our best purchases. There are dresses worth from \$7.50 to \$18.50 in the assortment. Blue, tans, shepherd plaids, and a few light colors comprise the lot. You can make no mistake in investigating this unusual offer.

\$5.50 and \$7.50

OUR SEMI-ANNUAL SILK SALE

Every One Comments on the Exceptional Values

We stated in our opening "ad" that we felt these silks to be the finest in point of pattern and quality we had ever shown. Our statement was well borne out Saturday. Customer after customer said, "Well, they are certainly wonderful values." We might give a long description of these silks but the best describer is your own eyes. May we not have the pleasure to showing these silks to you?

59c TWO LOTS Worth \$1.00 and \$1.50 a Yard 89c

NEW ARRIVALS IN THE BASEMENT

Waists 98c Piece Goods

Another shipment of 12 dozen fall waists in the latest designs. Some of these extra values that have pleased so many this year.

a tremendous fire into the astounded ranks of the opposing force.

The Grafton men had crept cautiously along the top of the razor back from a point several miles further east, and under cover of the battle which was raging on the plain below had gained their position of advantage from which they could sweep the enemy's entrenchments with murderous accuracy.

The victory was won. Cheering madly the remnants of the Grand Forks and Williston companies swept onwards up to the entrenchment, while those of the defenders who had escaped the deadly fire of Company C sought a flight to the rear.

Flushed with success the victorious army returned to Camp McCoy, bringing with them a large number of prisoners, and a number of the promise of good treatment and plenty to eat.

It is believed that the country is now learning of the invading force. This, however, will be ascertained definitely tomorrow.

The Army of the North successfully shut off the Army of the South from the base of the hills, while Company E and the machine gun company pursued the retreating force through the heavy woods further to the south.

Shortly after 3 o'clock the army came in touch with the outposts of the enemy which were driven in, and a short time later arrived at the western edge of the belt of open ground fronting the enemy's position.

Attack on Entrenchments. The Grafton men immediately began to work their way along the hill side, maintaining a hot fight with the opposing force while so doing.

"Gentlemen," said Major Grafton, riding up to Captains Evans and Eckman who had deployed their commands at the edge of the woods, "we must charge those entrenchments."

"The certain death, Major," replied Captain Eckman, "but we will capture the works or die in the attempt. Machine Gun company advance," he added, placing himself in front of his command, and the two companies moved out to the open ground which was being swept with a death-dealing hail of lead.

Steadily the soldiers moved forward, their ranks swiftly thinning upward, their fire more and more terrific. Captain Eckman, who was leading the attack, was seen to stagger.

"Forward, boys; don't mind me," he cried as he fell into the arms of Sergeant Earl Hanson who, bolo in hand, was close behind him.

"Revenge for Eckman," shouted Lieutenant Wineman, placing himself at the head of the command, and with a wild cheer from the advancing rank the furious rush was continued.

At this moment a tremendous burst of firing was heard on the heights in the rear of the enemy's left flank, and Company C swept into view, pouring

NOTHING DONE TO WARRANT ACTION

Board of Trustees of A. C. Deny Charges that Have Been Made.

Flat denial that any action taken by the board of trustees of the North Dakota agricultural college in connection with the merger of the North Dakota State Agricultural Association and the experimental station subjects them to the charge of misconduct in office, is made by members of the board.

The question has been laid before Governor L. B. Hanna, who in turn has placed it before Attorney General Miller for a ruling as to the sufficiency of the grounds alleged as a cause for removal.

C. E. Nugent of Fargo, Clark Kelly of Devils Lake, George H. Hollister of Fargo, Alex. Stern of Fargo, E. Jensen of Westhope and William Weigel of Hebron, are the members of the board of trustees who are under fire, and who make denial of any transactions.

The alleged details of the merger show that the \$40,200 in contracts made by the Better Farming association, and acquired by the experimental station, were covered by private subscriptions, aid from the government, and aid from the counties in which the work was being carried on.

By this showing, it is maintained that this state was in no way affected financially by the merger—the state being exempted from any heavy financial drain as has been alleged.

The proposition made by the board of trustees of the agricultural college to the board of directors of the Better Farming association, is also made public. It deals particularly with the methods of operating and covers the government of the experiment station, where, it is pointed out, the director of the experiment station shall take full control, and members of the faculty in the department, the extension department, and the farmers' institute department, were to be made accountable to the station director.

State Not Affected. The proposition made by the board of trustees of the agricultural college to the board of directors of the Better Farming association, is also made public. It deals particularly with the methods of operating and covers the government of the experiment station, where, it is pointed out, the director of the experiment station shall take full control, and members of the faculty in the department, the extension department, and the farmers' institute department, were to be made accountable to the station director.

The magazine declares that "The Pageant of the Northwest" is "probably the first instance of literary collaboration on a municipal scale."

KITTENS SCARE OFF ROBBERS.

Intruders Drop Sack of Silver and Run for Liberty. (Baltimore Sun.) Two kittens at play in an empty wardrobe in the home of M. H. Young, Euclid avenue, Irvington, are believed to have frightened off robbers who ransacked the house on Wednesday night, causing them to leave silverware worth several hundred dollars behind.

While a member of the family was making an investigation after he discovered the house had been robbed he heard noise in the wardrobe. For a time it was thought that one of the robbers was in hiding. When the door was opened, however, the kittens leaped out.

FT. WILLIAM MAY GET DENNY SULLIVAN

Fargo, N. D., Sept. 1.—The Fargo-Moorhead team of the Northern League may furnish the next manager for the Fort William baseball team, as it is reported an offer has been made to Denny Sullivan, the local center fielder, in excess of that received by any present manager in the Northern League.

Sullivan started in baseball years ago in Fargo as a pitcher, then became an outfielder in the old Northern League, going to the association and later to three American league teams. For the past two years he has been ball coach at the Minnesota University. He is immensely popular here and fans would like to see him locate here for the practice of medicine as he is now a full-fledged doctor.

PAGEANT WRITEUP IN BIG MAGAZINE

Current Opinion Has Article on Sock and Buskin Undertaking—Is Illustrated

The September issue of Current Opinion contains an interesting article on "The New Art of Pageantry in the United States," a great deal of which is given over to a discussion of "The Pageant of the Northwest," which was presented by the Sock and Buskin society of the university.

The article is illustrated with a view of the pageant and a picture of Prof. F. H. Koch. It also contains excerpts from the story of the pageant, as given in the special booklet issued by the society, and from Prof. Koch's address in dedicating the Bankside theater.

The North Dakota university pageant is discussed with the "Masque of St. Louis," the greatest pageant produced in the United States. It was written by Percy MacKave.

Regarding the North Dakota pageant, Current Opinion says: "Saint Louis was the most discussed masque of the summer season, but by no means the only one. The students of the University of North Dakota, for instance, produced on a large scale a 'Pageant of the Northwest.' The Sock and Buskin society of the university, we are told, in an allied itself with the Drama League of America. In the composition and performance of the 'Pageant of the Northwest' the society undertook a work of staggering dimensions. The pageant itself was written in four parts, each part by a group of four undergraduate students. The writers were engaged more than nine months in collecting their historical data and converting them into the poetry of the pageant. This, as Professor F. H. Koch, the presiding genius of the society remarks, recalls the very beginnings of literature—those happy days, as Herder calls them, when literature in the ears of the people, on the lips, and in the harps of living bards."

The magazine declares that "The Pageant of the Northwest" is "probably the first instance of literary collaboration on a municipal scale."
